**CONTRACTING AND
AGRICULTURAL TIRES**

An aerial photograph of a field, likely a farm, showing a large tree stump in the center-right. The field is divided into sections by furrows, and the overall color palette is dominated by earthy browns and greens. The text 'POWER AND PEACE OF MIND' is overlaid in white, bold, sans-serif font across the middle of the image. A thin green horizontal line is positioned below the text.

POWER AND PEACE OF MIND

Today's agricultural and contracting work is a specialist job that calls for specialist tools. The only thing between your machinery and various terrains is the tires. They transfer the horsepower to the ground, keeping you and your business moving.

For decades, Nokian Tyres has been concentrating on creating the best possible tires for different terrains and changing seasons. Every improvement in grip, durability, handling and load-bearing capacity translates to safer, more efficient day's work.

For power and peace of mind, Nokian Tyres has the right tools for your job.

TIRES FOR TRACTORS AND COMPACT MACHINES

More power and speed, bigger loads, less maintenance – the evolution of agricultural and contracting work demands more and more from tires. Nokian Tyres has an extensive line of tires for tractors and machines such as compact loaders, telehandlers and backhoe loaders. Whatever your work requires, Nokian Tyres has got you covered.

NOKIAN TRI 2

VERSATILE PROFESSIONAL CONTRACTING TIRE FOR YEAR-ROUND USE

Nokian TRI 2 excels in a wide variety of tasks from job sites to highways, from snowy winters to hot tarmac. Its durability, economy and comfortable driving response make it a reliable choice for versatile contracting work.

VERSATILITY AT WORK

Very suitable for modern farming, earthmoving and municipal work in varying conditions and terrains.

GRIP AND COMFORT

Stable and fast on the road, gentle on delicate green areas. Good grip and pleasant handling even under the heaviest loads.

FOR YEAR-ROUND USE

M + S pattern gives you dependable grip for accurate driving on snow and ice as well.

NOKIAN HAKKAPELIITTA TRI

EXTEND THE ALL-SEASON CAPABILITIES OF YOUR MACHINERY

The versatile Nokian Hakkapeliitta TRI brings the most winter grip for your machinery. Tough enough for years of extensive use, this specialist tire has excellent braking, accelerating and steering properties.

IMPROVED GRIP

More gripping edges with evenly distributed surface pressure ensure great grip, excellent handling and better productivity around the year – with or without studs.

IMPROVED ENDURANCE ON PAVED SURFACES

All-season infrastructure maintenance requires durability on various surfaces. Nokian Hakkapeliitta TRI keeps on going for years even on paved roads.

INCREASED LOAD CAPACITY AND STABILITY

Even the heaviest accessories can now be part of the machine. Nokian Hakkapeliitta TRI is stable and predictable, enabling comfortable use in any weather.

“Excellent comfort and friendly for the soil – combined with record durability”

AGRICULTURE WORK IN THE NETHERLANDS

FRIENDLY TIRE FOR THE GRASSLAND

Mr. Paul-Jan de Feijter does agriculture work, including loading trucks with bails of grass or straw and unloading the agricultural products they are trading in. Mr. Feijter chose Nokian TRI 2 tires as he needed a comfortable radial tire for his telehandler, which has no suspension. "I needed a tire, which is friendly for the land producing our products", Mr. Feijter tells and adds. "But the tires need to be also comfortable and durable on the hard surfaces on which we need to maneuver a lot to load the vehicles and to store the crop".

Mr. Feijter is extremely happy with the performance of Nokian TRI 2 tires. "The first set of these tires has performed almost 5.000 hours, which is best achievement ever for us – an absolute record!" Mr. Feijter rejoices. He recommends the tire for any agricultural work on sand, grass or light soil. "The tires are stable and comfortable, which reduces fatigue of the operator allowing him to be more focused and work safely".

NOKIAN HAKKAPELIITTA TRI ONE TIRE – TWO WORLD RECORDS

Not only has Nokian Hakkapeliitta TRI broken two world records (Fastest tractor, avg. speed 130.165 km/h in 2015 and Fastest unmanned snow plowing, avg. speed 73.317 km/h in 2018), it has proven its value in everyday work many times over. From cleaning parking lots to plowing icy highways, Nokian Hakkapeliitta TRI makes winter contracting safer and more efficient – with or without studs.

