**2018**  
Product  
Catalog

2018 is a year of anniversaries here at CZ-USA — 20 years ago, Česká zbrojovka established a foothold here in Kansas City, Kansas, setting up CZ-USA to handle importation and everything else that’s involved in getting CZs to U.S. shores. In the beginning, we were selling very European guns to a very American audience, and outside of a few niche groups we were a relative unknown.

As our company grew, we filled our ranks with employees who shoot and hunt as a way of life, and over the years we have been able to evolve our line to better meet the tastes and shooting styles of U.S. consumers. This combination of Czech craftsmanship and American firearms culture has resulted in a product line to be proud of.

Possibly more impressive is the 50th anniversary of Dan Wesson! We are proud to include them in the CZ-USA family of firearms, and the craftsmen there have created a very special pistol to commemorate the occasion.

As we continue to grow on this side of the globe, we are getting ever closer to U.S. production. We are proud to say we have achieved certification for our ISO 9001 Quality Management System — a sign that things here are headed in the right direction.

Many thanks are due to the employees and customers who have assisted us, both with hard work and feedback over the years, helping shape us into the company we are today.

Alice Poluchova  
CZ-USA President

Keep an eye on our website ([cz-usa.com](http://cz-usa.com)) and webstore ([shop.cz-usa.com](http://shop.cz-usa.com)) for updates to our products and accessories throughout the year.

Watch for CZ-USA firearms to be featured on *Petersen’s Hunting Adventures*® on the Sportsman Channel, *Razor Dobbs Alive* on the Sportsman Channel, and *CZ-USA’s GunDog TV* on the Outdoor Channel and *Wingshooting USA* on NBC Sports, Pursuit Channel, MAV TV, AMG TV, Tuff TV and The Walk.

# SCORPION

TACTICAL

## CZ SCORPION EVO 3 S1 PISTOL OD GREEN AND BATTLESHIP GREY

With dead-simple blowback operation, the Scorpion will chew through an ammo stockpile in no time flat. Based on our tried-and-true A1 submachine gun, the Scorpion Pistol and all of its variants revolve around the same principle — less is more. With fewer moving parts in general and over-built, robust components, the Scorpion derives reliability from its simplicity.

An 11" Picatinny rail rides on top, and a superb set of aluminum adjustable sights are fitted from the factory. With four rear aperture sizes, they can be set up for quick acquisition or precision with just a spin of the rear sight. The muzzle on the Scorpion Pistol is threaded with both 18x1 and 1/2x28, so fitting a suppressor or muzzle device is a no-brainer.

CAL: 9mm Luger FINISH: OD Green

### MODEL VARIANTS:

- CZ Scorpion EVO 3 S1 Pistol Battleship Grey — Battleship Grey furniture
- CZ Scorpion EVO 3 S1 Pistol FDE — Flat Dark Earth furniture
- CZ Scorpion EVO 3 S1 Pistol — Black furniture

NEW

Arriving summer 2018

## CZ SCORPION EVO 3 S2 MICRO PISTOL W/ BRACE

With a 4" barrel and HB Industries short handguard, this diminutive Scorpion is the result of our development of a smaller, suppressed Scorpion for an undercover drug interdiction unit. With a collapsed length of just over 16 inches, this pint-sized pistol features a NoOsprey faux suppressor from the folks over at SilencerCo. Its telescoping SB Tactical arm brace extends for additional stabilization, making this one potent little package.

CAL: 9mm Luger FINISH: Black

## CZ SCORPION EVO 3 S1 PISTOL W/ FLASH CAN & FOLDING BRACE

Equipped with a folding SB Tactical arm brace, this Scorpion Pistol wears the forend of its larger brother, the Carbine. With the same 7.7" pistol barrel, owners can unscrew the 5" KAK Flash Can and install most pistol suppressors under the handguard, keeping the overall length down. Dual threads of 18x1 and 1/2x28 make fitting a suppressor simple.

CAL: 9mm Luger FINISH: Black

### MODEL VARIANT:

- CZ Scorpion EVO 3 S1 Pistol w/ Flash Can — Rear sling attachment plate instead of folding brace

## CZ SCORPION EVO 3 S1 CARBINE W/ FAUX SUPPRESSOR

The Scorpion Carbine is a whole new animal. Building on the lauded submachine gun platform that first hit the US civilian market in pistol form in 2015, the Carbine has a 16.5" barrel fitted with either a compensating muzzle brake or a faux suppressor built specifically for CZ-USA by SilencerCo.

Fit with the factory's folding adjustable stock, the Carbine features a number of US-made parts to make it fully 922(r) compliant. One of the nicest features of the firearm is the carbine-length forend, which is covered in M-LOK attachment points to keep the profile slim while still being big enough to swallow most pistol-caliber suppressors should the owner decide down the road to convert it to an SBR for use with a suppressor.

Low-profile aluminum adjustable sights round out the platform, and a top Picatinny rail allows the mounting of a wide array of optics.

CAL: 9mm Luger STOCK/FINISH: Folding/adjustable, black

### MODEL VARIANT:

- CZ Scorpion EVO 3 S1 Carbine — Compensating muzzle brake instead of faux suppressor

## CZ SCORPION EVO 3 S1 CARBINE FDE

A new hue for the Scorpion Carbine, this pistol caliber plinker is clad in Flat Dark Earth furniture.

CAL: 9mm Luger STOCK/FINISH: Folding/adjustable, FDE

### MODEL VARIANT:

- CZ Scorpion EVO 3 S1 Carbine FDE w/ Faux Suppressor — Instead of the muzzle brake, this variant uses a faux suppressor for a muzzle device

# BREN/SNIPER RIFLES

## CZ 805 BREN S1 PISTOL

Imported from the Czech Republic as a pistol, this Bren with its 11" barrel has proven a popular SBR candidate for customers wanting to convert it into an NFA firearm. Those who don't wish to register with the ATF can always equip it with our adapter kit that allows easy installation of aftermarket arm braces or other devices meant to help stabilize large format pistols like this.

Chambered in 223/5.56, it uses the ubiquitous STANAG magazine from the AR15/M16. Picatinny rails top and bottom mean it easily accepts optics and lights, and an effective two-port muzzle brake helps keep the pistol solidly on target and reduces recoil and muzzle flip.

**CAL:** 223/5.56x45 **FINISH:** Black

### MODEL VARIANT:

- CZ 805 **Bren S1 Pistol FDE** — 223/5.56x45, Flat Dark Earth receiver, lower and magwell

## CZ 805 BREN S1 CARBINE

For those who would prefer to own a Bren in rifle form without having to jump through all the hoops of converting our pistol version into an SBR, the Bren is available in carbine form with a 16.2" barrel. Equipped with the factory's folding adjustable stock, it also has a set of flip-up adjustable iron sights.

Chambered in 223/5.56 and using the ubiquitous STANAG magazine from the AR15/M16, it easily accepts optics and lights on its top and bottom Picatinny rails. An effective two-port muzzle brake helps keep the Bren solidly on target and reduces recoil and muzzle flip.

**CAL:** 223/5.56x45 **STOCK/FINISH:** Folding/adjustable, black

### MODEL VARIANT:

- CZ 805 **Bren S1 Carbine FDE** — Flat Dark Earth receiver, stock, lower and magwell

optics not included

## CZ 557 URBAN COUNTER-SNIPER

Built for compactness, the 557 Urban Counter-Sniper is designed to excel at engaging targets within 400 yards. Chambered in 308 Win., the short 16" barrel only sacrifices 150 fps compared to a standard barrel, and its 5/8x24 three-prong flash hider serves as a QD for a suppressor. The carbon fiber composite Manners stock provides a rock-solid platform without weighing the rifle down. The large, detachable box magazine and oversized bolt handle make feeding the rifle easy as can be. QD sling flush cups on the left side make it easy to sling the rifle across the back.

**CAL:** 308 Win. **STOCK/FINISH:** Carbon fiber composite/black

optics & bipod not included

## CZ 750 SNIPER

With an effective range of 800 yards, the CZ 750 Sniper is ideal for use by the elite military and law enforcement snipers it was designed for. The synthetic thumbhole stock is adjustable for comb height as well as length of pull. The underside of the forend is fitted with a 220mm-long rail that provides multiple attachment points for a bipod.

Two scope-mounting options are available for the 750 Sniper. A Weaver rail comes installed, or by removing the rail, the integrated CZ 19mm dovetail may be used. The 750 features an 18x1 muzzle brake, thread protector, mirage shield, two 10-round detachable magazines and its 26" barrel has 4-groove rifling in 1:10" twist.

**CAL:** 308 Win. (7.62x51 NATO) **STOCK/FINISH:** Black composite tactical/blue

optics & bipod not included

## CZ 550 H.E.T. II (HIGH ENERGY TACTICAL)

Starting with a 550 Magnum action from the Czech Republic, our custom gunsmiths in the U.S. sculpt a precision long-range platform guaranteed to shoot sub-MOA and chambered in the potent 338 Lapua. The H.E.T. II rides in a carbon fiber composite stock from Manners' tactical series, with adjustable cheekpiece and molded-in midnight camo. Industry-standard Accuracy International magazines are secured to the chassis by custom Badger Ordnance bottom metal, and a low-mount Picatinny rail makes fitting optics a breeze. To melt away the 338 Lapua's recoil, a Badger Ordnance FTE muzzlebrake runs point. QD sling flush cups abound and the muzzle is threaded 3/4x24.

**CAL:** 338 Lapua **STOCK/FINISH:** Carbon fiber composite/camouflage

## MILITARY/LAW ENFORCEMENT ONLY

**CZ-USA**  
LAW ENFORCEMENT • MILITARY

## CZ BREN 2

The ever-evolving needs of military forces led to the further development of the Bren platform. Whereas the 805 was built to a specific set of predetermined requirements, the Bren 2 took years of input and data from use in the worldwide war on terror and put it all together in a smaller, lighter package.

A shorter gas system allows for barrel lengths down to 8", while giving settings for normal use or adverse conditions. The aluminum receiver is shorter and thinner, shaving weight from the rifle. Modular and built to swap between chamberings and barrels, the Bren 2 is available in three barrel lengths in 223/5.56x45 and one in 7.62x39.

Gone is the reciprocating charging handle; in its place is one that remains forward while the action cycles, but can be used to charge the rifle via a ratcheting mechanism that allows it to be used as a forward assist if needed. All controls are ambidextrous, including a bolt release located inside the trigger guard. For those familiar with the M16/AR15 platform, a paddle-style bolt catch/release is located on the left side of the weapon.

The Bren 2 is select-fire, currently only available for military/LE special order.

**CAL:** 223/5.56x45, 7.62x39 **STOCK/FINISH:** Folding/adjustable, black

## CZ 805 BREN A2

Knowing that the Czech armed forces needed a new service weapon to replace the vz. 58, CZUB developed the 805 Bren. Designed around modularity, it is specifically built to switch between calibers and even magazine systems easily. Removing the barrel/piston system only involves six easily accessible screws. Swap out the bolt face, and the rifle can shoot a range of different cartridges.

With a short-stroke piston system and a highly effective muzzle brake, the 805 has gained a reputation for its smooth recoil impulse and lack of recoil.

The 805 features ambidextrous controls, STANAG (M16/AR15) mag compat-

ibility and a folding, adjustable stock. Available in A1 (14" barrel) and A2 (11" barrel) configurations with a monolithic 1913 top rail and accessory rails on sides and bottom.

The Bren 805 A1 and A2 are only available for military/LE special order.

**CAL:** 223/5.56x45 **STOCK/FINISH:** Folding/adjustable, two-tone

### MODEL VARIANT:

- CZ 805 **Bren A1** — 14" barrel

## CZ SCORPION EVO 3 A1

The CZ Scorpion EVO 3 A1 is a compact submachine gun in 9mm Luger. With a blowback-operated action, the Scorpion can empty its magazine in a hair over 1.5 seconds. Equipped with a folding, adjustable LOP stock, accuracy can be had out to 250 yards. The stock can be removed completely to create a surprisingly controllable machine pistol.

To make the Scorpion user-customizable, the reach to trigger is adjustable for different hand sizes, the charging handle is reversible, and the mag release is ambidextrous.

The EVO's frame and trigger guard assembly are made of a lightweight polymer with monolithic top rail and accessory rails on sides and bottom. Field strip is made simple with a captured pin that allows the removal of the trigger assembly, enabling easy removal of the bolt and all moving parts.

Select-fire versions of the Scorpion are only available for military/LE special order.

**CAL:** 9mm Luger **STOCK/FINISH:** Folding/adjustable, black

## FIRST RESPONDER PURCHASE PROGRAM

CZ-USA recognizes the many sacrifices our first responders and military members make on a daily basis. As a small way of saying thanks, we offer a special buying program for these special people (as well as retirees from these professions), and participants enjoy a significant savings off MSRP. To request program details, email [LESales@cz-usa.com](mailto:LESales@cz-usa.com).

## CZ-USA ARMORER'S COURSES

Working with Team One Network, CZ-USA has developed certified armorer's courses for law enforcement, military and licensed armed security personnel. For information on courses and availability, visit [teamonenetwork.com](http://teamonenetwork.com) or email our LE department at [LESales@cz-usa.com](mailto:LESales@cz-usa.com).

Needing a commemorative firearm for a unit, group or event? We'd be happy to oblige!

# SUPPRESSORS

With evolving needs on our Law Enforcement side dictating the requirement for a Scorpion-specific suppressor, we decided it was high time to throw our hat into the ring of the U.S. suppressor market. We're of the opinion that any product we can sell to LE we should also be able to sell to any other civilian, so while the Hughes Amendment might preclude the real fun stuff, we're happy to offer a line of suppressors that are optimized for CZ platforms.

From the Scorpion S2 Reflex to our line of titanium centerfire reflex cans, the overarching theme in our suppressor line is that function should dictate form. The results are lightweight and robust, with no excess bulk. Where possible, we incorporate reflex systems that minimize the overall length when threaded onto a host while maximizing internal volume — allowing these cans to suppress better than competitor offerings with the same overall firearm length.

## CZ S2 TI REFLEX

With increasing use of Scorpions by Law Enforcement, we knew the time was quickly approaching when we'd need suppressed variants to meet the demands of some of the special units we work with. Not only that, we needed a suppressor that could maximize the available real estate of the Scorpion package while keeping the overall length as short as possible.

The resulting gun is the Scorpion EVO III S2 Micro — found on page 6 in pistol form. The can to match needed to be something that we couldn't source in the marketplace, requiring us to make it ourselves. Teaming up with the airflow specialists at Aerocharger, we were able to achieve the suppression of large cans but in a much more compact package. Comparing it directly to a standard Scorpion with one of the most popular micro 9mm cans on the market, the combo of the Scorpion Micro and the S2 Reflex are nearly 3" shorter, while further dampening the report by almost 10 dB!

A fully-welded titanium can, the S2 Ti Reflex is designed to fit under an HB Industries handguard, allowing it to have a 2" reflex blast chamber and giving it the volume of much larger cans while only protruding from the muzzle 5.83 inches. This full titanium can weighs in at just 9.6 ounces and spits out 147 grain defensive loads at well under 130 dB.

