# Mercan® FISHING LINE

A leading fishing line manufacturer since 1995, Mercan Fishing Line has remained on the cutting edge of product design, to meet and excel the requirements of both amateur and professional anglers worldwide.

Today Mercan holds a firm place in the global market, with its high quality monofilament, fluorocarbon and braid lines. Manufacturing approximately 1,000,000 units per month, Mercan's 1,000 m2 facility is located within 150 km of Istanbul, Turkey. From here our products are delivered across Europe within 10 days. As part of our current expansion we are moving production to our new 5,000 m2 facility.

Our qualified staff examines all Mercan products in our in-house testing laboratory, following stringent quality control guidelines and utilizing current technological advances. This ensures that only a consistent, high quality product reaches our customers.

We stand by our principle to price our products in line with current market conditions, while providing outstanding service to our growing customer base and manifesting our leadership position in the global marketplace.

Beyond the Mercan Fishing Line brand, we also offer OEM to our customers, manufacturing custom fishing lines at the same high standard our customers have come to expect of us. Our in-house OEM capacities enable us to provide customers with a customized fishing lines product including a large range of materials, colors, diameters and custom packaging, at a competitive price.

We take pride in our products, our employees and our history and always strive to be a reliable partner to all our current and future customers.

# EXCELLENT SOFT

MONOFILAMENT

LOW MEMORY

The combination of exceptional casting characteristics and minimal memory make EXCELLENT SOFT the best choice for anglers seeking a fishing line suited to lure fishing. It is available in two colours -camouflage blue or high visibility fuchsia. From a handling aspect it is exceptionally soft and exhibits negligible memory , but contains a strong core structure that ensures durability is not compromised. With a high resistance to abrasion from aquatic structures and plant life it is ideally suited to angling in medium to heavy cover environments

# CARP PREMIUM

MONOFILAMENT

LOW STRETCH

EXCEPTIONALLY GOOD ABRASION RESISTANCE

SUPERIOR SINKING SPEED

Only the best quality raw materials have been utilized in the manufacture of Mercan's CARP Premium line, resulting in one of the strongest pure nylon lines in the World today, with some of the finest diameter to break strain ratios. CARP Premium lines are the best choice for anglers targeting large powerful sports fish like the European Carp. This line is highly resistant to abrasion damaged caused by aquatic plant species and structures, but still retains the superior knot strength and suppleness of a pure nylon line. With two low visibility colours it makes an exceptional line for fishing in heavily fished waterways where fish are spooked easily.

# TRENDLINE® FLOATING

MONOFILAMENT

EXTRAORDINARY KNOT STRENGTH

EXCEPTIONALLY GOOD ABRASION RESISTANCE

TRENDLINE Floating nylon fishing lines exhibit exceptional sliding characteristics, knot integrity and strength as well as a high level of abrasion resistance. TRENDLINE monofilament fishing line offers specially developed wear resistance and materials suited to difficult water environments. Its unique inbuilt sliding capability allows the line to float on the water surface, ensuring the angler can whip the line when necessary to avoid water obstacles and aquatic life that commonly result in entanglements. TRENDLINE monofilament fishing lines possess a high resistance to knotting and are the best choice for surface fishing or fishing in heavy cover situations. Available in special high visibility orange only.

# EUPHRATES<sup>®</sup> PLATINUM

MONOFILAMENT

EXCEPTIONALLY GOOD ABRASION RESISTANCE

FLUOROCARBON COATED

EUPHRATES Platinum offers anglers everything they have ever wanted in a fluorocarbon coated monofilament fishing line. It is made from the highest quality raw materials and processed using a unique compression method to produce a high strength copolymer line that is thinner and denser than the competition, but still retains all the flexibility of standard monofilament lines. The durability of this line is further enhanced by inbuilt UV protection and the application of a trademarked fluorocarbon coating material making it almost impervious to abrasion. Finally, it is subjected to the most rigorous QC testing procedures to ensure that each and every spool of line delivers the highest level of performance no matter the fishing conditions.

