

**Our other  
PREMIUM – PRODUCTS are:**

**AQUA Foam** [foam material]

This newly developed foam material removes dirt so gently that every car is “tickled” and guarantees no scratches or holograms are left on the vehicle’s paintwork.

**AQUA Wool** [synthetic lambskin]

**AQUA Wool** is a washing material available only from **AQUA BRUSH** for top-notch car wash designs. This patented **multi-function system** guarantees the gentlest and quietest of washes.

**AQUA Dry** [synthetic drying material]

**AQUA Dry** is a drying material developed by **AQUA BRUSH** with a special composition of materials which, in turn, ensures efficient final drying and polishes paintwork to a mirror finish.

**AQUA Felt** [washing felt]

**AQUA Felt** is a textile washing material providing high cleaning performance and extreme durability.

**AQUA Felt** distinguishes itself from other washing materials with its longevity and the low level of care needed.

Detailed information on all **AQUA BRUSH** PREMIUM products can be found at [www.aqua-brush.de/en](http://www.aqua-brush.de/en)

**Provider of washing brushes  
for car washes**

For more than 20 years, **AQUA BRUSH** has been one of the specialist manufacturers of washing brushes for tunnel car washes, gantry car washes, commercial vehicle washes and special machines.

As such, we work on refining the widest range of washing and drying materials for mechanical vehicle washing.

**AQUA BRUSH**

**AQUA Pe**  
[monofilament polythene brushes]

TUNNEL CAR WASHES  
GANTRY CAR WASHES  
COMMERCIAL VEHICLE WASHES

## AQUA Pe

[monofilament polythene brushes]

The monofilament polyethylene brushes have largely disappeared from use in car washes as, despite very good washing results, they leave residue (holograms) on the vehicle paint after washing. Monofilament polyethylene brushes are nevertheless still indispensable for commercial vehicle washes and in the production of wheel washing brushes.

**AQUA Pe** promises you:

- good cleaning performance
- hard-wearing
- medium service life
- easy to install
- different colours

## Easyclick fastening mat

The Easyclick fastening mat especially developed by **AQUA BRUSH** makes it possible to mount your washing material without the use of any tools.

### How it works:

You lay the washing mat supplied by **AQUA BRUSH** around the respective slotted tubes of your car wash, snap the ends together and secure them with the plug provided - done!

threaded and sealing plugs

Product example

## Use of ...

our **AQUA Pe** is still popular for the manufacture of washing material for commercial vehicle washes and wheel washing disks used for washing wheel rims. The large number of **AQUA Pe** strands on a fastening mat and the high rotary speeds of the brush tube achieve very attractive cleaning performance. The delicacy of **AQUA Pe** makes it possible to get to even those difficult-to-reach nooks and crannies on vehicles.

**SUITABLE FOR:**  
TUNNEL CAR WASHES  
GANTRY CAR WASHES  
COMMERCIAL VEHICLE WASHES

Available in various colours (upon request)