For Scorpion owners who want the benefits of the S2 suppressor but at a more favorable price point, the S2 SS is the same fully-welded reflex design executed in 17-4 stainless steel. The downside of this stainless construction is a bit more weight — meaning it clocks in at 15.36 ounces.

**CAL:** 9mm Luger **FINISH:** Black Cerakote

### MODEL VARIANT:

- **CZ S2 SS Reflex** — stainless steel construction

## CZ INTEGRAL 22 LR

If it weren't for the endcap, this suppressor would be completely unnoticeable — that is until the trigger is pulled. Then it still might go unnoticed, since with subsonic ammo the loudest report will be that of the striker falling.

Built into one of our standard 455 Varmint barrels, it utilizes a patented screw-in baffle system. Using the included tool, the owner can thread the baffles in to pre-designated locations within the forward threaded suppressor portion of the barrel. If they wish, they can tune baffle lengths to their liking, finding just the right combination for their load of choice.

Baffles and endcap are cut from 7075 aluminum, meaning between the hollowing out of the barrel and the lightweight suppressor components, the .866" diameter Varmint barrel experiences some weight loss while still measuring in at 20.9".

A unique (and patented) baffle thread cuts through accumulated crud for regular cleanings, which we recommend be done every 300 rounds due to the dirty nature of rimfire ammunition.

**CAL:** 22 LR **FINISH:** Black Cerakote

### MODEL VARIANTS:

- **CZ Integral 17 HMR** — chambered in 17 HMR, 20.9"
- **CZ Integral 22 LR** — chambered in 22 LR, 16.9"
- **CZ Integral 17 HMR** — chambered in 17 HMR, 16.9"

## CZ RIMFIRE 22 LR

Simplicity. With the same thread-in baffle system as the Integral system on the opposing page, the CZ Rimfire suppressor is built to blend into the heavy cylindrical barrels of our 455 Varmint line, with a .866" diameter and a 6.9" length.

The same tunable baffle system allows users to set the baffles to factory specs or choose their own depths, chasing just the right spacing for the load they prefer to use. Easily taken apart for cleaning, the Rimfire can be used on any rimfire round under .224" diameter, including 17 HMR, 22 WMR and even 17 WSM. Due to the dirty nature of rimfire ammunition, cleaning every 300 rounds is recommended.

**CAL:** Any rimfire below .224" diameter **FINISH:** Black Cerakote

## CZ 5.56 TI REFLEX

Combining light weight, superb suppression and short installed length, our centerfire reflex cans sport a very distinctive shape. To shave ounces, each titanium baffle is turned down on a lathe until it possesses just the right amount of material to withstand the pressures of full-auto use. The swirled shape of the internal baffle structure is reflected in its exterior, and each baffle is welded to the next until the stack exhibits a unique silhouette. Not only does this eliminate extra material that would simply add weight, it also increases surface area for heat dissipation.

The endcap and mount are replaceable, and each can is shipped with a 3" reflex mount that allows the user to boost the internal can capacity greatly without increasing the overall length when assembled, with a standard flush mount also included for use on firearms that won't allow for the reflex. Threaded 1/2x28 in 5.56, it is rated for full-auto use.

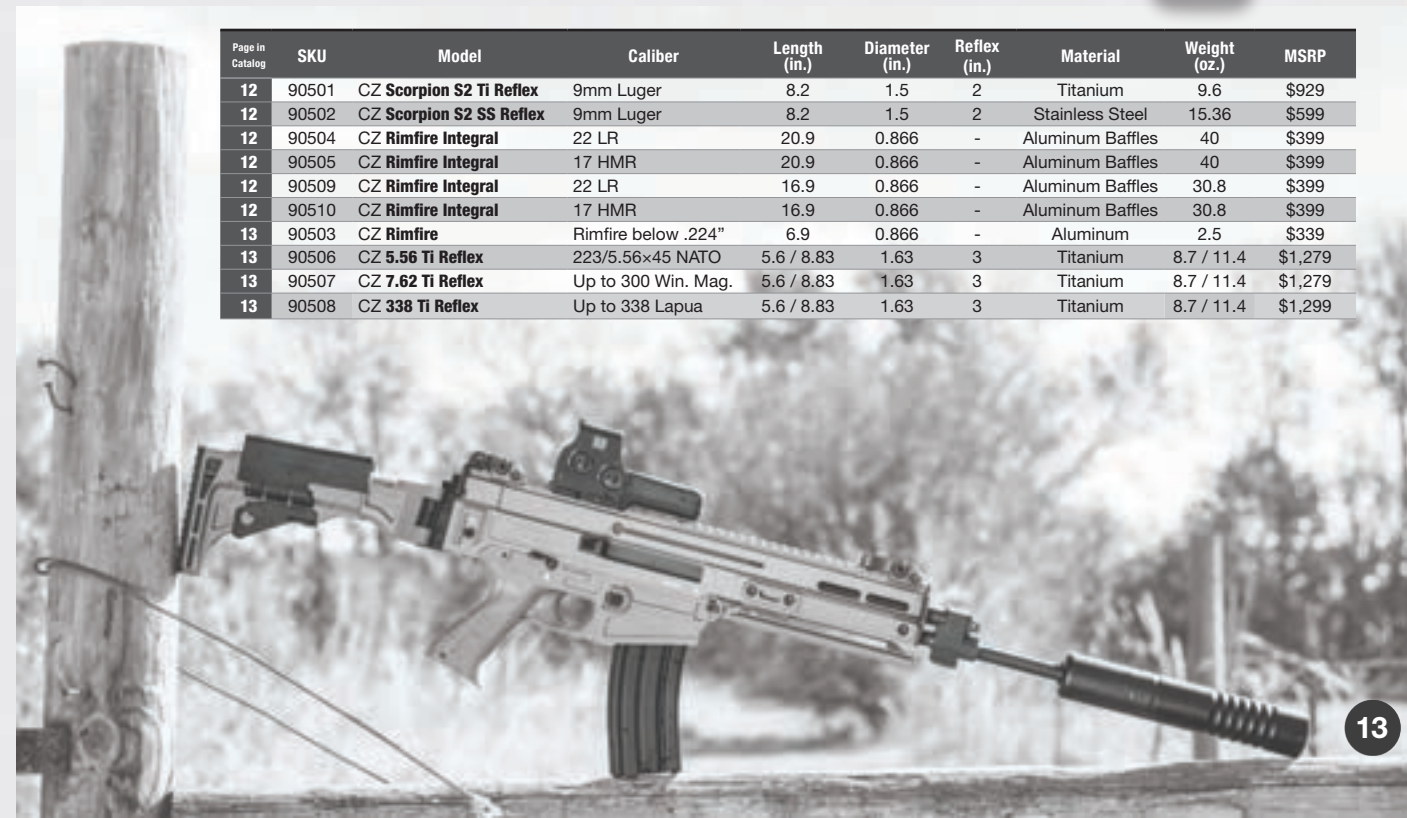

**CAL:** 223/5.56x45 NATO and smaller **FINISH:** Black Cerakote

### MODEL VARIANTS:

- **CZ 7.62 Ti Reflex** — rated up to 300 Win. Mag., 5/8x24 thread
- **CZ 338 Ti Reflex** — rated up to 338 Lapua, 3/4x24 thread

# CZ P-10

## CZ P-10 C

Much more than just our take on the striker-fired pistol, the P-10 is decidedly CZ, from the way it feels to the way it shoots.

First order of business, ergonomics. Anyone who's picked up a CZ 75 for the first time gets it — it just has to feel right in the hand. With the CZ grip angle, the P-10 avoids that "brick-in-the-hand" feeling that has plagued many in the striker-fired genre, allowing it to point naturally. A mild palm swell, deep beavertail and three interchangeable backstraps make the P-10 fit a wide variety of hands as if it were built for them. Because it was.

Next up, trigger. Many striker-fired pistols do many things right and then fall short when it comes time to pull the trigger. Designed to minimize creep and stacking, the P-10's trigger breaks clean and light and rebounds with a short, positive reset, meaning single shots can be meticulously placed while follow-ups are effortless.

Built to withstand the rigors of military use, its fiber-reinforced polymer frame and hardy nitride finish are made for the daily grind. A generous trigger guard allows use with gloved hands while being undercut to allow as high a grip as possible, and a set of metal tactical 3-dot sights allow for one-handed manipulation of the slide on a belt. Like all CZ pistols, the P-10 is built with our legendary cold hammer-forged barrel.

The "C" indicates that it is compact in both frame and slide size, and magazines are backwards-compatible with the hammer-fired P-07, meaning the P-10 C holds 15+1 in 9mm in a flush-fitting mag, with extended bases allowing 17+1.

Take-down of the P-10 will be familiar to most fans of striker-fired guns, and even more pleasing will be holster compatibility with some of the most common guns on the market. An ambidextrous mag release and slide stop make the P-10 easy to operate with either hand.

It may have taken a while to come to market, but we feel the wait has been worth it. With CZ reliability, engineered ergonomics and a bevy of features both familiar and new, the P-10 is the complete package.

**CAL:** 9mm Luger **FINISH:** Nitride/black polymer

### MODEL VARIANTS:

# CZ P-09

## CZ P-09

For those who prefer the double-strike capability of the CZ 75 DA/SA hammer-fired system, the P-09 is our full-size service pistol. Boasting an impressive 19+1 rounds in 9mm in its flush-fitting magazine, its capacity is unsurpassed by any other service pistol.

With the versatile Omega trigger system, the P-09 is shipped with ambidextrous decockers installed but can easily be converted to ambi manual safety with the supplied parts and instructions.

Also included are small, medium and large backstraps that allow users to customize the pistol's grip to their hand while retaining the natural point of aim that CZ handguns are known for.

With an integrated 1913 Picatinny rail, the P-09 is readily adaptable to low-light situations. The Omega DA/SA trigger provides a crisp single-action trigger break while providing the safety of a DA first-pull option.

**CAL:** 9mm Luger **FINISH:** Nitride/black polymer

### MODEL VARIANTS:

- CZ P-09 OD Green — OD green frame 
- CZ P-09 — 40 S&W, 15-round capacity

# CZ P-07

## CZ P-07 OD GREEN

Our compact polymer DA/SA pistol, the P-07 shares all of the features of the P-09 just in a much smaller package. The same Omega trigger system allows users to easily swap from a manual safety to a decocker depending on their preference. With 15+1 capacity in 9mm (12+1 in 40), it makes for a concealed-carry firearm without sacrificing capacity.

A Picatinny light rail on the dustcover enables it to pull duty at the bedside with a light/laser and the metal 3-dot sights are easy to acquire at the range. Three interchangeable backstraps allow shooters with small or large hands to tune it to fit their grip.

Featuring the versatile Omega trigger system, the P-07 is shipped with ambidextrous decockers installed but can easily be converted to an ambi manual safety with the supplied parts and instructions.

**CAL:** 9mm Luger **FINISH:** Nitride/OD green polymer

### MODEL VARIANTS:

- CZ P-07 — black polymer frame
- CZ P-07 — black polymer frame, 40 S&W, 12-round capacity

## CZ P-09 KADET KIT

Our Kadet Kits have always been popular with shooters who want to be able to practice with their carry, competition or duty firearm but with the reduced cost of 22 LR ammo. This means ergonomics, controls and any internal modifications are present for plinking, all while retaining holster compatibility.

Topped with a set of serrated target sights borrowed from the Shadow 2, the P-09 Kadet Kit ships with two magazines.

**CAL:** 22 LR **FINISH:** Black anodized

## CZ P-07 KADET KIT

Designed to swap onto current P-07s and older P-07 Duty pistols, the P-07 Kadet Kit enables shooters to train using cheaper (though not as cheap or plentiful as it used to be) 22 LR ammo. With a 10-round magazine and fully reciprocating slide, function will be identical to the host pistol in factory form, just with lighter recoil and lower cost associated with its use. Ships with two magazines.

**CAL:** 22 LR **FINISH:** Black anodized

# SUPPRESSOR-READY

## CZ P-10 C SUPPRESSOR-READY

The newest CZ pistol joins the quiet riot. With an extended barrel threaded 1/2x28, this striker-fired pistol can fill every role — from range-day plinker or duty weapon to bedside protector with a light and compact can. High night sights give good visibility over most 9mm cans, while the extended mag bases boost capacity by 2 rounds.

CAL: 9mm Luger FINISH: Nitride/black polymer

## CZ P-09 SUPPRESSOR-READY

Loaded with features but without all the flash of the Urban Grey series, the standard black P-09 Suppressor-Ready now comes with high night sights and extended magazine bases in addition to the obligatory extended, threaded barrel (1/2x28).

CAL: 9mm Luger FINISH: Nitride/black polymer

### MODEL VARIANT:

- CZ P-07 Suppressor-Ready — Compact model, 17+1 capacity

All CZ Suppressor-Ready 9mms are threaded 1/2x28 and are fitted with a set of high tritium night sights.

## CZ URBAN GREY SUPPRESSOR-READY SERIES

Clad in an urban grey color, this limited-edition series of pistols has a set of high suppressor sights equipped with tritium lamps front and rear. Extended capacity magazines are used wherever possible, boosting capacities on all but the SP-01 by 2 rounds. This gives the P-09 an impressive 21+1!

CAL: 9mm Luger FINISH: Nitride/Urban Grey polymer

### MODEL VARIANTS:

- CZ 75 P-10 C Urban Grey Suppressor-Ready — 17+1 capacity
- CZ 75 SP-01 Tactical Urban Grey Suppressor-Ready — 18+1 capacity
- CZ 75 B Ω Urban Grey Suppressor-Ready — 18+1 capacity, swappable safety/decocker
- CZ 75 P-01 Ω Urban Grey Suppressor-Ready — 16+1 capacity, swappable safety/decocker
- CZ P-09 Urban Grey Suppressor-Ready — 21+1 capacity
- CZ P-07 Urban Grey Suppressor-Ready — 17+1 capacity

# FULL-SIZE 75/85

## TIMELESS DESIGN, SUPERB PERFORMANCE

On October 12th, 2007, we built the 1 millionth CZ 75 – a testament to its popularity worldwide. Designed in 1975, the CZ 75 was one of the first “Wonder Nines” – 9mm pistols that combined high capacity with a double-action trigger system. With a signature slide-in-frame design, an entire family of pistols has been developed around the CZ 75 design, including compacts, decockers, single-action-only, ambidextrous, alloy frames and even competition pistols.

Following a steady rise in popularity within USPSA, results from the 2014 Production Nationals showed that CZ pistols are now used by more competitors than any other brand of pistol. Ergonomics, shootability and reliability of the 75 platform leave the other production pistols wanting.

