

2 block LS

4 block LS

HYDRAULIC STABILIZERS

(Patent Pending)

2 block LS and 4 block LS

(Including valve, remote control, cables and type specific cylinders)

ADVANTAGES:

- Safe and easy attachment of implements from inside the cab
- Enables hydraulic adjustment of stabilizers
- Hydraulic sideshift of implements (the block contains lock and shock valves)
- Floating position function (automatic limit switch)
- Available for all tractor models with load sensing hydraulics (LS)
- Possible to control hydraulic top link and tilt function with optional hydraulic block.
- Implement lock up sideways
- All standard block outlets and inlets of the tractor remain unchanged
