METAL FORMING SOLUTIONS

SHAPING THE FUTURE

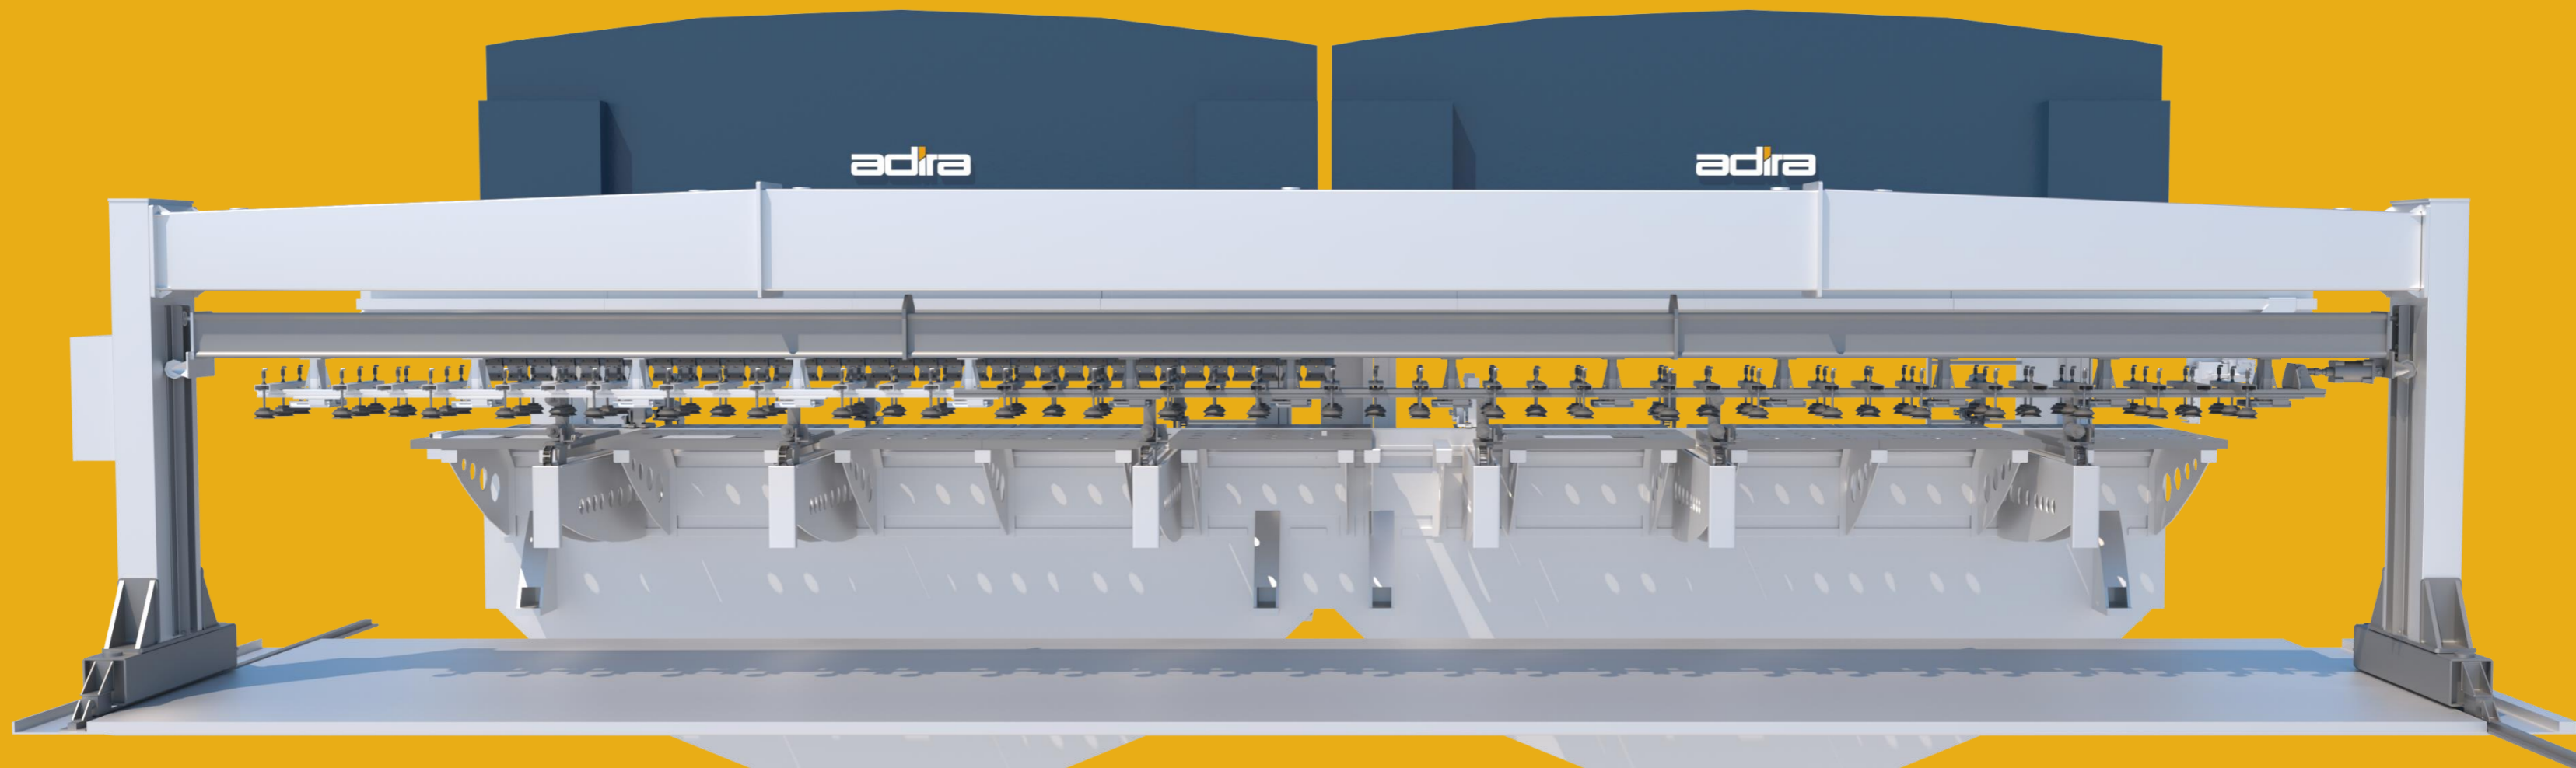

A BENCHMARK FOR METAL FORMING SOLUTIONS.

We increase our customers' competitiveness with innovative, customised Metal Forming solutions that bring added value, working closely with our customers and constantly monitoring each of the projects we implement.

For over 60 years, ADIRA has been advancing the economy and contributing to the well-being of thousands of users in the most diverse areas.

We are prepared for the challenges this new decade may bring as a decisive player in the development of the Portuguese and international industrial structure.

OUR SOLUTIONS
GIVE A NEW SHAPE
TO THE FUTURE.

CUTTING EDGE TECHNOLOGICAL SOLUTIONS.

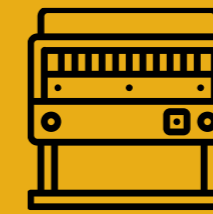

ADIRA is a global provider of metalworking solutions, specialising in the production of cutting and bending equipment, incorporating automation tailored to the specific needs of our customers.

We provide complete solutions for the sheet metal processing industry, including materials such as stainless steel, steel, aluminum, brass and other materials.

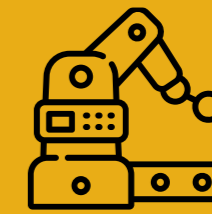

Press Brakes

ADIRA offers a wide range of bending solutions

Shears

Cutting solutions for every need

Automation

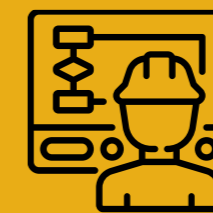

For the most demanding challenges to increasing productivity

Laser Technology

(Mitsubishi Electric)

Exclusive representation in the Iberian Peninsula

Tandem Solutions

For those larger-scale and more complex bending challenges

Additive Manufacturing

Printing large metal parts using TLM technology

INNOVATION FOR IMPROVEMENT, ALWAYS.

We have always been committed to innovation and improving all our products and processes, constantly pushing the boundaries of knowledge. We do everything in our power to make each solution exceed expectations.

OUR METHODOLOGY IS SIMPLE: ALWAYS BEING THERE FOR OUR CUSTOMERS.

Listening to customers is the secret to providing innovative, customised solutions with the efficiency they expect. We are present throughout all stages in the development of sustainable sheet metal cutting and forming solutions.