### CZ 75 PLATFORM COMMON FEATURES

- High-capacity double-stack magazine
- Hammer-forged barrel
- Ergonomic grip and controls
- Unparalleled accuracy
- Slide-in-frame design for better recoil control
- 3-dot sighting system (tritium night sights available)
- Extended service life due to advanced design and superior materials
- Firing-pin-block safety (on most models)

✓ = CALIFORNIA DOJ APPROVED 

### CZ 75 B Ω CONVERTIBLE

A further evolution of the 75 B Ω (Omega), the new Convertible version allows users to swap from decocker to safety operation in the same manner as our popular P-07/P-09 pistols. Using the same simplified, more robust variation of the 75's trigger system as the previous Omega, trigger parts use an interlocking design that allows for easy disassembly and reassembly without the need for tools. Not only does this simplify maintenance, the trigger parts themselves are made of different materials to enhance durability, operation life and reliability.

CAL: 9mm Luger FINISH: Black Polycoat

#### MODEL VARIANTS:

- CZ 75 B 9mm Luger – Classic CZ 75 trigger system ✓
- CZ 75 B 40 S&W – Ambidextrous safety and full-length slide rails ✓
- CZ 75 BD 9mm Luger – Decocking lever ✓

### CZ 75 B MATTE STAINLESS

The CZ 75 B Stainless is the first stainless steel firearm to bear the CZ name. With the exception of an ambidextrous manual safety and rubber grips, the stainless version is functionally identical to the CZ 75 B. The biggest difference is an improvement in corrosion resistance, though many will argue there is an improvement in appearance as well.

CAL: 9mm Luger FINISH: Matte stainless

#### MODEL VARIANT:

- CZ 75 B High Polish Stainless

### CZ KADET II ADAPTER

The CZ 75 Kadet conversion kit is a separate accessory for the CZ 75/85 pistol series allowing the firing of 22 LR-caliber cartridges.

The CZ 75 fitted with the Kadet 22 LR conversion is the perfect training or plinking pistol, with the slide weighted and balanced just like the CZ 75. Like its centerfire counterpart, the CZ 75 Kadet is an all-steel model complete with adjustable sights.

Included are two 10-round magazines that fit flush with the grips of the full-size CZ 75 and SP-01 models. The Kadet conversion kit will work on the CZ 75 compact models including the P-01, P-06 and PCR, but the full-size magazines will extend below the bottom of the compact grips of these models. The Kadet conversion will not work on the 97, 75 TS or any polymer models. The P-01, PCR, P-06 and steel Compact in 40 use a specific slide stop. On 85s, the Kadet slide stop will not work; the factory 85 stop must be used, which won't allow for last-round hold-open.

CAL: 22 LR MAGAZINE CAPACITY: 10 rounds

# FULL-SIZE SP-01

## CZ 75 SP-01 ✓

A stand-out as one of the most popular pistols in our extensive lineup of CZ 75 variants, the SP-01 has a reputation for shootability and reliability. Originally designed as a military and law enforcement duty sidearm, its exceptional accuracy and handling characteristics have found it a home in the world of competitive shooting. For that reason, SP-01s and SP-01 Shadows (see page 33) have risen to become the gun of choice for competitors at USPSA Production Nationals.

With an integral Picatinny-style rail on the dustcover, rubber grip panels and a set of tritium night sights, the SP-01 is equally adept as a home defense firearm as it is clanging steel on a range. CZ's two-stage finish of a hardy phosphate base and the corrosion-resistant black Polycoat outer layer are built to withstand the rigors of military use, meaning holster wear and rough treatment may leave it scuffed but otherwise unaffected.

Borrowing from the improved grip geometry of the compact P-01, the SP-01 utilizes an extended beavertail to protect the shooter's strong hand as well as allowing for a deeper and more secure grip. The grip geometry, checkering in key areas on the front- and backstraps, and redistribution of mass provided by the accessory rail, noticeably decrease the perceived recoil from standard 75 models and allow for more rapid target acquisition and transition.

CAL: 9mm Luger FINISH: Black Polycoat

### MODEL VARIANT:

- CZ 75 SP-01 Tactical — Ambidextrous decocking levers

## CZ 75 SP-01 PHANTOM

The sidearm of the Czech military, the Phantom is back by popular demand. Essentially a polymer-framed SP-01 Tactical and using the classic CZ 75 trigger system, this popular variant was re-released in 2017 with an updated polymer, now sharing the same fiber-reinforced formula used in the P-09 and P-07.

With interchangeable backstraps and mag compatibility with the standard 75 platform, the SP-01 Phantom has long been a favorite in the CZ community.

CAL: 9mm Luger FINISH: Black Polycoat

# FULL-SIZE 45 ACP

## CZ 97 B

The CZ 97 B is the big-bore brother to the CZ 75 B — the first CZ pistol produced in 45 ACP. It is operationally identical to the 75 B (SA/DA, firing pin block safety and magazine brake). Features include a screw-in barrel bushing, loaded-chamber indicator and a double-stack magazine holding 10 rounds. The thin aluminum scales slim the grip down to make it comfortable for even those with smaller hands, and the fiber optic front sight and two-dot rear make it great at the range.

CAL: 45 ACP FINISH: Black Polycoat

A special version of the 97 B is specifically made for the California market, so check with your local CZ-USA Authorized Dealer for availability. SKU of this pistol is 01401.

## CZ 97 BD

Just as the standard 75 has a decocker variant, so does the 97. For those who prefer the heavy double-action first pull, the BD model adds a manual decocker to help drop the hammer to half-cock.

The 97 BD shares many of the features of the B model, including its hardy black Polycoat finish and thin aluminum checkered grips. Besides the decocker, the BD also adds a set of 3-dot tritium night sights.

CAL: 45 ACP FINISH: Black Polycoat

# COMPACT

## CZ 75 COMPACT ✓

At 5" tall with a barrel length of just under 4", the compact model shaves a little more than 3/4" off the length and about 1/2" off the height of the full-size CZ 75. This reduced size allows it to readily disappear under regular clothing, while the steel frame still makes it comfortable to shoot for extended sessions at the range. Equipped with a manual safety, it is able to be carried cocked and locked, or manually decocked for a DA first pull and SA thereafter.

CAL: 9mm Luger FINISH: Black Plycoat

## CZ 75 P-01 Ω CONVERTIBLE

Incorporating our swappable Ω (Omega) trigger system, the P-01 Ω can be converted from decocker to safety operation with minimal tools. Using the same simplified, more robust variation of the 75's trigger system as previous Omega models, trigger parts use an interlocking design that allows for easy disassembly and reassembly without the need for tools. Not only does this simplify maintenance, the trigger parts themselves are made of different materials to enhance durability, operation life and reliability.

The P-01 platform was designed for LE and military duty, but its compact size and the reduced weight due to the forged alloy frame made it ideal for discreet carry as well. Its aircraft aluminum 7075 frame sheds weight, while the dust cover-mounted rail allows a user to add a light or laser.

CAL: 9mm Luger FINISH: Black Polycoat

### MODEL VARIANT:

- CZ 75 P-01 — 9mm Luger, decocker only, standard 75 trigger system ✓

## CZ 75 D PCR ✓

Thanks to its forged 7075 aluminum frame, the PCR weighs a full 1/4 pound lighter than the 75 Compact, making it more comfortable for everyday carry. Equipped with a decocking lever, it is designed to be decocked before holstering. After decocking, the trigger safety is much like that of a double-action revolver. While there is no need to flip a safety lever off, the relatively longer and heavier trigger pull for the first round requires a conscious decision to pull the trigger before firing. Other additions to the PCR include rubber grip panels, serrated front- and backstraps for improved handling, low-drag sights and a loaded-chamber indicator.

CAL: 9mm Luger FINISH: Black Polycoat

# SUB-COMPACT

## CZ 2075 RAMI B ✓

With a 3" barrel and an unloaded weight of less than 26 ounces, the black polycoat, alloy-framed RAMI is ideal for concealed carry.

Based on the proven CZ 75 line of pistols, the RAMI is double action/single action, allowing it to be carried in different conditions depending on the shooter's preferences.

Incorporating the CZ double-stack magazine design, the little RAMI ships with a 10-round flush-mount magazine and 14-round extended magazine. A low-capacity-compliant version of the 9mm is available with two 10-round magazines.

CAL: 9mm Luger FINISH: Black Polycoat

### MODEL VARIANT:

- CZ 2075 RAMI BD — decocking lever instead of safety

**NEW**

### CZ SHADOW 2 BLACK & BLUE

In recent years, the SP-01 Shadow has taken the competition circuit by storm. In USPSA Production Division, CZ pistols are now used by twice as many top-level competitors than any other maker.

Given that popularity, it was high time to up the ante. Starting from scratch, CZUB engineers took the best features of the original Shadow and improved upon them. More than two years later, the Shadow 2 emerged, bearing the fruits of their efforts.

With a higher beavertail and undercut trigger guard, the shooter's hand is able to be as close to the bore axis as possible. With a contoured slide, the majority of the reciprocating mass is contained below the bore, equating to less muzzle flip. Increased weight at the dust cover/rail also helps keep the muzzle down.

The Shadow 2's swappable mag release has an adjustable, extended button with three settings to allow shooters to set it in the spot most comfortable for them. Also included in the box is an extended ambidextrous safety set and a number of buffers for use with lighter springs and/or hotter rounds.

Best of all, new trigger components give smooth DA and crisp, clean SA while drastically reducing trigger reset.

A hardy nitride finish coats the entire pistol, leaving it nearly impervious to corrosion, with an additional layer of our proprietary black Polycoat on the frame. Thin blue aluminum grips have healthy checkering to match the fine front- and backstrap checkering of the pistol itself. Sitting atop the slide are a set of target sights — fiber optic on front and a serrated, black HAJO rear (click adjustable for elevation, drift adjustable for windage).

**CAL:** 9mm Luger **FINISH:** Black Polycoat/nitride, blue grips

**MODEL VARIANT:**

- CZ Shadow 2 Urban Grey — Nitrided, coated in Urban Grey Polycoat, black aluminum grips.

**NEW**

### CZ SHADOW 2 KADET KIT

Affording Shadow 2 owners a cheaper plinking option, the Shadow 2 Kadet converts the 9mm Shadow 2 over to a blow-back 22 LR, allowing shooters to use their competition belts, mag holders and any frame-mounted modifications or accessories. Ships with two 10-round magazines.

**CAL:** 22 LR **FINISH:** Black anodized

**MODEL VARIANT:**

- CZ SP-01 Kadet Kit — Shorter slide to fit SP-01 models

### CZ 75 TACTICAL SPORT ORANGE

Turning the Tactical Sport up a notch, the Orange borrows a number of design features from the Czechmate and incorporates a few of its own. With the slimmer trigger guard, revised grip geometry and finer checkering from the Czechmate frame, it adds a thumb stop and fully adjustable target sights.

With the same long slide and full-length dust cover as the standard TS, it also shares the single-action-only trigger, giving it an incredibly light pull and short reset, making it a joy to shoot at the range and deadly in competition.

**CAL:** 9mm Luger **FINISH:** Black Polycoat, orange grips/mag bases

**MODEL VARIANT:**

- CZ 75 Tactical Sport Orange 40 S&W

**CZ CZECHMATE**

Getting a refresh for 2017, the Czechmate is an out-of-the-box Open gun. Now featuring the same fine checkering as the TS Orange, the Czechmate is equipped with a C-MORE® red dot sight and four-port compensator and is built to run major power factor ammunition. More than just a one-trick pony, the comp and brake can be easily swapped over to a Limited division setup.

To make the transition to Limited division, a spare barrel is included along with a front sight adapter to replace the compensator and a rear sight to replace the slide racker handle. A big stick 26-round magazine and three 20-round magazines are included in the CZ hardcase.

**CAL:** 9mm Luger **FINISH:** Black Polycoat

Extras included:

The Czechmate can be configured with compensator and red dot for Open Division or with iron sights for Limited.

**CZ 75 TACTICAL SPORT** ✓

Introduced in 2005, the CZ 75 Tactical Sport is a competition-ready pistol designed for IPSC standard division (USPSA® limited division). The weight and balance of the CZ 75 TS are optimized for the rapid yet accurate shooting necessary for success in practical shooting disciplines. An evolution of the proven CZ 75 Standard IPSC, the TS retains all of the best features of its predecessor and brings increased durability, new sights, a new trigger system and more.

The TS features a full-length dustcover, a 5.4" barrel (0.7" longer than the CZ 75 B) as well as a slightly larger grip to accommodate the higher-capacity heavy-duty magazine. Other features include a fixed rear sight, ambidextrous safety, extended magazine release, SA trigger, checkered front and rear strap, and a gaping magazine well for fast magazine changes.

**CAL:** 9mm Luger **FINISH:** Dual tone (silver Polycoat frame/blue slide)

**MODEL VARIANT:**

- CZ 75 Tactical Sport 40 S&W ✓

**CZ 75 B SA** ✓

Built around the standard 75 platform, the 75 B SA leaves the factory ready to compete. With a single-action-only trigger system, pull is light and crisp out of the box. Oversized ambidextrous safeties and a reversible mag release allows entry for left- or right-handed shooters.

Shipping with two 16-round magazines, it uses the standard CZ 75 magazine, meaning it can use SP-01 18+1 mags and extended capacity 26-round mags if desired.

**CAL:** 9mm Luger **FINISH:** Black Polycoat

When it comes to tuned competition CZs, there's no one who builds more of them each year than Angus Hobdell, owner of CZ Custom. Angus has been building pistols for us for the better part of a decade, with his shop becoming the de facto CZ-USA custom pistol shop. Each year we partner with him to build a handful of models that combine the best parts available to meet the varying needs and budgets of competitive shooters. Check out CZ Custom at [czcustom.com](http://czcustom.com).

**NEW**

### CZ ACCUSHADOW 2

Leave it to CZ Custom to take the Shadow 2 to the next level! To anchor the muzzle in the slide, their new ¼ turn 1911-style AccuBushing makes the pistol capable of sub-3" groups at 50 yards. A custom hammer further lightens and smooths the DA and SA pulls, while the reset is shortened with a hand-fit disconnect. Whether you're after outstanding accuracy, an edge in competition or just plain fun — the AccuShadow 2 can deliver!

**CAL:** 9mm Luger **FINISH:** Black Polycoat

### CZ 75 SP-01 SHADOW TARGET II

The Target II is a competition-ready pre-B-style SP-01 Shadow, featuring a CZ Custom trigger job with a short-reset trigger, fully adjustable rear sight, fiber optic front sight, stainless steel guide rod, lighter springs for competition (11-pound recoil and 13-pound main), extended magazine release and checkered aluminum grips. It was created by champion shooter Angus Hobdell's CZ Custom Shop to have trigger pulls of 3 to 4 pounds in SA and 7.5 to 8.5 pounds in DA.

**CAL:** 9mm Luger **FINISH:** Black Polycoat

### CZ 75 COMPACT SDP

Starting with the lightweight P-01, Angus's crew installs a competition hammer modified to work with the decocker, polishes and smooths the firing pin block, and tunes the trigger to 3.5 to 4 pounds in SA and 8.5 to 9 pounds in DA. Riding atop the slide are tritium sights with a low-mount in the rear for a snag-free profile. Custom interior parts like a solid firing pin stop, solid trigger pin, extended firing pin and a stainless steel guide rod complete the package.

