Description

- SRA** slip resistance on ceramic substrate covered with sodium lauryl sulfate
- SRB** slip resistance on steel substrate covered with glycerol
- SRC** SRA + SRB
- CE** The CE standard satisfies the requirements of Directive 89/686 / EEC

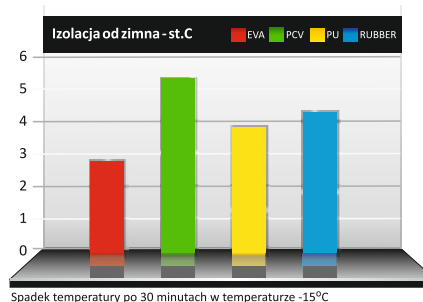

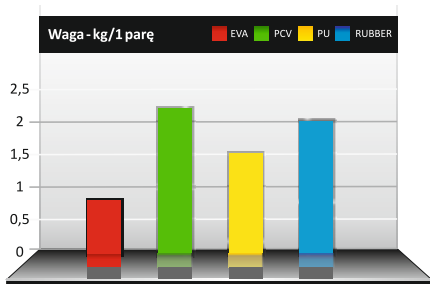

Additional requirements for special applications with appropriate marking symbols

- P** Penetration resistance
- A** Antistatic footwear
- CI** Cold insulation of sole complex
- E** Energy absorption of sole complex
- FO** Resistance of fuel oil

Explanation of the other symbols used in footwear descriptions

- Toe cap
- Inner socks
- Super light
- Waterproof
- Certificate CE
- Acid resistant
- Replaceble insert
- Anti slip sole
- Waterproof sole
- Removable inner socks

Material characteristic

Use of plastics for professional purposes

Material consisting of polyethylene and vinyl acetate, with the addition of appropriate additives and dyes, becomes a super lightweight material that is perfect for the production of flip and flip shoes. Used in the medical, pharmaceutical, medical and pharmacy industries and in the food and chemical industries. Ideally suited for use in hairdressing and beauty salons and in the hotel and catering industry.

Patented EVA and PU bonding technology. Used in agriculture, forestry, refrigeration and chemical. Footwear appreciated for its very high insulating and strength properties. The materials used in the product provide increased resistance to mechanical damage and proper microclimate of the foot.

PVC Polyvinyl chloride. The product is completely waterproof durable and easy to clean. Footwear made of PVC is dedicated, for the food, catering, agricultural, fishing and hunting industries as well as for the chemical and processing industries.

Polyurethane material most commonly used for the production of safety and professional footwear. Thanks to its high mechanical resistance, the boots are appreciated, in the mining industry, in community work or in sewage treatment plants. Footwear has a wide range in the construction industry as well as in the broadly understood forestry industry. Ideal for the hunting and fishing industry.

Other symbols used in the directory

Waterproof

Neopren fabric

Aluminium used in boots or liners

Sheep skin

Felt used in boots or liners

Dear Clients!

From the very beginning we always try to meet your high requirements, watching the changes on the footwear market. Thanks to our persistent work Lemigo, brand has gained your trust for 26 years. During that time we managed to work out the highest standards of our production and develop one of the most modern machine parks in Poland. Our company with entirely Polish capital, cutting-edge technologies, worldwide market and professional staff. We can also commended for received lots of awards, certificates and honors. Lemigo is one of the greatest employers in the region.

The early beginning of the company was kids textile shoes production. In the course of time our range of products had developed and we started production of wellingtons. After that, thanks to our passions, we set off production of boots for Hunters and Anglers. Then arose the idea of manufacturing super light EVA boots as well as PU.

Additionally, we patented the combination of these two materials what resulted in safety boots manufacturing. In this branch of industry we implemented PU technology using the best raw materials available in the world. Currently we produce 2 000 000 pairs every year and deliver 40 countries all round the world.

Within 26 years of existing on the market the company succeeded greatly on domestic market as well as worldwide, becoming on of the most estimated producers. Lemigo has been always focused on quality and innovations to guarantee meeting your requirements while next years of cooperation.

Miroslaw Garbacz

No.	711
Material	Shank: polyuretan Sole: polyuretan
Colour	green, yellow, black
Weight	1,7 kg
Height	37 cm
Sizes	38 - 47
Packaging	one size/one color/ carton x 5

S5 SRC CI
ISO 20345:2011
WE IPS-1439-6/2013

- all-purpose shoes,
- made of high quality PU,
- a couple weighs around 1,7 kg, lighter than rubber or PVC about 30%,
- resistant to vegetable and animal fats, oils, acids, disinfectants and plant chemicals,
- absorbs energy in the heel part,
- SRC slip resistant sole,
- antistatic properties,
- metallic anti-corrosion rim,
- insulates the bottom from the cold,
- metal antler,
- meets the requirements for footwear used in mining plants, potentially explosive atmospheres of methane and coal dust WEIPS-1439-6 / 2013,
- modern design

New Generation

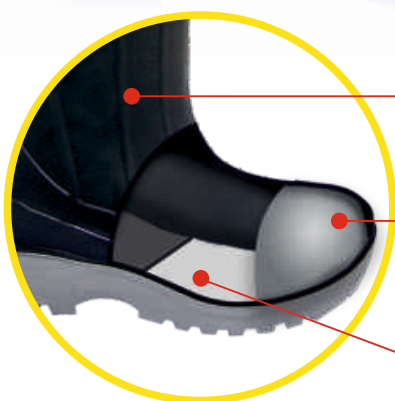

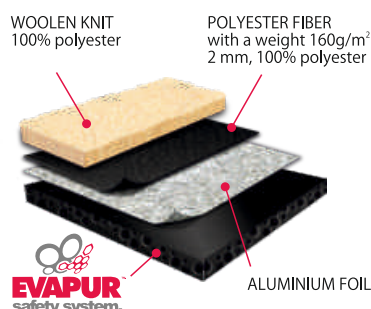

701, 702, 703,
705, 706, 707

No.	707, 703
Material	Shank: EVA Sole: Polyuretan
Colour	black, white, green, yellow
Weight	1,7 kg
Height	37 cm (with collar 43 cm)
Sizes	41 - 46
Packaging	one size/one color/carton x5

PATENT 398812

STEEL TOE CAP
(702, 703, 706, 707)

KEVLAR ANTIFOULING
INSERT (703, 707)

- all-purpose shoes
- patented EVA + PU connection technology
- made of 100% highest quality EVA and PU materials
- couple weighs about 1,7 kg, lighter than rubber or PVC
- have a replaceable warmer made of three-layer material (100% polyester)
- absorbs energy in the heel part
- SRC slip resistant sole
- antistatic properties
- metal anticorrosion lining (702, 703, 706, 707)
- Insulation from the cold and the impact
- kevlar antler (703, 707)
- polyester collar, elastic waist with stopwatch (701, 702, 703)
- high degree of thermal insulation due to the presence of bubbles air in the material
- adjusts to foot movement, waterproof
- provide optimum freedom of movement, comfortable
- they retain the flexibility even at -50°C
- year-round
- easy to maintain cleanliness
