Awareness and action against plastic waste.

WHY

MICHAEL BARTER, BLAKE CEO REFLECTS

As a father of five children, excursions to the seaside are a regular occurrence. In recent years nothing grieved me more than to see plastic waste emblazoned with some of the country's best known brands swirling around the children's feet. A clear indicator of the enormity of the damage that plastic pollution is having on the life forms in our oceans.

Therefore the launching of Blake's VITA® plastic-free postal packaging brands comes from a sense of responsibility and emotion. As a market leader in the supply of postal packaging products we at Blake have a responsibility to act and do what we can to curtail the issue of plastic on our rivers, coastlines and oceans.

We believe that our VITA® product selection meets the need of any and every e-commerce postal solution and provide you with an alternative to plastic. It is also important to note that many of these products have the desired effect of not only reducing excess packaging but will now enable thousands of SME's and Corporates to take advantage of the most overlooked delivery method... the letterbox.

Together we can do our bit to keep our coastlines, oceans and watercourses clear of plastic waste.... Blake have provided the resources to make a start on this imperative step, it's your job to make it better by one.

Michael Barter
CEO

Blake

HOW

At Blake we are committed to supporting marine conservation charities whose goal and purpose is working with communities to protect our oceans, rivers and coastlines and to preserve marine life from the impact of plastic packaging waste.

For every VITA® product you buy The Blake Foundation will make a contribution to these selected marine conservation programmes enabling this great effort to continue.

Tim Browning

Director
CSR Corporate Social Responsibility
Blake Envelopes

VITA® – the plastic free e-commerce packaging solution.

This range of products is designed and carefully selected to address two big current issues that are very much in the public consciousness at present.

The first is the drive to eliminate plastic, while the other is to deal with what is referred to as 'over-packing', reducing excess packaging waste.

The VITA® brand of products (Vita being Latin for life), provides a paper alternative to any plastic e-commerce postal solution.

Many of these products also have the ability to enable countless SME's and Corporates to take advantage of arguably the most overlooked delivery method, namely the humble letterbox.

An underwater photograph showing sunlight rays filtering through the water surface, creating a serene and slightly somber atmosphere. The water is a deep teal color, and the light rays are visible as bright, diagonal streaks.

**THE ISSUE IN THE UK
IS THAT MORE THAN
51 MILLION TONNES
OF WASTE WHICH IS
RECYCLABLE ENDS UP IN

BOARD BACK EXPANDABLE ENVELOPES

This unique product encapsulates the best of a board back envelope and an expandable mailing pocket, these heavy duty board back envelopes with expandable sides are available in both white and natural brown. Made using recycled, strong paper board to ensure protection when posting bendable items. All of our 'Please do not bend' envelopes and board back envelopes have peel & seal closure and most important of all; they fit through the letterbox. Bespoke printing and sizing available, please feel free to contact a member of our team to discuss.

Paper alternative for: Plastic bubble mailers, polythene mailers.

RECYCLED KRAFT POSTAL WRAPS

Our kraft postal wraps provide the necessary strength for bulky/fragile items. Made from corrugated cardboard, they are the extra-safe mailing solution. They also include a central pocket that holds any item firmly in place, to minimise any damage. Ideal for high value, fragile electronic goods. Bespoke printing and sizing available, please feel free to contact a member of our team to discuss.

Paper alternative for: Plastic bubble mailer.

10 FACTS ABOUT SINGLE-USE PLASTIC BAGS
https://www.biologicaldiversity.org/programs/population_and_sustainability/sustainability/plastic_bag_facts.html

We are Blake. Market leaders in the world of envelopes and postal packaging, distributing our brands to over 45 countries worldwide.

Each year over 2 billion Blake products drop through mailboxes of businesses and households across the globe. We are positively passionate, consistently caring and sustainably sound from beginning to end.

Many view the envelope as a product of the past used for letters and mail, but we view the envelope of the present and the future, as an 'e-commerce transportation tool'. It provides a solution that is alternative to plastic, and by its very construction and sizing, removes the consumer frustration of 'over-packing'. This, combined with its ability to go through a mailbox, gives you the most cost effective and secure method of delivering your e-commerce.

Our diversification extends to anything that 'envelops' your product Blake..... delivering sustainable enveloping solutions that create memorable experiences.