**CAL:** 9mm Luger **FINISH:** Black Polycoat

*Dan Wesson*  
DAN WESSON FIREARMS

## FEATURES

- Hand-fit 70-series frame and slide
- Forged slides and barrels
- Hand-fit match barrels
- Billet alloy steel fire-control system
- Zero MIM parts
- All premium components
- Lowered and flared ejection port
- Beveled magazine well
- Carry bevel treatment
- Undercut triggerguards
- Hand-polished flats
- Crisp 3.5- to 5-pound factory trigger
- Two magazines
- Signature-series case
- Barrel bushing wrench
- Cable lock and manual

In 1968, Dan Wesson struck off on his own to manufacture fine firearms that deviated from the standard. Fifty years later, the company he founded is still going strong and still building unique products. Though there are many manufacturers of 1911s, not many combine custom-level fitting, top-shelf parts and clean, elegant lines like Dan Wesson — let alone at such an attainable price.

We produce only a few thousand handguns a year, using the best components and finishes the industry has to offer. We painstakingly hand-fit and polish each and every part, creating the best possible production 1911. Even a custom pistol maker would be hard-pressed to build a gun that would outperform ours straight out of the box. No matter the model, from our entry-level Vigil series to the long-slide Bruin, we are proud to provide our customers the best bang for the buck in the industry.

All our pistols share the same match-grade components, but specific features vary by model. We invite you to find another production 1911 in our price range that gives you everything Dan Wesson has to offer.

## DW 50TH ANNIVERSARY LIMITED EDITION

Half a century of manufacturing fine firearms is no small feat, and we're proud to commemorate the occasion with a very special Dan Wesson 1911. Understated class was the theme of the build, with tasteful engraving on slide and frame, slide rollmark delete and a high-polish nitride finish to resemble a quality deep blue.

G10 grips have the look of ivory and are inlaid with DW logo medallions while the grip safety and recoil spring plug are engraved and gold-inlaid with "DW" and "50th", respectively. The round-topped slide is fitted with a brass bead front sight, making this one of the classiest Dan Wessons made to date.

CAL: 45 ACP FINISH: High polish nitride

**NEW**

**DW VIGIL SUPPRESSOR-READY**

A more affordable entry into the Dan Wesson lineup, the Vigil series pistols are all built around a forged aluminum frame with a stainless slide. The round-top slide wears a tritium sight on the front and a serrated tactical rear. The frontstrap is checkered 25 LPI, as is the rear that also features a rounded butt for comfortable carry.

This Suppressor-Ready variant is Government-size with an extended, threaded barrel and high sights with a tritium front.

**CAL:** 9mm Luger, 45 ACP **FINISH:** Black Duty finish

**MODEL VARIANT:**

- DW Vigil — Standard non-threaded Match barrel and standard-height sights **NEW**

**NEW**

**DW VIGIL COMMANDER**

With the same features as the Government-size Vigil, this shorter Commander drops some weight due to its shorter barrel and slide, making it a mid-sized pistol that remains incredibly shootable while being easier to carry on-body all day.

**CAL:** 9mm Luger, 45 ACP **FINISH:** Black Duty finish

**NEW**

**DW VIGIL CCO**

Rounding out the Vigil series, the CCO variant combines a sub-compact Officer frame with a compact Commander slide and barrel. Ideal for concealed carry, it is light as can be while retaining the sight radius of a Commander model, making it very shootable.

Like all of the Vigil pistols, the Vigil CCO wears a set of cocobolo Shadow grips, a forged aluminum frame with 25 LPI frontstrap checkering and a round-top slide with a tactical sight in the rear and a tritium night sight in the front.

**CAL:** 9mm Luger, 45 ACP **FINISH:** Black Duty finish

**DW BRUIN**

With more folks than ever choosing to hunt with a handgun and the continuing resurgence of the 10mm cartridge, we decided it was time to bring the heat. Our first long-slide 1911, the Bruin was born to hunt. The long slide means a long sight radius and the 6" barrel within allows full-power 10mm loads as much time as possible to use their powder charge. Fully adjustable tritium sights ensure that when shooting hours arrive, you'll be able to see the sights. Not only that, but we're using a tritium/fiber-optic combo front sight to make sure the front glows day or night.

**CAL:** 10mm **FINISH:** Two-tone black/bronze Duty finish

**MODEL VARIANT:**

- DW Bruin Black — 10mm or 45 ACP, black Duty finish, red/black G10 grips

**NEW**

## DW WRAITH

Anyone who's been paying attention to the development of the CZ and Dan Wesson lines in recent years will have noticed a trend — many more Suppressor-Ready pistols. The Wraith is a threaded Government-size 1911 available in 45 ACP, 10mm or 9mm and wears a distressed version of our Duty finish. A stainless pistol underneath this mottled exterior, any parts that aren't distressed are blacked out.

Some grippy stippled G10 grips are cut short to accommodate a magwell, and the slide wears an abbreviated set of forward serrations and a set of high night sights.

**CAL:** 9mm Luger, 10mm Auto, 45 ACP **FINISH:** Distressed Duty finish

**NEW**

## DW A2 PARKERIZED (LIMITED PRODUCTION)

Introduced last year to rave reviews, the A2 is our vision of what the 3rd generation of military 1911 could have looked like. New for 2018 is a Parkerized version, even further standing as a testament to the most-copied pistol design in history.

A lowered and flared ejection port, modern combat sights, tactical beavertail and an extended thumb safety as well as a hint of undercutting to the trigger guard make this one combat-ready pistol.

Starting with a forged steel frame and slide, the A2 is built using top-shelf parts, with each component being hand-fit. Parts are blended by hand, then it is bead-blasted and finished in either the shown Parkerization or a matte blue.

Double diamond walnut grips give it a classic look while the stainless steel match barrel and tight slide-to-frame fit ensure that it's no slouch in the accuracy department.

**CAL:** 45 ACP **FINISH:** Parkerized

- DW A2 — Matte blue finish
- DW A2 Commander — Matte blue finish, Commander-length slide/barrel

## DW VALOR COMMANDER BLACK

The Valor series features a forged frame with 25-LPI checkering front and back, an undercut trigger guard, tactical night sights, VZ® slim-line G10 grips, as well as our tool-steel fire controls and other premium small parts. Every piece that goes into a Valor is hand fit, polished and blended to provide you with not only the best-functioning gun we can provide but also the best looking.

Available in both Government and Commander sizes, Valors can be finished in a matte glass bead stainless or our super-durable black Duty finish over stainless.

**CAL:** 9mm Luger, 45 ACP **FINISH:** Black Duty finish

### MODEL VARIANTS:

- DW Valor Commander — Matte stainless finish, black G10 grips
- DW Valor — Matte stainless steel, black G10 grips, available in 9mm, 10mm or 45
- DW Valor Black — Black Duty finish over stainless, black/gray G10 grips, available in 9mm, 10mm or 45

## DW V-BOB

A 4.25" bobtailed Commander version of the Valor, the V-Bob contains all the same attention to detail in a smaller package. With a Commander-length slide, shorter dustcover and flush mag base, it makes an excellent firearm for concealed carry.

**CAL:** 9mm Luger, 45 ACP **FINISH:** Matte stainless steel

### MODEL VARIANT:

- DW V-Bob Black — Black Duty finish, black/gray G10 grips

**DW DISCRETION**

With suppressors becoming more and more mainstream, the Discretion's match-grade stainless barrel is extended and threaded to make it a ready host. Its aggressively-ported slide helps make up for the added weight of a can out front, while its serrated trigger and competition-inspired hammer give it a look all its own.

High tritium sights allow for sighting over the top of most pistol suppressors, with a rear designed so that the slide can be racked on a belt if using the pistol one-handed.

**CAL:** 9mm Luger, 45 ACP **FINISH:** Black Duty finish

**DW DISCRETION COMMANDER**

This shorter, Commander-length version of the Discretion might actually be a better suppressor host than its 5" big brother. By reducing slide and barrel length, weight is removed from the muzzle end, meaning once your suppressor of choice is attached, it's much less muzzle-heavy than its Government-sized counterpart.

**CAL:** 9mm Luger, 45 ACP **FINISH:** Black Duty finish

**DW SPECIALIST DISTRESSED**

When police departments approached us to build a more reliable, durable 1911 to replace what they had been carrying, we developed a model just for them. Additions that made it ideal for law enforcement also made it perfect for home defense, so we gladly offered it for sale to the public.

The frame sports an integral 1913 Picatinny rail, 25-LPI frontstrap checkering, undercut triggerguard and recessed slide stop to enable the installation of laser grips. Equipped with an ambidextrous thumb safety, extended magazine release and magwell, the Specialist is operator-friendly. It is finished off with a set of G10 grips that guide the hand into the beavertail and hold it there. The Specialist ships with two 8-round magazines with bump pads and is available in either a matte stainless finish or our black Duty finish, which makes for an especially hardy pistol that scoffs at everyday wear and tear.

The forged stainless steel slide wears our popular Clark-style serrated rib with a single amber tritium dot in the rear sight and a green lamp with white target ring in front.

**CAL:** 9mm, 45 ACP **FINISH:** Distressed Duty finish over stainless steel

**MODEL VARIANTS:**

- DW **Specialist** — 9mm or 45 ACP, full-size frame and slide, matte stainless finish
- DW **Specialist Black** — 9mm or 45 ACP, black Duty finish

**DW SPECIALIST COMMANDER**

A more compact version of the Specialist, this Commander variant carries all the same features but with a shorter slide and 4.25" barrel.

**CAL:** 9mm, 45 ACP **FINISH:** Matte stainless steel

**MODEL VARIANTS:**

- DW **Specialist Commander Black** — 9mm or 45 ACP, black Duty finish
- DW **Specialist Commander Distressed** — 45 ACP, distressed Duty finish, black grips

## DW POINTMAN NINE (PM-9)

The Pointman series has been offered in limited quantities in the past, and demand always outpaces production capacity. Featuring our serrated rib on top of the forged slide, it has an adjustable target sight in the rear, a fiber optic sight in the front, and front and rear cocking serrations. The frame is forged stainless with an undercut trigger guard and 25-LPI frontstrap checkering. The flats are polished to a soft brushed finish, and the rounds are sandblasted for a nice contrast. Double-diamond cocobolo grips finish it off. With the lower cost of 9mm ammunition and mild recoil, this is the perfect model for getting acquainted with the 1911. Holding 9+1 rounds, the PM-9 shines both at the range and in competition.

**CAL:** 9mm Luger **FINISH:** Brushed/bead-blasted stainless steel

### MODEL VARIANTS:

- DW Pointman 38 (PM-38) 38 Super
- DW Pointman 45 (PM-45) 45 ACP **NEW**
- DW Pointman Seven (PM-7) 45 ACP, standard front sight, bead-blasted frontstrap (California legal) ✓

*Now available in 45 ACP  
and 38 Super!*

## DW POINTMAN CARRY (PM-C)

A fully stainless take on the CCO concept (Commander-length slide with an Officer frame), the Pointman Carry is easily concealed while being incredibly comfortable to shoot. With features closely mirroring the full-size Pointman Nine, its reduced grip length makes it disappear under even thin cover garments and its stainless frame helps soak up recoil.

Besides its size, a few key differences set it apart from the full-size Pointman series. Lack of forward serrations and a fixed combat rear sight help make it better in its role as an every-day CCW.

**CAL:** 9mm Luger, 38 Super, 45 ACP **FINISH:** Brushed/bead blasted stainless steel

## DW RAZORBACK RZ-10

Our Razorback has always been our most popular 10mm platform. The RZ-10 is a 5" 1911 and features the serrated target rib machined on the top of the slide with fixed defensive sights. We fit a match-grade, ramped barrel for use of the most popular 10mm loads and smoother feeding. The slide is mated to our standard forged frame with undercut trigger guard and smooth frontstrap. On both the frame and the slide, we polish the flats to a soft brushed finish and sandblast the rounds. The gun is finished off with a nice set of double diamond cocobolo grips. Chambered in the powerful 10mm cartridge, the RZ-10 is a very versatile 1911 package suitable for defensive use, target shooting and handgun hunting of medium-sized game up to deer or wild boar.

**CAL:** 10mm **FINISH:** Brushed/bead-blasted stainless steel

## DW HERITAGE RZ-45

The Heritage is our entry-level 1911, allowing shooters to experience Dan Wesson quality at the most affordable price possible. Even though this model is our most economical, it features all the same quality components that we use in our 1911 models. A Government-size model, it has a 5" barrel and is chambered in 45 ACP. The slide features our serrated rib and wears a tritium front sight and plain black, snag-free rear. The sides of the slide have a nice brushed polish on the flats, while the rounds are sandblasted to match the matte forged frame with undercut trigger guard and smooth frontstrap. Grips are rubber Double Diamonds by Hogue®. The Heritage is a great introduction to the Dan Wesson 1911 experience, and we are confident it will become an heirloom, handed down from generation to generation.

**CAL:** 45 ACP **FINISH:** Brushed/bead-blasted stainless steel

## DW COMMANDER CLASSIC BOBTAIL

Produced only in small numbers in recent years, a resurgence in demand means we brought the Commander Classic Bobtail back into regular production. One of the few California-legal models in our 1911 line, it has a loyal and growing following in the Golden State. With stainless steel slide and frame, its flats are brushed and rounds are bead blasted. With snag-free tritium sights and a bobbed mainspring housing, it's an excellent candidate for concealed carry.

CAL: 45 ACP FINISH: Brushed/bead-blasted stainless steel

## DW GUARDIAN

We've had many requests to produce a Commander-sized 1911 in 9mm. In response, we've revived one of the early Dan Wesson 1911 models with a twist . . . We have combined the best features from two of our most popular models, the Bobtail Commander and the CCO. The new Guardian has an anodized aluminum bobtail frame and an aluminum mainspring housing to help reduce printing when carrying concealed and make it comfortable enough for full-time carry. The black Duty-finished, Commander-length slide and alloy frame give it just the right feel and balance. If you are looking for a lightweight, Commander-size 1911 in 9mm, 38 Super or 45 ACP, don't pass up the Guardian.

CAL: 9mm Luger, 38 Super, 45 ACP FINISH: Black Duty finish/black anodized

## DW ECO

We wanted to give our customers the smallest, lightest gun we could without sacrificing accuracy, dependability and stopping power. Enter the ECO — a single-stack, Officer-size 1911 that weighs only 25 ounces. For years, the Officer model has been criticized for its reliability. We have conquered that by using the latest technology and doing what others say can't be done. The recoil system is unique for this style of 1911, using a solid, one-piece guide rod and a flat recoil spring that is rated for 15,000 rounds in 45 ACP — 15,000 rounds! — not 500 like most 1911 dual recoil systems are rated for. With longevity unheard of in a production 1911, it also gives the benefit of a smooth slide for easier operation and less felt recoil.