NOKIAN HAKKAPELIITTA TRI STORIES FROM SWITZERLAND

SNOW-PLOWING COMFORT

Preisig Tiefbau-Forstbetrieb does snow removal and material transport work in the hilly, demanding landscape. Since 2013, Nokian Hakkapeliitta TRI has given them impressive service on their Fendt 716 Vario tractor.

“The tires are excellent in winter service for plowing the steep roads and pulling heavy weights without using chains”, says Mr. Emil Preisig, the owner of the company. “This excellent traction and grip gives me a good and safe feeling all the time.”

Most of the winter use consists of snow plowing and salting the roads. In this work, short braking distance and good handling are vital properties.

“Good traction and grip in curves as well provide safety to me, especially when carrying heavy loads of up to 30 tons”, he says.

Driving comfort also comes up, because unlike lug pattern tires, Nokian Hakkapeliitta TRI enables quiet ride in speeds up to 40 km/h. “It is a pleasure to drive with it”, Emil smiles. “On paved roads you can’t hear the tire at all!”

Impressed with the versatility of this multipurpose tire, Mr. Preisig has a firm opinion on Nokian Hakkapeliitta TRI:

“For me there is nothing better on the market”, he says. “Many people cannot believe what this tire is capable of. They have never seen that someone can plow so efficiently without chains or studs and are very surprised.”

“The tire has excellent self-cleaning abilities and outstanding traction”

Mr. Ernst Hottinger

ROAD-FRIENDLY TRACTION

Working for 70 different companies, Hottinger Landesprodukte does a lot of winter contracting such as snow removal and spreading service in the greater area of Lake Zurich, in altitudes of 400 to 900 meters above sea level. One of the benefits of using Nokian Hakkapeliitta TRI tires is that studs or chains are no longer necessary.

“The problem is that studs often cause damage to the roads and private surfaces”, says Ernst Hottinger. “Nokian Hakkapeliitta TRI tires are extremely resilient and very road friendly.”

Another thing Mr. Hottinger likes about Nokian Hakkapeliitta TRI is the looks. “It is an eye-catcher”, he says “Sometimes when

we go for a coffee break, we see that people are watching and checking the tires.”

But looks aside, the most important feature for winter contracting is the grip. “For instance frozen, icy and occupied sloping parking spaces. There you really need good nerves and real good tire grip”, Ernst Hottinger explains. “The braking is of utmost importance. During the winter months we are under pressure. It is a good feeling to know to have the right, best quality tires.”

NOKIAN GROUND KING

COMBINING ALL-TERRAIN MOBILITY WITH ON-ROAD PERFORMANCE

High performance in transits and road transport plays a major role in tractor contracting work, while all-terrain mobility and effective power transfer to the ground are a must on fields and work sites. Nokian Ground King tire offers both, supporting the versatility of multipurpose machines.

THE VERSATILITY REVOLUTION

Traction and stability on soft soil, speed, comfort and precision on road transports – the Hybrilug™ technology combines the best features of lug and block type patterns.

LONG-LASTING PERFORMANCE

With high-grade, wear resistant tread compound and a large ground contact area, Nokian Ground King offers excellent operating hours – even with extended on-road driving.

READY FOR HEAVY LOADS

For broader diversity of tasks, Nokian Ground King has high load-bearing capacity that allows the use of heavy work implements and high loads.

NOKIAN HYBRILUG™ TECHNOLOGY

A NEW APPROACH TO PATTERN DESIGN

The Hybrilug™ technology challenges the limitations of the traditional lug and block tire patterns. Featuring an increased ground contact area, specially aligned pattern elements and more tread compound, the Hybrilug™ technology combines all-terrain mobility, great road properties and a long operating life.

CONFIDENCE FOR EVERY JOB

The multi-directional edges, good self-cleaning and the extended contact to the driving surface ensure grip and traction on and off the road.

ROAD PERFORMANCE

The special alignment of the pattern elements on the centerline means significantly lower vibrations and noise as well as improved handling compared to a standard traction pattern.

LONG OPERATING LIFE

The Hybrilug™ technology boasts more high-grade, wear resistant tread compound than a standard traction pattern. The tire retains its high performance for a long time.

ONE TRACTOR – MANY JOBS

A versatile mix of seasonal work is typical of today's contracting. On fields and roads, in towing and hauling, under heavy loads and with versatile work implements, Nokian Ground King is designed to support every job, every day. Don't let the tires be the bottleneck that prevents you from getting the most out of your multipurpose tractor – go for the true all-round performance tire.