THIS IS OUR WORLD.

With a strong international culture and global outlook, ADIRA actively operates in countless markets, either through a direct presence or through an extended network of experienced and dedicated agents.

PROFESSIONAL AND FULL SERVICE.

Although ours are turnkey projects, we continue to provide assistance long after they have been implemented.

Our team is ready to provide technical monitoring and training throughout the useful life of the equipment solution installed.

OUR PRODUCTS CAN BEND ANY CHALLENGE. WHAT'S YOURS?

All ADIRA products and solutions are designed to meet all our customers' needs, from the simplest request to integration with complex production processes.

Explore the many ADIRA solutions for sheet metal cutting and bending, automation and machine maintenance.

Press Brakes

ADIRA has a wide range of bending solutions that are flexible and suited to all customer needs.

The diversification of our range of productised press brakes is directly related to 3 factors:

Performance + Size vs. Investment in the solution.

BB	Productivity
PA	Versatility
PF	Performance
PH	Heavy-Duty

Find out more at www.adira.pt

Shears

Our cutting solutions can be adapted to different standards and criteria, bearing in mind the versatility needed in each production process.

The available range can always be quickly scaled to each project.

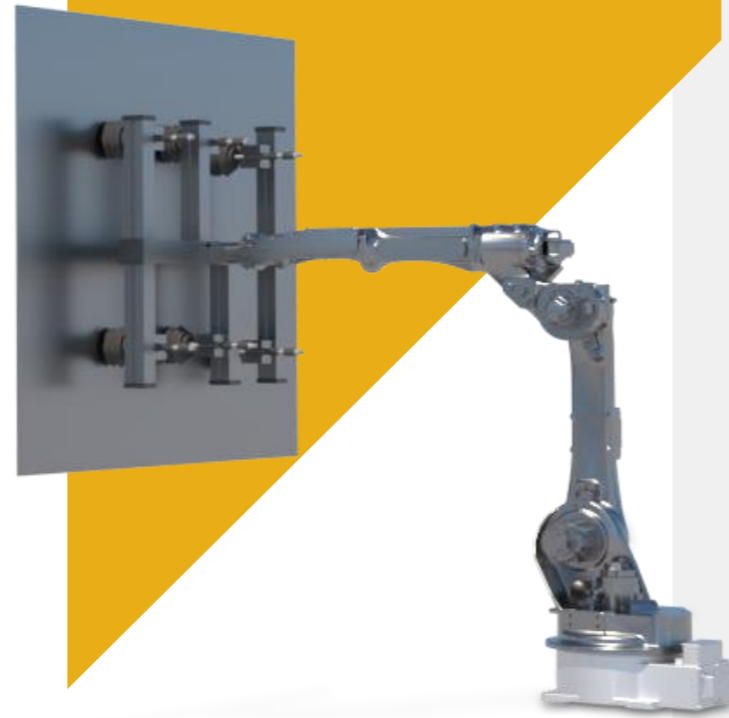

GH

Versatile

GV

Heavy Duty

Automation

Many sectors are now seeking automation solutions to help increase productivity (24/7 production), efficiency (automated process chains) and safety (less human intervention).

ADIRA is dedicated to developing automated solutions tailored to the needs of our customers, whether these are the conception and design of an entire production process chain or the discrete automation of a single workstation.

Made-to-Measure Solutions

With over 60 years' experience, our specialised projects team can design the best solutions to meet your needs.

(Created from scratch,) all projects are developed with the aim of meeting our customers' needs, offering solutions for sheet metal surface treatment, process automation and integration with a host of already installed and operating solutions (software and hardware).

