REDUCTION OF SEED LOSS!**

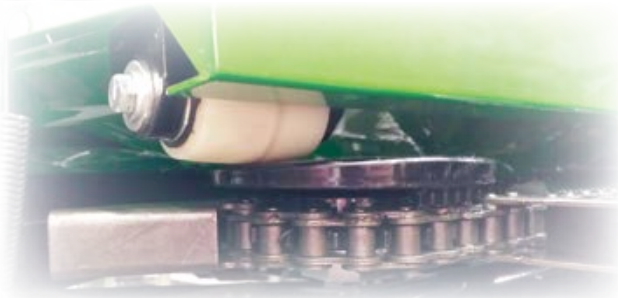

OROS SUN+CHOP

Available
in different
combine colours.

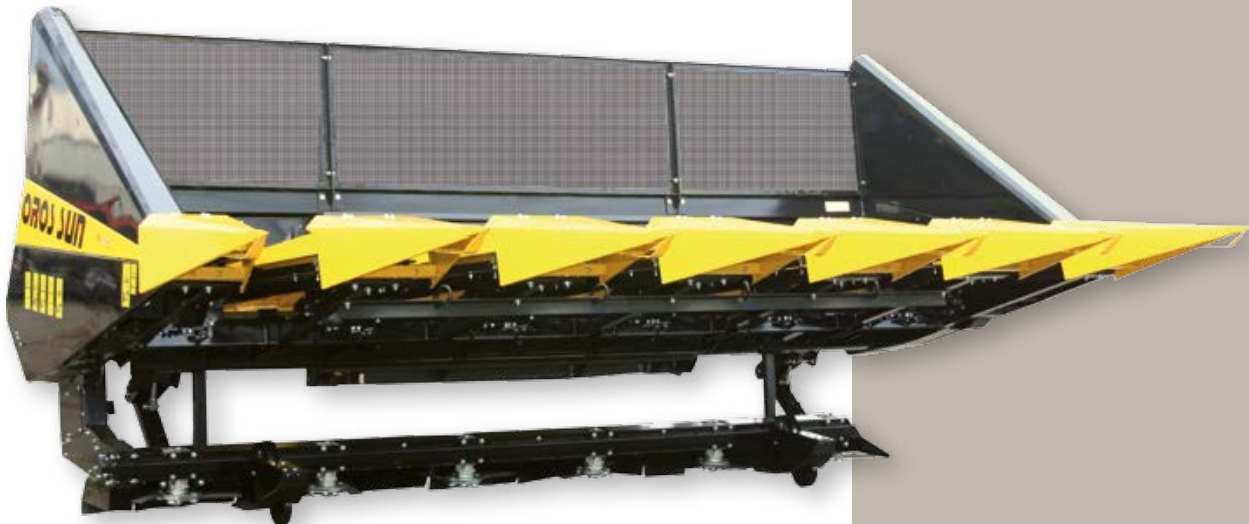

VIBRATING TRAY

designed with rollers

The roller is copying the cam which makes vibrating the tray, thus the seeds continuously flow into the header and then to the combine.

MECHANICAL

STALK CHOPPER

- The optimum height of the stalk stubs can be maintained in every harvesting heights
- It's cutting the stalk only after the rotating knives cut the sunflower disc
- The distance of the stalk chopper unit can be adjusted from the header from the combine's cabin