The lightweight 3.5" slide is topped with tritium night sights with our tactical rear, which allows for easy one-handed racking. The ECO barrel is a flush-cut, ramped bull barrel with a target crown rather than the traditional barrel bushing setup, allowing it to be more compact and easier to disassemble.

The frame is anodized aluminum and features an undercut trigger guard and 25-LPI checkering. The mainspring housing is also aluminum with 25-LPI checkering and a rounded bottom corner for concealability and shooting comfort. The enhanced grip safety and slim-line G10 grips really plant the pistol in your hand, allowing for faster follow-up shots and better recoil control. Just like the Guardian, the ECO's slide and small parts receive the Duty finish, and it's available in both 9mm and 45 ACP.

We set out to conquer the Officer model and did just that. The ECO is compact, extremely lightweight and raises the bar for reliability. Pick up an ECO — you won't be disappointed.

CAL: 45 ACP FINISH: Black Duty finish/OD green anodized

### MODEL VARIANT:

- DW ECO — black frame, black/white G10 grips, 9mm or 45 ACP

## DW 715 PISTOL PACK (LIMITED PRODUCTION)

The 715 is as it was before — designed and built to be the most accurate, rugged and versatile revolver on the market. Famous for its swappable barrels, 2016 saw the revival of the Pistol Pack. Shipped with 4", 6" and 8" barrel/shroud assemblies in the modern heavy vent shroud profile, the weight of which tames the recoil of the 357 Magnum very well.

Like its famous predecessors, barrel assemblies and grips are easily swapped by the shooter, and the 715 accepts grips and barrel/shroud assemblies from 15-2 model and newer revolvers. The tensioned barrel of the DW interchangeable barrel system enhances accuracy, pulling the barrel tight like a guitar string, enabling it to vibrate at the same frequency every time.

The forward crane latch, located in front of the cylinder and paired with a rear ball detent, helps to ensure proper cylinder/barrel alignment during firing. While the tensioned barrel definitely improves accuracy over other revolvers, it's that consistent cylinder/barrel alignment that contributes most to the accuracy of the design. Additionally, the clockwise-rotating cylinder reduces stress on the crane, since it turns in the same direction the crane locks, prolonging service life and keeping everything tight. The 715's frame is robust, built to handle the heaviest of factory loads.

Each Pistol Pack is shipped in a custom Dan Wesson hardcase with compartments for the additional barrel assemblies and a factory-supplied barrel wrench kit.

CAL: 357 Magnum/38 Special FINISH: Brushed stainless steel

### MODEL VARIANT:

- DW 715 — 6" barrel only

# DAN WESSON ELITE SERIES

The Elite Series of 1911s are designed to meet and exceed the expectations of the most demanding competitive and combat shooters. Each model in the Elite line was purpose-built knowing the demands that are placed on these handguns. Every part and component was carefully chosen based on supreme quality and thorough testing. Each is meticulously hand fit, followed by a rigorous function and reliability regimen. What you get are handguns of unparalleled accuracy, rugged reliability and flawless functionality.

## DW FURY

Equipped with a Trijicon RMR and with an extended, threaded barrel, this double-stack beast is begging to be unleashed on paper and steel. Chambered in 9mm or 10mm, capacities are 18+1 and 14+1, respectively. With the absolutely crisp, super-short-reset Elite Series trigger job, can you handle the Fury?

**CAL:** 9mm Luger, 10mm Auto **FINISH:** Matte black

## DW TITAN

Turning the most well-known defensive pistol in the world into a true combat handgun was no easy task. Melding caliber and capacity, the Titan is chambered in the monstrous 10mm cartridge, delivering more foot-pounds of energy than a 45 ACP and packing 14 rounds in the magazine, putting to rest the capacity debate. Sight configuration was imperative — the Titan has rugged HD night sights that are moved forward and recessed deep into the slide, yielding target accuracy and extreme durability. Securing the pistol to your hand are custom G10 grips, 25-LPI checkering and snake-scale serrations on the slide, keeping the Titan planted in the harshest of conditions. The combination of its all-steel frame, bull barrel and tactical rail gives the Titan balance and durability, resulting in the most formidable target-grade combat handgun on the market.

**CAL:** 10mm Auto **FINISH:** Matte black

## DW CHAOS

This double-stack 9mm is for competitors who don't have to worry about a power factor requirement such as in 3-Gun. Built to tackle the rigors of the sport, the Chaos has 21+1 rounds on tap. Like all of our Elite Series Dan Wessons, it is hand-built on a double-stack 1911 frame and tuned to perfection. With high capacity, a superbly crisp trigger and flawless reliability, the Chaos truly does reign supreme.

**CAL:** 9mm Luger **FINISH:** Matte black

## DW MAYHEM

Built for the Limited IPSC/USPSA® division as well as anyone looking for a superbly accurate target-grade 1911, the Mayhem is ready to shake things up. Built on our high-capacity steel 1911 frame, we've shaved weight where you don't want it and added it where you do. The 6" bull barrel and tactical rail add static "good weight." The 6"-long slide gives an edge on sight radius and pointability but is lightened to equal the weight of a 5". The result speaks volumes, with a gun that balances and feels like a Government-size model but points and shoots like a long-slide. The all-steel frame and industry-leading parts deliver the most well-balanced, softest-shooting 6" Limited gun on the market.

**CAL:** 40 S&W **FINISH:** Matte black

## DW HAVOC

The Havoc is designed to be the most well-balanced, softest-shooting Open gun on the market. Built on an all-steel, high-capacity version of the 1911 frame, it is fitted with industry-leading parts including a barrel and compensator that combine the highest level of accuracy with the most effective compensation available. The C-MORE® red dot allows for extremely fast target acquisition with its ultra-low mounting configuration. The Havoc is a handgun made for shooters by shooters, ready to dominate Open IPSC/USPSA® division.

**CAL:** 9mm Luger, 38 Super **FINISH:** Matte black

*Limited Availability — The Dan Wesson Elite series typically sells out in the first few months of the year. Lead times of 6 months can be expected on these limited-production models.*

# CZ RIMFIRE

## CZ 455

The CZ 455 sets a new standard for affordable rimfire bolt guns. Drawing from a long lineage of Czech rifles, the 455 uses the same cold-hammer-forged barrels that enables CZ to dominate competitions across the nation. The 455 platform uses an interchangeable barrel system, where a user can swap from one chambering to another quickly and easily. Additionally, actions can be swapped into any 455 stock without modifications. This means a 455 FS in 22 WMR can be converted into a Varmint Precision Trainer in 22 LR with the addition of a stock and a barrel kit. Five minutes and the included tools are all it takes to do the swap. It's the ultimate modular bolt-action rimfire platform.

### CZ 455 FEATURES

- Action fully machined from bar stock
- Trigger adjustable for weight of pull
- Cold-hammer-forged barrel
- Detachable magazine
- Standard 11mm dovetail milled into receiver
- Interchangeable barrels
- Interchangeable stocks

scope not included

suppressor not included

### CZ 455 AMERICAN SYNTHETIC SUPPRESSOR-READY

Perfect for quiet plinking, the 455 American Suppressor-Ready has a 16.5" barrel that is threaded at the factory to fit muzzle devices and suppressors with 1/2x28 threads. Its black synthetic stock has a soft-touch finish and is patterned in the American style with a high, flat comb intended for use with a scope.

CAL: 22 LR STOCK/FINISH: Synthetic/blue

#### MODEL VARIANTS:

- CZ 455 American Synthetic — 20.5" sporter barrel, 22 LR
- CZ 455 American Walnut — Turkish walnut stock, 20.5" sporter barrel, 22 LR, 17 HMR and 22 WMR

### CZ 455 AMERICAN STAINLESS SYNTHETIC

Our first stainless rimfire, the 455 American Stainless is meant to be a hardy, long-lived rifle that can be passed down through the generations. With the same swappable barrel system as all of our 455 rifles, both barrel and action are finished in a matte bead blast. Barrel length is 20.5", and the bolt and bolt handle are finished in a hardy black nitride.

CAL: 22 LR, 17 HMR and 22 WMR STOCK/FINISH: Synthetic/stainless

### CZ 455 AMERICAN COMBO (SWITCH BARREL SET)

The 455 American is also available in a money-saving set that includes barrels in both 22 LR and 17 HMR as well as the tools, parts and magazines to convert the rifle back and forth between the two calibers.

CAL: 22 LR and 17 HMR STOCK/FINISH: Walnut/blue

Additional barrel kits for the 455 are available in our webstore at [shop.cz-usa.com](http://shop.cz-usa.com).

## CZ 455 VARMINT

Our heavy-barreled version of the 455, the Varmint has a .866" cylindrical barrel. Not only does the heavy barrel make for good harmonics, it also allows the Varmint to perform well with a wide variety of rimfire loads, translating into an accurate platform for shooting targets or getting game. The Turkish walnut stock has an American-style comb for use with a scope and a wide, flat forend that rides a sandbag well.

CAL: 22 LR, 17 HMR, 22 WMR STOCK/FINISH: Walnut/blue

## CZ 455 VARMINT PRECISION TRAINER

The 455 Precision Trainer was designed to provide the same look and feel as a full-size tactical rifle while allowing for more economical training. Though the golden days of cheap and plentiful 22 LR ammo may be behind us, the Precision Trainer has become more popular than we could have imagined. Its Manners Composite T4 stock provides a rock-solid platform and is finished in a three-color camouflage pattern. The stock itself has multiple layers of carbon fiber and fiberglass hand-laid in high-temperature epoxy resins, then placed in a vacuum and heat-cured to create the perfect resin-to-fabric ratio. Combined with the 455 Varmint's 20.5" long, .866" cylindrical heavy barrel, it makes the Precision Trainer a surgical paper-puncher.

CAL: 22 LR STOCK/FINISH: Camo composite/blue

### MODEL VARIANTS:

- CZ 455 Varmint Precision Trainer Suppressor-Ready — 24" tapered varmint barrel, 1/2x28
- CZ 455 Varmint Precision Trainer Suppressor-Ready — 16.5" varmint barrel, 1/2x28

## CZ 455 VARMINT TACTICOOOL SUPPRESSOR-READY

One of our most popular 455 Varmint models, the Tacticool has a heavy, 16.5" barrel threaded 1/2x28 for use with a suppressor or other muzzle device. Riding in a black-painted laminate stock, it incorporates features found on much more expensive stocks without pushing the price of the rifle through the roof. The short barrel gives plenty of time for the cartridge to get a full burn while increasing the rigidity of the barrel, resulting in a rifle that drives tacks. Quietly.

CAL: 22 LR STOCK/FINISH: Black painted laminate/blue

## CZ 455 VARMINT EVOLUTION®

The Evolution® stock has proven very popular on our 455 Varmint platform. Though the bolt is on the right-hand side, the stock design is fully ambidextrous including the cheekpiece, teardrop pistol grip and palm swell. The extreme free float provided by the Evolution® stock design ensures that there's no chance of stock-to-barrel contact, resulting in excellent harmonics. The 455 Varmint action along with the Evolution® stock will accept any of the accessory barrels available for the 455 platform including the American and Lux (open sights) as well as other varmint-weight barrels in any available caliber. A 5-round magazine is included.

CAL: 22 LR, 17 HMR STOCK/FINISH: Coyote laminate/blue

## CZ 455 FS

With a timeless Mannlicher-style, full-length Turkish walnut stock, the 455 FS has a following all of its own. With iron sights and a European-style comb to match, it's built for shooting with iron sights. Using the same barrel sets as the Lux, it can be swapped between 22 LR, 22 WMR and 17 HMR in just minutes. Extra barrel sets sold in our webstore come with everything required — including tools.

CAL: 22 LR, 22 WMR, 17 HMR STOCK/FINISH: Walnut/blue

## CZ 455 LUX

The 455 Lux has a Turkish walnut stock and open sights that are adjustable for windage and elevation. Like all 455s, it has an 11mm dovetail for mounting optics and can be quickly and easily swapped to a different chambering with the addition of a second barrel set (sold in our webstore). One 5-round magazine is included.

CAL: 22 LR, 22 WMR STOCK/FINISH: Walnut/blue

## CZ 452 GRAND FINALE

Produced in limited quantity, the 452 Grand Finale is a last hurrah to the venerable CZ 452. Built using the last 452 actions ever produced, on the original manual barrelling equipment and at the Brno workshop, the Grand Finale is embellished with hand-engraved scrollwork on the action, barrel, bottom metal and included 1" scope rings. The upgraded American walnut is trimmed with an ebony forend and grip cap, and the bolt is jewelled.

With a deep glossy blue finish to the metal and an oil finish to the wood, we felt this was a fitting farewell to a fan favorite.

CAL: 22 LR STOCK/FINISH: Walnut with ebony/engraved glossy blue

## CZ 455 ULTRA LUX

Our longest-barreled rimfire, the Ultra Lux sports a 28.6" barrel, giving it an impressive advantage when it comes to sight radius. Following in the footsteps of its predecessor, the 452 Ultra Lux, the 455 version has the same tangent rear sight, beechwood stock with cheekpiece and 10-round mag. Just like all 455s, it has the ability to swap barrels and stocks. The largest draw of the Ultra Lux has always been its incredibly long sight radius, which makes it easy to be accurate when using its crisp iron sights.

CAL: 22 LR STOCK/FINISH: Beechwood/blue

## CZ 455 TRAINING RIFLE

Famous for its use in rimfire competition, the 455 Training Rifle shares all the same popular features of its 452 predecessor — the same 24.8" barrel, tangent rear sight (adjustable for distance) and beechwood stock with Schnabel forend.

Between the long sight radius and the crisp iron sights, it's no wonder the Training Rifle has become a favorite in open-sight Rimfire Sporter competition.

The biggest difference is the ability to swap the barrel and/or stock, traits that all our 455s possess. An ideal rifle for introducing youth to the shooting sports, the Training Rifle is shipped with a 5-round magazine, but single-shot adapters and 10-round magazines are available.

CAL: 22 LR, 17 HMR STOCK/FINISH: Beechwood/blue

## CZ 455 SCOUT

Built to be an ideal first gun for young shooters, the Scout has a short 12" length of pull. With simple leaf rear sight and blade front (rear adjustable for windage, front for elevation), learning the basics of sight picture has never been easier, and 11mm dovetails on the receiver make adding a scope a breeze.

Own a suppressor? The 455 Scout has a muzzle that's threaded 1/2x28, allowing for hearing-safe shooting without the need for muffs or plugs.

Now that the Scout has transitioned to our 455 line, adding a larger stock is easier than ever. The entire 455 platform is modular, meaning swapping different barrels/chamberings or stocks is done quickly and easily with only a few tools.

Shipped with a single-shot adapter to teach ammo conservation, any of the 455's magazines will fit, from 5 to 25 rounds.

CAL: 22 LR STOCK/FINISH: Beechwood/blue

scope not included

## CZ 452 AMERICAN LEFT-HAND

(LIMITED PRODUCTION)

Though most models of the 452 have transitioned to the 455 platform, the left-hand version of the American is one that continues to be made on the 452 action. CZ 452 barrels are traditionally mounted and threaded into the action, so they don't have the 455's ability to swap to different chamberings.

