MADE IN ITALY

**TEC-TWO
FOAMER**
2 liters

Gaskets in Fluorinated Hydrocarbon
Ideal with oils and mineral fats silicone based, animal and vegetable oils, aliphatic hydrocarbons, aromatic hydrocarbons, very good resistance to weather, ozone, oxygen and sunlight.

Gaskets in Ethylene-Propylene-Diene
Ideal with glycol-based hydraulic fluids and organic and inorganic acids, detergents, solutions of sodium and potassium, oxygenated solvents (ketones and esters), and atmospheric agents.

**Polypropylene
HEAD**

Fatal attack

TEC-TWO is a practical hand held pump equipped with a strong foam nozzle lance, a durable polypropylene head structure and with seals of FPM (VITON, fluorocarbon rubber) or EPDM (Ethylene-Propylene-Diene rubber). Thanks to the foam's excellent consistency, its use is recommended both in semi professional sectors or for domestic purposes and in any cleaning situation where foam is necessary to loosen stubborn dirt effortlessly.

△ Epoca recommends that you test the compatibility between the liquid products to be used and the components of the pump, including the types of gaskets.

To get perfect foam, it is recommended to fill the container half way. Foam is obtained when liquids contain foaming agents.

**TOP-TEC
FOAMER**
10 liters

Gaskets in Fluorinated Hydrocarbon
Ideal with oils and mineral fats silicone based, animal and vegetable oils, aliphatic hydrocarbons, aromatic hydrocarbons, very good resistance to weather, ozone, oxygen and sunlight.

Gaskets in Ethylene-Propylene-Diene
Ideal with glycol-based hydraulic fluids and organic and inorganic acids, detergents, solutions of sodium and potassium, oxygenated solvents (ketones and esters), and atmospheric agents.

Triumphant cleanliness

TOP-TEC is a large capacity pressure sprayer equipped with a strong foam nozzle lance with seals of FPM (Viton, fluorocarbon rubber) or EPDM (Ethylene-Propylene-Diene rubber) for professional use. TOP-TEC is equipped with standard lance plus lance extension in order to be fit for every cleaning solution. Its use is suggested when a long-lasting thick foam is required such as on large windows and truck tarpaulin cleaning or best on car washing. A constant spray enables the foam to stick to the surface for an extended time allowing the product to work efficiently.

△ Epoca recommends that you test the compatibility between the liquid products to be used and the components of the pump, including the types of gaskets.
For best performance and ideal foam fill the container half way. Foam is obtained when liquids contain foaming agents.