# EUPHRATES<sup>®</sup> DYNAMIC

MONOFILAMENT

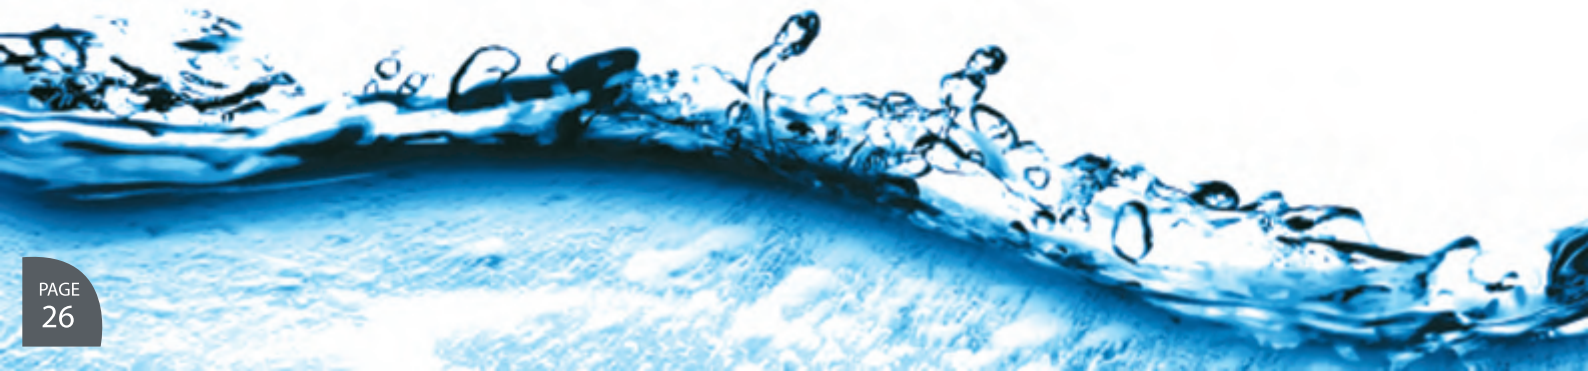

EASY HANDLING

EXCEPTIONALLY GOOD ABRASION RESISTANCE

FLUOROCARBON COATED

EUPHRATES Dynamic by Mercan is a superior co-polymer line developed for professional anglers. It is manufactured utilizing a unique process that results in a compact and dense copolymer line that exhibits exceptional handling characteristics and increased abrasion resistance. The durability of this line is further enhanced by inbuilt UV protection and the application of a fluorocarbon coating material making it almost impervious to abrasion. The fluorocarbon coating combined with the trademark grey colour means Dynamic has a refractive index close to that of water, making it ideal for angling situation that require low visibility lines.

# Mercan KORTEC

The kortec series was developed with the unique characteristics and living environments of each type of fish in mind. The lines' diameters as well as colors were chosen after an extensive analysis of anglers' needs during their battle with the fish.

EXCEPTIONALLY GOOD ABRASION RESISTANCE

FLEXIBLE

LOW STRETCH

# KORTEC® TROUT

**%100 NYLON**

Trout are fished for around the globe. The KORTEC TROUT line meets the demands of trout fishermen by offering a strong, flexible line ideal for angling and boat fishing. It is resistant to quick and sudden movement that is common with trout fishing. It is manufactured from copolymer nylon and provides a nearly invisible line. Kortec Trout offers strong knotting strength and is UV-resistant, making this a remarkable choice for those who appreciate fishing for trout.

A scenic view of a beach with people fishing under a cloudy sky. The sky is filled with large, white, fluffy clouds against a blue background. The ocean is a deep blue-green color, with sunlight reflecting off the water's surface. In the foreground, a sandy beach is visible. Three people are silhouetted against the water, engaged in fishing. One person on the left is holding a long fishing rod that extends into the water. Two other people are standing further out on the beach, also appearing to be fishing. The overall atmosphere is peaceful and serene.