CAL: 22 LR, 17 HMR STOCK/FINISH: Walnut/blue

## CZ 512 AMERICAN

Set up for optics, the 512 American has a Turkish walnut stock with laser-cut checkering. The unique semi-auto's action comprises an aluminum-alloy upper receiver, which secures the barrel and bolt assembly, and a fiberglass-reinforced polymer lower half that houses the trigger mechanism and the magazine well. The modular design is easily maintained, requiring only a coin as a tool for fieldstripping. Sharing magazines and scope rings with the CZ 455, the 512 makes the perfect companion to your bolt-action CZ rifle.

CAL: 22 LR, 22 WMR STOCK/FINISH: Turkish walnut/blue

## CZ 512 CARBINE

Built to be a compact, handy rifle, the 512 Carbine shines as a utility rifle on a farm or ranch. With a short 16.5" barrel threaded 1/2x28 and a hardy beechwood stock, it's ideal for dispatching predators and varmints. Its iron sights are superb, with a tangent rear adjustable for distance and a fiber optic front for great visibility. Chambered in 22 LR, it ships with an extended 10-round magazine.

CAL: 22 LR STOCK/FINISH: Black dyed beechwood/blue

## CZ 512 TACTICAL

Built as a tactical trainer, the 512 Tactical is dropped into an aluminum chassis with 6-position adjustable stock. A monolithic Picatinny rail makes mounting optics a cinch. With extended magazine capacities, the 22 WMR version holds 10 rounds while the 22 LR holds 25. Its short 16.5" barrel is threaded for a suppressor.

CAL: 22 LR, 22 WMR STOCK/FINISH: Polymer and aluminum/blue

## CZ 512 STANDARD

The standard iron-sighted version of the CZ 512, this model is the one that gave birth to all the other variants in the 512 line. One of the only affordable and reliable semi-auto 22 WMR rifles on the market, it has built a reputation as a tack-driver owing to its cold-hammer-forged barrel and crisp fully-adjustable iron sights.

CAL: 22 LR, 22 WMR STOCK/FINISH: Beechwood/blue

# CZ 527

## CZ 527

The smallest of our centerfire platforms, the CZ 527 has proven popular the world over. In Europe, it has won more awards in the “light rifle” category than any other rifle. Ever.

Designed specifically for small-base centerfire calibers, it is a true micro-length Mauser action. With controlled-round feed, a detachable single-stack magazine, a cold-hammer-forged barrel, integral 16mm dovetails and our renowned single set trigger, many people think it’s the ultimate small-caliber platform.

With such a small action, even longer-barreled Varmint models seem short and quick-handling. Whether you need a varmint chambering such as 17 Hornet or 204 Ruger, want to shoot deer or antelope with 6.5 Grendel or need to plink with steel-cased ammo in 223 Rem. or 7.62x39, we’ve got a 527 for the job.

1” and 30mm rings available at [shop.cz-usa.com](http://shop.cz-usa.com)

### CZ 527 FEATURES

- True micro-length Mauser-style action
- Controlled-round feed
- Hammer-forged barrel
- Single set trigger
- Detachable magazine
- 16mm scope dovetails milled into the receiver
- Left-hand versions available in select calibers
- Because they are built to CIP spec, all CZ 223s are built to fire 5.56 ammunition. CIP spec doesn’t differentiate between the two.

scope not included

### CZ 527 AMERICAN

The CZ 527 American features a classic American pattern stock, a sporter-weight hammer-forged barrel, a single set trigger and a recessed target crown. Made to be used with optics, all 527 Americans ship with a set of our stout 1” steel scope rings.

A recent addition to the many chamberings available is the increasingly popular (and for good reason!) 6.5 Grendel. A 24” barrel allows you to extract as much velocity as possible out of the potent little round, and accuracy comes courtesy of CZ’s cold-hammer-forged and lapped barrel.

Since 2015, all CZs in 223 Rem. ship with a 1:9” twist barrel for most bullets up to 70 grains.

CAL: 17 Hornet, 22 Hornet, 222 Rem., 223 Rem., 204 Ruger, 6.5 Grendel, 7.62x39 STOCK/FINISH: Walnut/blue

#### MODEL VARIANT:

- CZ 527 American Left-Hand — 223 Rem.

scope not included

suppressor not included

### CZ 527 AMERICAN SYNTHETIC SUPPRESSOR-READY

Threaded 5/8x24 for a suppressor, this short, handy 527 is equally happy shooting steel or taking down hogs. Chambered in 300 Blackout or 7.62x39, it’s got enough knock-down power for most medium game at shorter ranges, and with subsonic loads available for both chamberings, plinking can be quiet as can be!

CAL: 300 Blackout, 7.62x39 STOCK/FINISH: Synthetic/blue

#### MODEL VARIANT:

- CZ 527 American Synthetic — 223 Rem., 21.9” barrel, no muzzle threads

### CZ 527 VARMINT

The Varmint retains all of the features that made the 527 famous, from its controlled-round feed and claw extractor to its single set trigger and heavy cold-hammer-forged barrel. Scope mounts are milled directly into the top of the forged, square bridge receiver (rings not included), and the rifle comes with a 5-round detachable box magazine.

CAL: 17 Hornet, 204 Ruger, 223 Rem. STOCK/FINISH: Turkish walnut/matte blue

## CZ 527 CARBINE

The Carbine is an intermediate-range “brush gun.” Weighing in at less than 6 pounds, this handy rifle has a straight-comb walnut stock and open sights. Our most popular model chambered in 7.62x39, it combines low recoil with effectiveness on medium-sized game such as deer and wild boar, making it ideal for beginning hunters. Both chamberings offered in the Carbine are economical to shoot given their service-rifle heritage and the availability of surplus ammunition.

Built to CIP specifications, our 7.62x39 chambers are ideal for shooting steel-cased surplus ammo. Designed to shoot .311 bullets, some American brass ammo may not perform as well as the imported steel-cased variety because of SAAMI brass dimensions and varying bullet diameters.

**CAL:** 223 Rem., 7.62x39 **STOCK/FINISH:** Walnut/blue

## CZ 527 YOUTH CARBINE

Our incredibly popular 527 Carbine now has a youth variant. Though the action and barrel stay the same, the Turkish walnut stock has been shrunk in nearly every dimension. With a 12.75” length of pull, smaller pistol grip with tighter radius and thinner forend, the Youth Carbine makes an ideal first deer rifle. Chambered in 223 and 7.62x39, both cartridges are more than capable of taking deer-sized game and deliver little felt recoil compared with many youth offerings on the market. Paired with our smooth micro-Mauser action and single set trigger, a standard Carbine stock can be added as the shooter grows, so its small size won’t relegate it to the back of the safe a few years down the road.

**CAL:** 223 Rem., 7.62x39 **STOCK/FINISH:** Walnut/blue

## CZ 527 FS

Brimming with style, the FS rides in a classy Mannlicher-style, full-length stock. Its European-style, hog-back stock is ideal for use with the crisp iron sights, though a scope can easily be affixed to the integral 16mm dovetails found on all 527s.

Between the classic lines, the single set trigger and the smooth micro-Mauser action, the 527 FS is a rifle to make your friends and family envious.

**CAL:** 223 Rem. **STOCK/FINISH:** Walnut/blue

# THE CZ SINGLE SET TRIGGER SYSTEM

A lifetime of hunting will expose you to a multitude of situations. You will be presented with fleeting opportunities that require a quick shot, and when hunting dangerous game you must be prepared for the life-or-death shot to stop a charge. On the other hand, most shots will give you the opportunity to shoot from a more stable position such as a rest, shooting sticks or a practiced kneeling or prone position. The CZ single set trigger (SST) system provides the shooter with the options to effectively handle any shooting situation they are presented with.

The SST allows for both a standard hunting trigger and a light target trigger in the same rifle. By operating the rifle in the same manner as any other bolt action, the trigger is in the “standard” mode with the heavier of the two trigger pulls. By simply pushing the trigger forward until it “clicks,” the crisp and light target trigger mode is set. The standard trigger is adjustable for weight, creep and overtravel. The set trigger function is only adjustable for weight but always breaks like glass. Many shooters will tell you that the single set trigger is a better aid to accuracy than a \$1,000 scope.

- A:** Standard trigger pull weight
- B:** Creep
- C:** Overtravel
- D:** Set trigger pull weight

## CZ SST “Perfect Pull” Trigger Adjustment

**DISCLAIMER:** Do not attempt trigger adjustments unless you are confident in your ability to follow instructions for adjustments and safe operation.

Tools required: 6mm wrench, 7mm wrench, one very small and one large common flathead screwdriver

- Make sure the magazine and chamber are empty.
- Remove the stock from the barreled action.
- Cock the rifle, then adjust screw “B” in until it fires and back off ¼ turn.
- Loosen locking nut, and remove screw “C” to allow easy access to screw “A.”
- Adjust screw “A” to desired poundage, and tighten the lock nut (ensuring that the screw position does not change).
- Replace screw “C,” turn it all the way in, then back it out while pulling the trigger until it fires. Then back out an additional ¼ turn and tighten the lock nut for screw “C” (ensuring that the screw position does not change).

## Set Trigger Adjustment and Operation

To adjust the set trigger weight, adjust screw “D” in to lighten and out to make heavier. If you prefer to completely disable the set function, turn screw “D” all the way in until the rifle fires, then back off ¼ turn.

This process will get you very close to the best trigger pull possible with only slight adjustments needed, if any, to get it to the “Perfect Pull” for you.

An activated set trigger is very sensitive to shock and during handling could unintentionally discharge if the set trigger is adjusted with too little travel. The safety of the SST adjustment can be checked with the rifle unloaded by repeated opening and closing of the bolt combined with moving of the safety to its “ON” and “OFF” positions in both set and unset modes. If the set trigger adjustment (engagement screw “D”) is too light, it will go off when doing this. In this case, add more travel to the set trigger adjustment until it does not simultaneously go off.

For safety, activate the set trigger only after the rifle is loaded and when in position for the shot with the safety in the off position. Do not carry your rifle with an activated set trigger! If you have activated the set trigger and you do not immediately take the shot, keep your firearm pointed in a safe direction and activate the safety, then squeeze the trigger to deactivate the set feature.

## CZ 527 LUX

The CZ 527 Lux has won more awards in the light rifle category in Europe than any other rifle — ever! Fitted with a Turkish walnut stock in the famous Bavarian pattern, the Lux is ideal for open-sight shooting, and the hooded front sight allows for a glare-free, crisp sight picture. Ships with a 5-round single-stack magazine.

**CAL:** 22 Hornet, 223 Rem. **STOCK/FINISH:** Walnut/blue

## MODEL VARIANT:

- CZ 527 Lux Left-Hand — 223 Rem.

# CZ 557

## CZ 557

CZ's newest centerfire platform, the 557, is a departure from the Mauser-style bolt found on 550 models. Instead, it has a short extractor and plunger-style ejector for smooth operation and enhanced ejection. The short extractor or "push-feed" system also makes it easier to single load the rifle, which many shooters prefer for range work.

With a receiver machined from steel billet, it wears CZ's integral 19mm dovetails for mounting a scope. Equipped with a 2-position safety, the bolt can be cycled while the rifle is on "Safe." To top it off, it comes with a fully adjustable trigger that allows the owner to tune weight, creep and overtravel to their liking. Paired with CZ's legendary cold-hammer-forged, factory-lapped barrel, the resulting rifle is destined to become a treasured hunting companion.

### CZ 557 FEATURES

- Push-feed action
- Square bridge receiver
- Cold-hammer-forged barrel
- Barrel lapped for accuracy
- Integral 19mm scope bases
- Two-position safety
- Adjustable trigger

Arriving late 2018

scope not included

### CZ 557 AMERICAN

For shooters and hunters who crave velocity and knock-down power at range, the 557 American is happy to oblige. With a 26" version of our cold-hammer-forged and factory-lapped barrel and some go-fast medium-game chamberings, the American is built to tackle any game species on this continent. Its American-pattern stock has a strong pistol grip with a bit of a palm swell and is adorned with a classic checkering design borrowed from our Ultimate Hunting Rifle (UHR).

With a high comb and no sights, this rifle is intended for use with a scope, and built-in dovetails mean there are no bases required — allowing scopes to be mounted directly to the action and enabling a simpler, more robust attachment method.

CAL: 26 Nosler, 28 Nosler, 30 Nosler, 300 Win. Mag. STOCK/FINISH: Walnut/blue

### CZ 557 LEFT-HAND

CZ fans afflicted with wrong-handedness have long asked for a centerfire offering in the medium-game chamberings. Finally we have the answer in the form of the 557 Left-Hand and Left-Hand Short Action (see next page).

Built on the same CNCed action as the standard 557, the Left-Hand wears the handy, American-pattern stock of the Sporter but with a 24" barrel to help squeeze a bit more energy out of the 30-06 chambering. The cold-hammer-forged and factory-lapped barrel coupled to our tried-and-true 557 push-fed action mean this rifle will cut very respectable groups.

CAL: 30-06 STOCK/FINISH: Walnut/blue

1", 30mm and 34mm rings available at [shop.cz-usa.com](http://shop.cz-usa.com)

scope not included

### CZ 557 SPORTER SYNTHETIC

A compact version of the 557, the Sporter Synthetic is chambered in some of the most popular American cartridges — the 270 Win. and 30-06, as well as the ever-popular European staple, the 6.5x55 Swede. A good combination of weight and handling, the Sporter's short, stiff 20.5" barrel may sacrifice a few FPS to longer barrels, but the resulting harmonics make it a tack driver. Its shorter overall length makes it easy to carry slung over the shoulder or slipped into a pack. The pairing of the cold-hammer-forged barrel and stiff polymer stock make for repeatable accuracy.

CAL: 6.5x55, 270 Win., 30-06 STOCK/FINISH: Synthetic/blue

#### MODEL VARIANTS:

- CZ 557 Sporter — A more traditional American-pattern walnut stock finished in oil
- CZ 557 Sporter Manners — Fit in a lightweight, strong Manners carbon fiber composite stock

557 actions start out as a solid billet of steel — here are a few fresh out of the CNC.

# 557 CENTERFIRE

scope not included

## CZ 557 SPORTER SHORT ACTION

Built specifically to house 308-sized cartridges, the 557 Short Action features a detachable box magazine. With less overall action length, this variant of the 557 is more compact and a little lighter, making it ideal for hunting medium game. With the same CNCed billet action and our legendary cold-hammer-forged barrel, the 557 is a rifle that won't just last a lifetime, it'll get handed down for generations.

**CAL:** 243 Win., 308 Win. **STOCK/FINISH:** Turkish walnut/blue

**NEW**

## CZ 557 LEFT-HAND SHORT ACTION

Built on our 308-length action, this lefty-friendly bolt gun has the same detachable magazine and all the features of the 557 Sporter Short Action but with a longer 24" barrel to squeeze a few more FPS out of the 308 Win.