Find out more at www.adira.pt

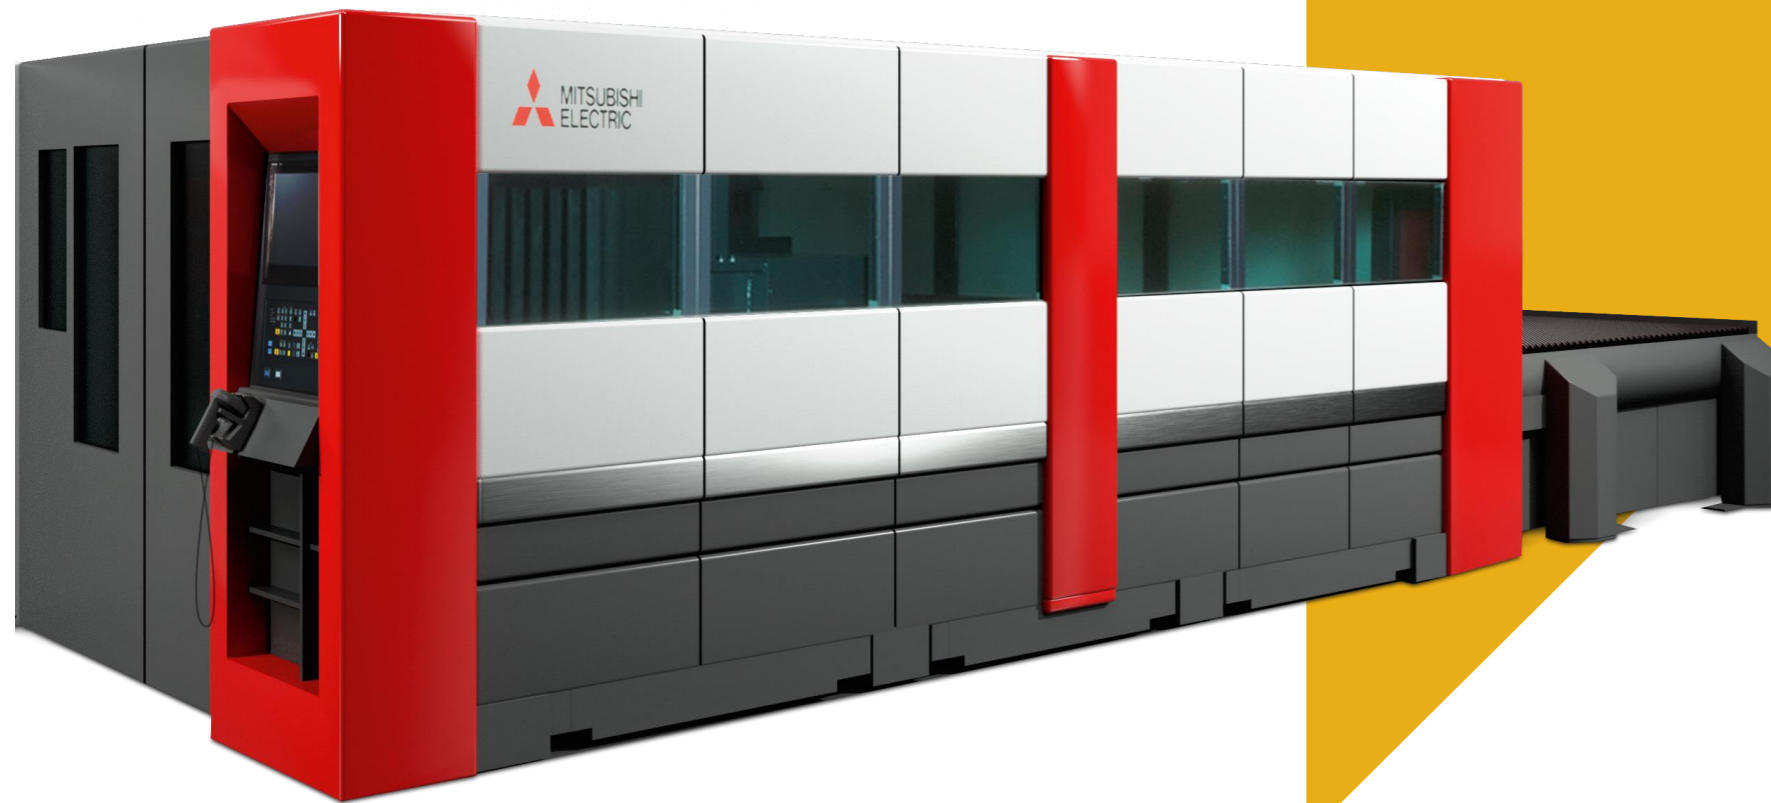

Additive Manufacturing

Additive Manufacturing solution for printing large metal parts in great detail.

Given its modular, scalable design, the only limit is your imagination.

Find out more at www.adira.pt

Laser Technology (Mitsubishi Electric)

ADIRA is the sole representative of the entire Mitsubishi Electric Laser Portfolio in the Iberian Peninsula.

EX

Flexibility

GX

Quality

RX

Productivity