NOKIAN GROUND KING FARMING AND CONTRACTING IN FRANCE

COUNTLESS JOBS – ONE TIRE

From dairy farming to municipal contracting, **Nokian Ground King** has proven its versatility in the wide variety of daily jobs. The three French test users were impressed – and, may we add, for a good reason.

Mr. Christian Flament runs Multitrav, a company providing agriculture and public construction work in Loeuilly, Northern France. “We appreciate the tire’s incredible traction – even with a heavy trailer and in muddy conditions”, he describes Nokian Ground King. “The tire performs well at all speeds, which makes our work easier.” Mr. Flament also appreciates the tire’s slow wearing. “The long tire life is as important to us as the good grip on the field”, Mr. Flament explains.

Mr. Pierre-Edouard Jaunet owns a dairy farm in Normandy, France. On his Valtra N134 tractor, Nokian Ground King has improved versatility. “I can do more with the same tire, getting the best results with multiple activities – at the farm and on the field”, he says. What’s more, Mr. Jaunet appreciates the smooth ride. “The comfort on the field is really better than anything I have experienced before”, Mr. Jaunet praises.

Mr. Benjamin Dufour drives a Fendt 714 tractor in public maintenance as well as agricultural contracting work in Saint-Lô, Northwest France. “Nokian Ground King tires give me excellent comfort and easy access to every place – fields, roads and public sites”, Mr. Dufour tells. “They are better than all my previous tires in comfort and self-cleaning at the field exit.”

FLOTATION TIRES

Flotation tires, with their low surface pressure and high load-bearing capacity, are ideal all-round tires for trailers and many other agricultural applications. Nokian Tyres has rethought the flotation tire based on real-world needs, creating some of the sturdiest, most stable tires on the market.

NOKIAN CT

ULTIMATE DURABILITY FOR HEAVY TRAILERS

The versatile working environments in agriculture and heavy earthmoving put trailer tire to a test. Heavy loads on rocky construction sites or soggy fields, long road transports at high speed – Nokian CT has the strength and stability you need for today’s contracting work.

ENDURES HARD SURFACES

The incredibly sturdy CCR (Cut and Crack Resistant) tread rubber compound offers protection against sudden damages and a long operating life because of its very low wear rate.

RESISTS PUNCTURE DAMAGE

Deep grooves and lots of thick, sturdy rubber backed up by three high-strength steel belts make Nokian CT extremely resistant to puncture damage.

IMPROVED STABILITY

Ultra-strong textile carcass and a wide contact area to the ground make your trailer easy to load and stable to drive.

NOKIAN COUNTRY KING

PROVEN FIELD AND ROAD CAPABILITY

Nokian Country King is your long-lasting, rugged flotation tire for demanding use in large agricultural machines and trailers. Its good self-cleaning properties and reliability have made it a popular choice for a variety of applications.

VERSATILITY

On and off the road or in the field – Nokian Country King tirelessly carries heavy loads and enables versatile use of equipment in a variety of conditions.

SELF-CLEANING

Wide-groove tread design has excellent self-cleaning properties. It leaves the soil where it is, even on a wet terrain.

IMPROVED STABILITY AND EFFICIENCY

Strong, balanced radial construction with low rolling resistance means more economical and productive working hours.

RADIAL

NOKIAN COUNTRY KING CONTRACTING IN GERMANY

STABILITY FOR TRAILER WORK

Jürgen Richter's company does contracting jobs for local farms and bioenergy plant with a fleet of 16 tractors, 17 trailers and other agricultural machinery. In 2011, they came across with Nokian Country King tires. Impressed with the tire's large contact area and straight sidewalls, they decided to give them a try.

"The tires turned out to be very good in real use", Richter says. "Now we have five of our trailers fitted with Nokian Country King, and one Fendt 820 tractor fitted with Nokian TRI 2."

So far, they have encountered zero problems with Nokian Country King. "Stability and large contact area added with long service life has made us really like Nokian Country King", Richter admits.

Each of Richter's trailers sees about 500 hours of use every year, 60-70% of which on-road use. "Reliability and self-cleaning were the main reasons for choosing these tires", Richter says. "Nokian Country King is very good in every way, there is no negative to comment about this product".

“Nokian Country King is
very good in every way”