**CAL:** 308 Win. **STOCK/FINISH:** Turkish walnut/blue

scope not included

## CZ 557 VARMINT

Building on the incredibly precise 557 short action, the Varmint model adds a stout 25.6" barrel in a heavy profile that tapers to a .863" muzzle. Anchored in an ergonomic walnut stock, it has a healthy palm swell, laser-cut stippling and a flat forend. Matching the human form was the guiding principle in the stock's development, and the result is an incredibly comfortable rifle to lay behind, whether you're punching paper, ringing steel or knocking off prairie dogs at great distances.

**CAL:** 243 Win., 308 Win. **STOCK/FINISH:** Turkish walnut/blue

# 550 CENTERFIRE

Our classic Mauser-style rifle, the 550 operates on controlled-round feed. More involved than a push-feed action, as the cartridge feeds up out of the magazine, it is grasped firmly by the massive claw extractor of the bolt. Secured fast to the front of the bolt, the cartridge is inserted into the chamber and drawn back as the bolt is cycled, always controlled by the bolt face.

What this means for the shooter is that when the adrenaline is flowing, there's no opportunity to short-shuck the action, a situation where a push-feed would eject the spent shell but not pick up a fresh one. For this reason, controlled-round feed is the action of choice for Professional Hunters and those who need their rifle to function flawlessly when stress is high.

scope not included

## CZ 550 BADLANDS

Energy — and a lot of it — is a real asset when taking big game such as elk and bison at long distance. As a hunting round, the 338 Lapua delivers incredible energy at normal ranges, with more than enough to do the job at extended distances. At 800 yards, the 300-grain hunting load still carries over 2,000 foot-pounds of energy, more than enough for any North American game.

This long-range hunting rifle is anchored in an Aramid composite stock with a full-length aluminum bedding block. Threaded to the end of the premium 25" medium-weight barrel is a custom muzzlebrake that both tames the recoil and directs the blast forward.

Hunting from a distance where elevation adjustments are measured in minutes of angle or milliradians requires a good relationship between hunter and rifle, meaning time behind the trigger is a must. Our goal was to have a high-energy hunting rifle that wouldn't punish the shooter but still has what it takes to connect when the time comes. The confidence of knowing you own those "way out there" shots makes everything else just that much better.

**CAL:** 338 Lapua **STOCK/FINISH:** Aramid composite/blue

scope not included

## CZ 550 ULTIMATE HUNTING RIFLE

The CZ Ultimate Hunting Rifle (UHR) is a CZ 550-based rifle in 300 Winchester Magnum that comes in at 8 pounds and includes a minute-of-angle accuracy guarantee to 600 yards. By maintaining quality-control standards unheard of in the industry, the UHR delivers a level of accuracy formerly only available from high-end custom rifle gunsmiths.

The UHR allows the hunter to realize the full potential of its components. By guaranteeing that the rifle itself is very accurate, the only variables left in the system are the optics, ammo and ability of the hunter. Keeping in mind that the UHR is the foundation of a shooting system capable of extreme precision, a new scope-mounting system is included that matches the abilities of the rifle. Machined from a single piece of aluminum with rings for 30mm scope tubes, it provides solid and precise attachment. When combined with quality ammunition, optics and practice, the UHR can significantly extend a shooter's effective range.

**CAL:** 300 Win. Mag. **STOCK/FINISH:** Walnut/blue

RIFLES

RIFLES

Nearly the perfect companion to a big-bore safari rifle, the UHR will handle plains game large and small. Mind the mambas, though.

# CZ 550 MAGNUM

## CZ 550 SAFARI MAGNUM

Known worldwide as the Brno 602, the 550 Safari Magnum has long ruled the roost when it comes to magnum capacity. A classic go-to for African professional hunters, many 602s are still riding the rack after decades in the field. In the staple 375 H&H chambering, the 550 Magnum will hold one in the chamber and five in the mag, giving it more rounds on tap when dangerous game wants to get up-close and personal.

With the controlled-round feed of the Mauser system, there's no chance to short-shuck the action when under stress, meaning positive ejection and sure feeding when the chips are down. With several configurations to choose from, the 550 Safari Magnums offer good looks, great value and, most importantly, rock-solid reliability.

### CZ 550 MAGNUM FEATURES

- Mauser-style controlled-round-feed action
- Square bridge receiver
- Cold-hammer-forged barrel
- Barrel lapped for accuracy
- Integral 19mm scope bases
- Two-position safety
- Single set trigger

Predecessor to the 550 Magnum, the Brno 602 is an African staple. Here's one that's been riding the gun rack in the Kalahari for the last 30 years.

BRNO ARMS - CZECHOSLOVAKIA -

## CZ 550 SAFARI MAGNUM

Known worldwide as the Brno 602, the CZ 550 Safari Magnum is a true full-size magnum, not a smaller action blown out to barely hold the cartridge. The rifle of choice for most professional hunters in Africa, odds are that the rifle backing you up on a dangerous game hunt was made by CZ.

Features include 3-leaf express sights (1 standing, 2 folding), a hammer-forged barrel and a single set trigger. The stock is made from select Turkish walnut and has a classic safari shape. The controlled-round feed and fixed ejector make this rifle reliable enough for heavy and dangerous game, while the reasonable heft helps tame the recoil.

CAL: 375 H&H Mag., 458 Win. Mag., 416 Rigby STOCK/FINISH: Field-grade walnut/blue

## CZ 550 AMERICAN SAFARI MAGNUM FIELD GRADE

The American model retains the quality and reliability of the original CZ 550 Safari Magnum but is fitted into an American-pattern stock with a straight comb, making it ideal for use with optics. It still retains the back-up express sights in case the optic goes down or tight confines dictate the optic needs to be removed.

Available in Field and Fancy grades, as well as a Left-Hand Field Grade in 375.

Note: Order Warne Quick Detatch rings for proper fit on the LH model. Also, for those who want a left-handed ASM in a chambering other than 375, our rifle custom shop can oblige, email [info@cz-usa.com](mailto:info@cz-usa.com) or call (800) 955-4486 x338 for more details.

CAL: 375 H&H Mag., 458 Win. Mag., 416 Rigby, 458 Lott, 505 Gibbs STOCK/FINISH: Field-grade walnut/blue

## CZ 550 AMERICAN SAFARI MAGNUM ARAMID COMPOSITE

If you expect the going to get rough, this composite-stocked rifle is the way to go. With Aramid composite-reinforced fiberglass and a full-length aluminum bedding block, this is the ultimate in strength and stability. Designed and built to handle any condition imaginable from Alaska to Africa, it's as tough as you are.

CAL: 375 H&H Mag., 458 Win. Mag., 416 Rigby, 458 Lott STOCK/FINISH: Aramid composite/blue

# SAFARI CLASSICS®

## SAFARI CLASSICS

A stand-alone brand of hand-built safari guns, each Safari Classics rifle is built to order at our custom shop in Warsaw, Missouri. Beginning with our Czech-made 550 Magnum action, they feature the CZ single set trigger system tuned to customer specifications. A #1 Fancy Grade American Walnut stock is glass-bedded to the rifle's action and is fitted with dual crossbolts and a straight comb ideal for use with an optic. Back-up express sights come standard, with three heights of rear blade for varying distances. A barrel-band sling mount rounds out the standard feature set.

Customization can be had from mild to wild, with simple add-ons like bolt jewelry or ebony forend and grip caps to custom finishes or our legendary pop-up-peep — a sight that stows in the rear bridge of the receiver in the event that an optic kicks the bucket.

### SAFARI CLASSICS CUSTOM-GRADE RIFLES FEATURES

- CZ 550 Magnum action with two-position positive safety
- Single set trigger set up to your specifications
- Glossy-blue or matte-blue finish on metal parts
- No. 1 Fancy Grade walnut stock with straight comb and dual crossbolts
- Barrel band with sling attachment

### SAFARI CLASSICS MAGNUM EXPRESS RIFLE

The big-bore Magnum Express rifle is meant to house cartridges from 338 Lapua and 375 H&H on up to monsters like the 505 Gibbs and 550 Magnum. Intended for dangerous-game hunting, its straight comb is ideal for optics, with enough forgiveness to easily get down on the back-up express sights if circumstances require their use.

Rifles chambered in 505 Gibbs, 500 Jeffery and 550 Magnum include a mercury recoil reducer installed in the stock, which can also be added to other chamberings, if desired. Standard finish is either matte or gloss blue, though some customers opt for rust blue, satin blue or even a weather-resistant coating. For more information, contact the Safari Classics Custom Shop at [info@cz-usa.com](mailto:info@cz-usa.com) or at (800) 955-4486 x341.

All Safari Classics rifles are hand-built to order. Call 1-800-955-4486 x341 for options and pricing.

### SAFARI CLASSICS EXPRESS RIFLE

For the hunter who wants a plains-game rifle with the same feel and features as their dangerous-game rifle, the Express Rifle is designed for cartridges that fit in standard-length actions. Whether that means 270 or 9.3x62, we'll accommodate your chambering of choice. Clad in the same #1 Fancy Grade of stock, it can be built with any of the features of its larger-acted counterpart.

Available in (but not limited to) 425 Westley Richards, 416 Ruger, 416 Taylor, 375 Ruger, 9.3x62, 338 Win. Mag., 300 Win. Mag., 30-06 and 270 Win.

## Craig Boddington *Signature Series*

### Safari Classics Craig Boddington Signature Series 375 H&H

When Craig Boddington first went on safari in Africa, the Brno 602 (predecessor of the CZ 550 Safari Magnum) was already well-established among Africa's professional hunters (PH). Today, it is the most popular dangerous-game rifle with African PHs. Craig's experience with the CZ 550 Safari Magnum extends beyond his own hunts, including one instance where poachers were caught with a badly abused but still functional model shooting reloads stuffed with scavenged powder from AK47 rounds and recovered solids, hammered back to round-ish. The decision to put his name on the CZ 550 was an easy one.

His limited-edition Signature Series rifle starts out with a CZ 550 Magnum action chambered in 375 Holland & Holland. A few custom touches are included to make this rifle suit Craig's personal preferences. The barrel has been shortened slightly to 24", and an upgraded Safari Classics front sight and barrel band forward sling swivel stud have been installed on it. The stock has been redesigned for this series with input from Craig and fellow "Petersen's Hunting TV" host Kevin Steele. The new stock is more trim and

lively in the hand, with a thin wrist and a slimmer, shallower, shorter forend. The 13.5" length of pull is terminated by a red, 1" Decelerator® recoil pad fitted to the XX Claro walnut stock. (The pictured Field-grade stock was the only sample available at the time this catalog went to print.)

Limited-edition upgrades on the metalwork include a jeweled bolt and Craig's signature engraved on the floorplate as well as the "Craig Boddington Series" designation engraved just forward of the action on the top of the barrel.

Also included in the package are a few of Craig's favorite safari accessories: a canvas sling and cartridge slide from Trader Keith, and a leather-bound hunting journal to record the memories of the hunt.

This is a limited edition of 50 pieces, including 45 right-hand models and 5 left-hand models (though left-hands are sold out at this time).

CAL: 375 H&H STOCK/FINISH: XX Claro walnut/rust-blue finish

# PUMP ACTION

## CZ 612 FIELD

Simple, strong and smooth, the 612 Field is designed to shoot everything from targets to turkeys. With dual action bars and an aircraft alloy receiver, the Field wears a Turkish walnut stock with an oil finish that's easy to touch up through the years. Fitted with a 28" barrel with a brass bead, metalwork is a matte blue.

Chambered for 2¾ and 3" shells and supplied with three chokes, it's the hardest-working shotgun in our line.

## CZ 612 MAGNUM TURKEY

The 612 Magnum Turkey was created for the turkey woods and is finished in Realtree Xtra® Green. This pump gun comes equipped with two chokes, one extra-full to deliver maximum pellets to the kill zone and one modified for upland hunting and steel shot.

Available in 12 gauge with a 26" barrel, the Magnum Turkey is hydrodipped in Realtree Xtra® Green and will chamber 2¾, 3 and 3½" shells.

## CZ 612 MAGNUM WATERFOWL

Built for the goose blind, the 612 Magnum Waterfowl boasts the perfect waterfowl camo pattern combined with a 3½" chamber for magnum shotshells. This machine is the best tool for making big birds fall from the sky. The 612 Magnum Waterfowl ships with 5 extended black choke tubes.

Available in 12 gauge with a 28" barrel, the Magnum Waterfowl is hydrodipped in Realtree MAX-5® camo and will chamber 2¾, 3 and 3½" shells.

## CZ PUMP ACTION FEATURES

- Dual action bars for smooth cycling
- 4+1 capacity, 2¾ & 3" shells (2¾" only in 28 ga.)
- Barrel lengths: 26, 28 and 30"
- Chrome-lined bore from chamber to choke nest
- Interchangeable choke tubes
- Thick rubber recoil pad
- Turkish walnut stocks with neutral cast
- Shim kit to allow tuning of stock cast and drop

*Fitted with select-grade wood!*

## CZ 628 FIELD SELECT

For those who want a light, classy pump gun to carry in the field, we put together the perfect shotgun. Built on a gauge-specific 7075 aluminum action, this 28 gauge has a deep glossy blue finish and select-grade Turkish walnut. A set of interchangeable chokes lets you tune constriction, and the full forend and pistol grip help make this lithe shotgun feel good in the hands. With a 28" barrel, the 628 clocks in at just 5.4 pounds, lightening the load for those full days chasing birds. The 628 is chambered for 2¾" shells.

### MODEL VARIANT:

- CZ 620 **Field Select** — 20 gauge, 3" chamber

# SEMI-AUTO

## CZ 712 G2

The CZ 712 is our tried-and-true gas-operated semi-automatic that enabled CZ-USA's David Miller to set a new world record, breaking 3,653 clays in 1 hour. Built on a lightweight alloy receiver, it accepts 2¾ and 3" shells and is an all-rounder, a great choice for upland game, waterfowl or clays. The barrel on the 712 is chrome-lined and has a matte-black, hard-chrome exterior that will resist corrosion for many seasons in the field. Fit with a Turkish walnut stock, the G2 version adds new laser-engraved checkering, right-hand palm swell as well as a barrel lock ring to make assembly easier.

### MODEL VARIANT:

- CZ 720 G2 — 20 gauge, 26" barrel
- CZ 720 Reduced Length G2 — 20 gauge, 24" barrel, 13" length of pull

## CZ 712 GREEN G2

Adding a little color to the mix, this 712 has the same Guinness World Record-setting reliability as its black predecessor, but with a green anodized receiver. With the same laser-cut checkering, healthy palm swell and smooth gas operating system, it's sure to please at the range or in the field. With a capacity of 4+1 (and a plug to reduce that to 2+1), the 712 Green ships with 5 flush choke tubes and is chambered for 2¾ and 3" shells.

## CZ 712 UTILITY G2

The 712 Utility is exactly that — an all-purpose tool good for anything from home protection to pest control on the farm. Its small size makes it a very handy shotgun that is easy to stash, whether behind the truck seat or behind the closet door, allowing it to be there when you need it most. Chambered for 2¾ and 3" shells.