# FLUOROCARBON

[www.mercanfishingline.com](http://www.mercanfishingline.com)

# Mercan DICLE

## HIGH INVISIBILITY

The Mercan Fluorocarbon line has nearly the same light refraction rate as water, making it the optimal line for catching shy fish in clear water

## EXCEPTIONAL ABRASION RESISTANCE

The Mercan Fluorocarbon line is much more abrasion resistant than a regular monofilament line. You can use it safely in rocky places

## LOW STRETCH

Make your long casting more efficient and feel bites instantly, with Mercan Fluorocarbon fishing line.

## SUPERIOR SINKING SPEED

The Mercan Fluorocarbon high-density line sinks rapidly, giving you the needed advantage in deep water fishing.

PRODUCTS - FLUOROCARBON - DICLE PREMIUM

**DICLE® PREMIUM**

FLUOROCARBON

**%100 FLUOROCARBON**

**HIGH INVISIBILITY**

**EXCEPTIONALLY GOOD ABRASION RESISTANCE**

**FLEXIBLE**

**LOW MEMORY**

DICLE Premium is a high quality fluorocarbon line that offers superior wear resistance and minimal stretch. This heavier line has been coated with a specialized PVDF compound, enabling it to break the water's surface tension and sink quickly to the target fish or strike zone. Anglers are assured of a high quality line that is built to handle the toughest outdoor environments. The line is basically invisible underwater for improved bait and lure presentation, making it the perfect line choice for targeting timid species in the most heavily fished waters. Other advantages of DICLE Premium include improved abrasion resistance, high level knot integrity, greater flexibility and suppleness as well as low memory, making this line an excellent choice for many angling situations.

# POLYETHYLENE

[www.wholesalefishingline.com](http://www.wholesalefishingline.com)

# Mercan P.E BRAID

## ULTIMATE WATER RESISTANCE

Mercan PE Braid fully water resistant lines are ideal for long-term use.

## EXTRA ORDINARY BREAKING STRENGTH

Mercan PE Braid lines are four times stronger than normal monofilament lines

## VIRTUALLY NO STRETCH

Mercan PE Braid lines transmit all contact with the fish instantly, without stretching.

## EXTREME ABRASION RESISTANCE

Mercan PE Braid lines are a secure and durable choice for anglers in difficult fishing environments.

# PE BRAID PLATINUM

P.E BRAID

POLYETHYLENE

P.E BRAID Platinum consists of eight separate ultra-tight braids that are impregnated with additional filaments utilizing a unique compression Technology. A surface treatment is applied, increasing the line's ability to resist soiling, salt crystal collection and water absorption—the three most destructive forces that braided fishing line exhibits. P.E BRAID Platinum's unique production process results in a braided fishing line exhibiting less than 3% elasticity, meaning anglers have complete control, and every bump and bite is instantly transmitted directly to the rod tip.

# PE BRAID PREMIUM MULTICOLOR

## P.E BRAID

P.E BRAID Premium Multicolor by Mercan utilizes state of the art braid Technology resulting in improved breaking strains and flexibility . P.E BRAID Premium Multicolor is essentially a multicolored version of the famous P.E BRAID Premium consisting of the same four seperate ultra-tight braids that are impregnated with additional filaments utilizing a unique compression Technology . The surface treatment is then applied , increasing the lines ability to resist soiling , salt crystal collection and water absorption the three most destructive forces that braided fishing lines are likely to encounter . P.E BRAID Premium Multicolor's unique production process results in a braided fishing line exhibiting less than 3% elasticity meaning anglers have complete control of lures and baits the multicolor design with increments every 10 m makes it easy for anglers to monitřr their fishing depths and distances with great accurarcy. Its four strand price point , multicolor design and exceptional durability make it an ideal choice for applications such as jigging and bait fishing at depth. Suited to both saltwater and freshwater applications.
