

**MAG RUBBER**

“ Experience leads to excellence ... ”

#### MAG RUBBER PRESENTATION

Gökçek Kauçuk, which was established in 1968, has become one of the leading companies as manufacturer and supplier of industrial rubber, polyurethane, plastics, steel and aluminium products. On the other hand, MAG Rubber; the twin company of Gökçek Kauçuk, has adopted the mission of marketing and foreign trade. Main principles of these twin companies are quality, on-time delivery and competitive pricing.

From the establishment, the company evolved rapidly and today, has its own plant with approximately 10.000 sqm closed space and operates more than 140 employees. With its high technology equipments and high qualified engineer and technician team, MAG Rubber produces quality replacement parts for earthmoving machinery, impermeability materials, vibration absorbers, defense industry equipments, parts for medical devices and for automotive.

Besides, MAG Rubber even welcomes demands which are not under its standard production. The reason is simple; customer satisfaction is the main objective. Today, MAG Rubber exports its various range of products to 50 countries in 5 continents.

Your requests, as new business partners and friends will please us.

Best Regards,

Mahmut GÖKÇEK – Adem GÖKÇEK

MAG Rubber Ltd.