## CZ 712 SYNTHETIC CAMO G2

The CZ 712 Synthetic is a great tool for the person who needs a rugged, weather-proof shotgun. This hunting scattergun is built for the harshest conditions, dipped head to toe in Mossy Oak Shadow Grass Blades® camo with polymer stocks that will take a beating.

It's available in 12 gauge, chambered for 2¾ and 3" shells, 28" barrel and 3 extended choke tubes, one each for close, medium and long shots.

### MODEL VARIANT:

- CZ 712 Synthetic G2 — Black finish, 5 flush chokes

## CZ 712 ALS G2

The 712 ALS is outfitted with the fully adjustable ATI Akita stock. This nifty accessory allows users to change the length of pull with the push of a button. It also has three comb height positions with an easy screw adjustment. This makes the ALS perfect for women and kids as well as making it ideal for waterfowl and turkey hunting. Both the 26 and 28" barrel configurations accept 2¾ and 3" shells.

### MODEL VARIANT:

- CZ 720 ALS — 20 gauge, 24" barrel

## CZ 912

A great choice for the bird hunter or recreational clay shooter, the 912 is built on an alloy receiver and finished in a high-gloss black chrome. Though similar in many respects to the 712, the 912 houses its action spring in the buttstock, making cleaning the gas system even easier.

With modern stock lines and a ventilated butt pad to soak up recoil, the 912 will hold 4+1 in the mag tube and is designed to shoot everything from standard field loads all the way up to 3" magnum hunting loads.

### MODEL VARIANT:

- CZ 920 — 20 gauge, 28" barrel

The 712 and 912 were used to set a new Guinness World Record in 2015 — the "Most Sporting Clay Targets Broken in One Hour," breaking 3,653 targets. That's more than one target a second for an hour straight! Watch the video at [tinyurl.com/CZWorldRecord](http://tinyurl.com/CZWorldRecord).

## CZ SEMI-AUTO FEATURES

- Gas operated (712 & 912)
- 4+1 capacity, 2¾ & 3" shells
- Barrel lengths: 20, 24, 26, 28 and 30"
- Chrome-lined bores
- .730 bore on 12 gauge, .620 bore on 20 gauge
- 8mm-wide rib (10mm on 712 Target)
- Interchangeable choke tubes
- Rubber recoil pad with snag-free heel
- Polymer stocks are neutral cast
- Walnut stocks are cast-off

**CZ ALL-AMERICAN TRAP COMBO**  
(BOTH UNSINGLE WITH ADJUSTABLE RIB AND A STANDARD BARREL SET)

- 32" Unsingle with dial-adjustable aluminum rib (From 100% high to 50/50)
- 32" Doubles set with 50/50 raised rib
- All barrels are ported with lengthened forcing cones
- Loaded with adjustable features:
  - Length of pull (14<sup>5</sup>/<sub>8</sub> to 15<sup>1</sup>/<sub>2</sub>" )
  - Toe in/toe out
  - 4-way adjustable parallel comb
  - Trigger shoe reach (3/8" of adjustment)
- Extended, knurled chokes in a variety of constrictions:
  - (2 CYL, 2 IC, 1 LT MOD, 2 MOD, 1 IMP MOD, 2 FULL, 1 X-FULL)
- Premium internals, firing pins riding in bushings
- Built to be shot heavily for years, All-Americans feature drop-in locking blocks and replaceable hinge pins
- Mechanical trigger, manual safety
- Healthy right-hand palm swell, full forend
- Hardy silver-soldered ribs
- Tru-Oil® stock finish for easy touch-up

Built specifically for ATA shooters who compete in both trap singles and doubles and want one gun to do it all, the All-American Trap Combo is the tool for the game! This two-barrel set combo comes in a custom lockable aluminum case from Americase®.

**CZ SUPREME FIELD**

Whether you're a clayshooter or a hunter, nothing quite matches the feeling of shooting a bespoke shotgun. We do a number of custom, built-to-order shotguns each year, and for 2018 wanted to introduce a high-grade production gun that carries the flair of these customs but at a better price point.

With deep relief engravings cut by hand, the Supreme Field is fitted to a Grade III stock that shows off the grain structures that Turkish walnut is famous for. With our one-piece CNCed receiver, the Supreme Field is chambered in 12, 20 and 28 gauge, with automatic ejectors standard on all three.

Its full forend is sharply checkered, and a solid mid-rib both adds to the class and gives this 28"-barreled shotgun a smooth swing.

Shipped in a protective hard case with five interchangeable extended chokes.

**NEW**

All-American

Redhead Premier Target

Sctp Sterling

Sharp-Tail Target

## CZ ALL-AMERICAN

The sporting clays half of our Trap Combo, the All-American is a precision instrument. CNCed throughout, it features drop-in replacement parts (including locking blocks for those who shoot tens of thousands of rounds a year) as well as a bevy of adjustable features. A 4-way comb combined with adjustable butt plate hardware (cast, toe as well as length of pull) allow shooters to tune the gun to their specific dimensions and shooting style. Due to the lower bore axis of the bottom barrel, the All-American fires bottom barrel first, reducing recoil going into the second shot. Blacked out extended chokes (in a mid thread pattern), a blacked-out action and Select wood round out the package, culminating in a target shotgun that looks great and shoots even better!

## CZ REDHEAD PREMIER TARGET

The Redhead Premier Target is assembled like the standard Redhead Premier but with a different purpose in mind. This over/under has been designed to crush clay targets, plain and simple! It comes fitted with a special Monte Carlo stock that keeps the gun on your shoulder while keeping your head up to see the clays. Add to that a healthy right-hand palm swell, 30" barrels and a stepped rib designed for rising trap targets — it's the perfect choice for those wanting to own a true target gun at an affordable price. Shipped with a set of black extended and knurled choke tubes, the Redhead Target has laser-cut checkering and a 1-piece CNCed receiver.

## CZ Sctp STERLING

After several years spent homing in on the ideal shotgun for female shooters, a truth presented itself — those unique dimensions required to fit women with long necks and slender faces are nearly interchangeable with those needed to properly fit many youth shooters. As the product photo demonstrates, these dimensions create a stock that looks very different from most other shotguns, allowing these shooters to keep their heads up and eyes on target. A 4-way adjustable comb helps fine-tune the fit, and increased pitch makes it much more comfortable to shoulder (around 8").

This classy shotgun is built on the Upland Sterling receiver and is chambered in 12 gauge with 28" barrels. It handles both 2¾ and 3" shells.

### MODEL VARIANT:

- CZ Sctp Sterling Southpaw — Cast on for left-handed shooters

## CZ SHARP-TAIL TARGET

This new target side-by-side carries all of the mechanics as the Sharp-Tail but with a 30" barrel and a 14¾" length of pull. Originally designed to tackle side-by-side sporting clays events, it is a classy double gun that doesn't carry the accustomed weighty price tag. Equipped with a set of extended, knurled black choke tubes, it's the perfect choice for a clay shooter or gentleman hunter.

## CZ 712 TARGET G2

Equipped with a soft-recoiling gas piston system, the 712 Target is built for the trap field and is a perfect choice for the price-conscious shooter. It also makes a great starter gun for new shooters. This 30" 712 is equipped with a larger target-style stock that provides a comfortable fit. When combined with the soft-operating gas system, it makes recoil almost nonexistent.

## CZ 612 TARGET

One classy pump gun, the 612 Target is fitted with Select-grade wood in a glossy oil finish while the metalwork gets a deep polished blue. With a factory-tuned trigger system, raised rib and comfortable Monte Carlo stock, it's ready to kill some clays. An assortment of stock shims help users adjust drop and cast to achieve a better fit, and a set of extended chokes and a pair of Bradley-style white beads round out the package.

712 Target G2

612 Target

# OVER/UNDER

CZ-USA is proud to offer these beautifully hand-crafted shotguns — they are a wonderful combination of Old World craftsmanship and modern technology. Actions milled by CNC machines are hand-engraved and fit into their Turkish walnut stocks. The barrels are chrome-lined and 12, 20 and 28 gauges ship with a set of five interchangeable chokes. Affordable and reliable, these shotguns are happiest when in the field or busting clays.

## CZ DRAKE

There is no doubt in our minds that the Drake is the best bang for the buck in the over/under category. Built on our one-piece CNCed receiver, the Drake has a single selectable trigger, meaning you can choose whether to fire top barrel or bottom barrel first. With a simple, robust extractor to lift spent shells, the Drake sheds some weight with a mid-rib delete.

Laser-cut checkering sticks it in the hand, and for 2018 you can choose between 12, 20, 28 and .410 chamberings. With 28" barrels and five interchangeable chokes (except for .410, which has fixed IC/Mod barrels), the Drake ships in a protective plastic hard case.

### MODEL VARIANT:

- CZ Drake Southpaw — Cast on for left-handed shooters, 12 or 20 gauge **NEW**

*Now available 28 gauge and .410!*

## CZ UPLAND ULTRALIGHT GREEN

An over/under on a diet, we trimmed weight from the Upland Ultralight by building it on a CNCed alloy receiver, foregoing the mid-rib and hollowing out the buttstock. Though this doesn't necessarily make it the ideal choice for a day on the sporting clays course, it excels in the field — with the 20 gauge version clocking the scales at just 5.8 pounds!

To make things simple, a single extractor lifts shells to hand as the action is opened. Five interchangeable chokes, laser-cut checkering, a hard matte chrome finish and 28" barrels in 12 or 20 gauge round out the stats.

### MODEL VARIANT:

- CZ Upland Ultralight — black receiver, 12 gauge only, 26" or 28" barrels

## CZ SOUTHPAW STERLING

Cast on for left-handed shooters, the Southpaw Sterling shares most of the other features of the Upland Sterling except for a set of 30" barrels, making it just as happy breaking clays as it is chasing upland game. Operating with the clockwork precision that the Upland Sterling is known for, this gun comes with 5 flush-mount choke tubes, a mechanical trigger and safety with selectable barrels.

Available in 12 gauge with a 3" chamber, 30" barrels, ejectors, cast on stock 1/4 at the heel and 7/16 at the toe, with a regular right-handed top lever latch.

### MODEL VARIANT:

- CZ Upland Sterling — 12 gauge, cast off for right-handed shooters, 28" barrels

## CZ REDHEAD PREMIER

Adding a few more bells and whistles, the Redhead is a true all-purpose shotgun. Auto-ejectors propel spent shells from the bore, and a solid mid-rib gives this over/under a classy look and a more deliberate swing. Equally at home on the sporting clays course or in the field chasing roosters, its wrap-around checkering gives plenty of purchase.

Available in 12 and 20 gauges, the Redhead is fitted with 28" barrels with a classy white bead atop the rib. A single selectable trigger and 5 flush-mount chokes are included in its hard protective case.

### MODEL VARIANT:

- CZ Redhead Premier Reduced Length — 20 gauge with 24" barrels and 13" length of pull

## CZ SWAMP MAGNUM CAMO

If you ask Bruce Horrell, host of CZ-USA's Gun Dog TV, why he shoots 3 1/2" shells, he'll answer, "Because they don't make 4 inch." For the folks who want to dish out the heat on waterfowl, we've got the over/under to do it with. The only over/under in our line that has an automatic safety, it engages every time the action is opened, giving an added level of safety to the duck blind. Polymer stocks in either black or Realtree MAX-5® camo and with all metal work blacked out, these 3 1/2" chambered guns are ready to knock big birds from the sky.

### MODEL VARIANT:

- CZ Swamp Magnum Black — Black furniture

## CZ REAPER MAGNUM

With the same 3 1/2" chambers of the Swamp Magnum, the Reaper is built to slay turkeys! Offering what single-barrel turkey guns cannot, this magnum shotgun allows a hunter to equip two vastly different chokes, allowing the choice of short- or long-range constriction with the flip of the barrel selector switch.

Shorter 26" barrels make it more maneuverable in the woods or blind, while the top Picatinny-style rail makes adding an optic easy as can be. Polymer stocks clad in Realtree Xtra Green® help it blend in, and adding a sling is simplified with QD swivels front and back. The Reaper Magnum ships with five extended interchangeable chokes, including an extra full.

## CZ WINGSHOOTER ELITE

One of the classiest shotguns in its price range, the Wingshooter Elite has faux sideplates that are ornately hand-engraved, reminiscent of our custom-grade guns that cost much more. It carries all of the best features in our over/under line, with our one-piece CNCed receiver, single selectable trigger, solid mid-ribs, ejectors and a two-tone hard-chromed finish. Add to that laser-cut checkering, a pistol-grip stock and a white bead, and it's hard to find a more elegant shotgun for the money.

Available in 12 and 20 gauges with 3" chambers, selectable 28" barrels, Turkish walnut stocks, independent auto ejectors and 5 flush-mount choke tubes.

## CZ OVER/UNDER FEATURES

- Mechanical single selectable trigger
- Box lock frame design
- Coil-operated hammers
- 2 3/4, 3 & 3 1/2" chambers
- Chrome-lined bores
- Sharp laser-cut checkering (stippling on Sterling models)
- 5 interchangeable flush-mount chokes
- Detailed hand engraving

# SIDE-BY-SIDE

*Now available in 16 gauge!*

## CZ SHARP-TAIL

With a single selectable mechanical trigger and pistol grip, the Sharp-Tail is one of the sharpest-looking side-by-sides on the market. Built around a lithe one-piece CNCed receiver, the metalwork is finished in a beautiful color case-hardening. With independent floating firing pins, coil-spring-operated hammers and redesigned sears, the result is longer life and greater consistency.

Available in 12, 16, 20, 28 and .410 with 28" barrels, Turkish walnut stocks, and a robust single extractor. 12, 20 and 28 gauges ship with five interchangeable chokes, while 16 and .410 have fixed IC/Mod barrels.

**NEW**

## CZ SHARP-TAIL COACH

With the same lithe action of the Sharp-Tail as well as its single selectable trigger, the Sharp-Tail Coach is a more modern coach gun than our hammered version below. With a mechanical trigger, manual safety and single extractor, its 20" barrels are cylinder bore. It can be had in 12 or 20 gauge and will chamber 2¾ or 3" shells.

## CZ HAMMER CLASSIC

A modern incarnation of the fowling piece of old, the Hammer Classic has fully functional hammers and long 30" barrels. Built to handle modern loads, both hammer models have a true side-lock frame design and 3" chambers. Dual triggers and color case-hardening round out the look, and five flush interchangeable chokes lend modern functionality.

## CZ HAMMER COACH

The chopped-down version of the Hammer Classic, the Coach is popular with Cowboy Action shooters who want a period-correct firearm that can handle modern loads. With fully functional hammers and dual triggers, short 20" barrels, color case-hardening and cylinder bore barrels, the Hammer Coach will dish out birdshot, buckshot or slugs up to 3" in length — take your pick!

### SIDE-BY-SIDE FEATURES

- Mechanical selectable trigger, extractors
- Box lock frame design
- 2¾ & 3" chambers
- Chrome-lined bores
- Turkish walnut stock
- Cast off for the right-handed shooter
- Beautiful color case-hardened receivers
