ABOUT US

HPsystems
Hydraulic Power Systems

HPSYSTEM history has started with technology knowledge experience high level education since 1994 Regarding to our philosophy we have been taking care of customer satisfaction at first. So our customer are happy working with HPSYSTEMS. The result, seen in constant growth encouraged the firm to widen the product range by starting a new cylinder construction network in the early two thousands, following the creation of its own commercial company.

Today the firm has a standard series of single and double acting cylinders which a classification of normal and telescopic. In addition to plunger cylinders and double-acting cylinders with several stages; but above all it specialized in the manufacture of cylinders by specific customer request to design carried out in its own departments thanks to qualified personnel equipped with the very latest design instruments. We are focus on 8 main industry, HPS products have a wide and diverse field of application, which is wider still in consideration of tailor-made solutions designed and realized to meet specific requirements.

Our main focus are on 8 different industry and business regarding to our customer needs.

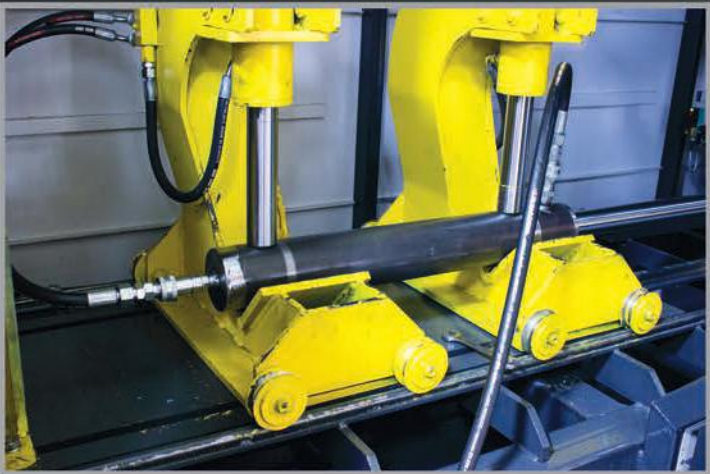

- 1-Space Vehicle Industry
- 2-Army and Defence Industry
- 3-Municipality Vehicles and Equipments Industry
- 4-Manlift and Forklift Industry
- 5-Platform and Crane Industry
- 6-Construction and Excavation Industry
- 7-Machinery Industry
- 8-Agriculture Industry

The firm has always availed machines with the very latest Technologies. And it is precisely thanks to the important developments and special attention to innovation that firm can guarantee top-quality product able to meet the needs of the most demanding customers. Our customer has an idea, then we design first and produce for their needs using high level technology with the result of good quality. As our firm principles, we make the test of each cylinder, record on computers, the result with their laser writings serial number on each pcs and print out each test result of cylinder and put the result in the package of cylinders.

After 25 years business experience, HPSYSTEM has opened last August 2017 a new production plant for a total 8000 sqm that permits to increase production of 50% HPSYSTEM family, looking to grow up the business.

CUSTOMER SATISFACTION

Quality, safety, comfort, long life are main topics for our products that are used in air space vehicles. Our single and double act telescopic cylinder and regular cylinder which are coated by special techniques, gives more qualified and long duration, safety usages for aircrafts, helicopters, ramp for missiles.

CYLINDER FOR ARMY AND DEFENSE

Hydraulic power systems

Efficiency, speed, worker safety, long life, reasonable costs are main reasons to the manufacturer of garbage trucks, sweepers, platforms. They prefer our standard and good quality products, are regular and telescopic cylinders with single and double act. Especially, garbage trucks, sweepers, fire trucks, road facility equipments, concrete mixers, forest trucks, gardening equipments are mainly buyers.

MUNICIPALITY SERVICE EQUIPMENT

Hydraulic power systems

Labor safety, power, easy to use, quality. Manlift is used to support worker safety, easy working, comfort usages. Regarding to customer needs, we design a specific cylinders, single and double act for their comforts. Forklift has been used to transport the goods with our high level quality cylinders, cold drawn seamless pipes, 25 micron chromated rods.

Our cylinders are preferred for manlift with electricity and fuel. Also same as for forklifts and reach trucks.

PLATFORMS AND CRANE INDUSTRY

HPsystems
Hydraulic Power Systems

PLATFORMS AND CRANE INDUSTRY

Hydraulic power systems

Heavy ,medium,light duty vehicles are our main target industry. Construction and excavation industry preferes longterm usage, power, quality, eciency, worker safety. They use commonly heavy duty single and double act cylinders that are designed with our professionalans.

Pipes are cold drawn seamles pipe,high quality rods and quali ed sealing gaskets. Especially truck mixers, bulldozers, dampers, compactors, excavators, concrete pumps,tower cranes, scrapers, crusher, cutter producer are our mostly thankful customers. Our customer thinks, we design by CAD technology and produce by CNC machinery with CAM technology.
