

JOSKIN

FOR
PROFESSIONALS *only*

Strength of experience

MULTI-ACTION
Trailing shoe

SOLODISC
Disk injector

TERRAFLEX
Arable injector - flexible tines

PENDITWIST
Where crops need it

Thousands of ideas in spreading !

Slurry spreading

Big capacity pumps

Easy to drive

Short tanker for
a better manoeuvrability

Wide range of rear implements

SIROKO
High quality for low capacity

TORNADO3
Designed for intensive works

Muck spreaders

Vertical beaters

Easy to drive

Fine and even pattern

From 9 to 24 tons

FERTI-SPACE
Multi-tasks

FERTI-SPACE TRIDEM
Large volume - wide body

Require regular and precise spreading !

Construction trailers

TRANS-KTP

TRANS-KTP TRIDEM

TRANSPORT PAYLOAD, NOT STEEL

The raw material quality is a key component for the conception of an agricultural machine. In the case of transportation equipment, it is even truer. JOSKIN wishes to offer solid and reliable, but not unnecessary heavy, machines. That is why JOSKIN uses very special steel. You will find hereunder a comparison table between JOSKIN steel and traditional steel.

	S235 or St 37-2 (Traditional steel)	S420 (High tensile steel) Trans-CAP	S550 (High tensile steel) Trans-SPACE	S690 (High tensile steel) Trans-SPACE	Hardox 400 Body bottom Trans-SPACE	Domex wear 400 Body bottom Trans-SPACE	Hardox 450 Trans-KTP
Tensile limit* (kg/mm ²)	23,5	42	55	69	100	102	120

* The tensile limit is the stress from which the steel starts to distort in an irreversible way

Easy to drive - well balanced

Transport

Excellent ratio weight/strength

Tapered body

Reliability/stability

From 5 to 27 tons

Ag-trailers

TRANS-SPACE TRIDEM

TRANS-CAP

JOSKIN

DRAKKAR

Multi purpose / non tip body

Quick safe and regular
unloading

All kinds of material

Limited unloaded weight
