

RAUMEDIC®

— *Lifeline to Health* —

” For us, working in healthcare represents commitment, challenge and drive in equal measure. ”

Dr. Manfred Steinhäuser, Chief Physician of Central Anaesthesia and Intensive Care at the Clinical Centre HochFranken, and Member of the Medical Advisory Board at RAUMEDIC

For us at RAUMEDIC, healthcare takes top priority in our thinking and actions.

Healthcare is our motivation to make good things even better and to rethink conventional methods on the basis of our experience and skills.

With dedication and in full awareness of the importance and impact of our innovations, we work every day in the service of health.

“The reliability of our statements and our actions is the basis for a trustful and long-term cooperation with our customers.”

Martin Bayer, CEO RAUMEDIC AG

RAUMEDIC now
and in the future

expert – specialized – reliable

Mission

RAUMEDIC is an expert developer and manufacturer of polymer systems and components. As a polymer solutions provider specializing in the medical and pharmaceutical industry, we are a reliable and valued partner around the world.

In close cooperation with our customers and users in clinics and practices, we develop innovative diagnostic and acute therapeutic systems. In doing so, we make a significant contribution to preserving high quality of life and to restoring health to those who are suffering from illness.

RAUMEDIC – Partner for
Industry and Hospital Care

Customers

RAUMEDIC combines decades of experience in medical engineering with the efficiency and drive of a modern company.

We provide our clients with polymer solutions ranging from individual components to complete sterile medical devices and pharmaceutical packaging. These can be used in many fields of application within the medical and pharmaceutical industry.

In addition, we develop, manufacture and market innovative diagnostic systems to measure various physiological parameters in the human body.

Medical Engineering

- Infusion
- Transfusion
- Nutrition
- Anaesthetic equipment
- Dental
- Dialysis, Apheresis
- Ophthalmology
- ECC
- Wound treatment
- Angiography
- Laboratory, Analytics, Diagnostics
- Gas supply
- Urology
- Arthroscopy
- and many more ...

Hospital Care

- Multi-modal neuromonitoring
- Intracranial pressure measurement
- Oxygen partial pressure measurement
- Temperature measurement
- Compartment pressure measurement
- Telemetric pressure measurement

Our customers
represent the entire
spectrum of medicine
and pharmaceuticals.

Pharmaceutical Industry

- Drug application
- Injection
- Mixing
- Dosing
- Inhalation
- Pharmaceutical packaging
- Fluid management

Since the REHAU company was founded in 1948, we have been constantly working on new market-oriented and customer-specific polymer solutions.

Sustainability

New material developments and new technologies form the basis from the outset for safe medical devices. Our experience has taught us that it is essential to provide satisfaction for customers and patients alike through sustainable growth and uncompromising focus on quality.

Since 2004, RAUMEDIC has been an independent company within the family-run REHAU Group, an internationally operating polymer specialist. Also in future, we are looking forward to contributing each day to the eventual recovery of patients!

The separation of RAUMEDIC signified a key strategic and entrepreneurial change. Still today, it is the basis for industry focus, innovation and accelerated growth."

*Jobst Wagner,
President of the Supervisory Board of the REHAU Group*

Extrusion – Injection molding –
Assembly – our wide
spectrum is to your advantage

Manufacturing expertise

From the initial idea to serial production, we stand alongside our customers. With about 70 years of development and manufacturing expertise in the areas of extrusion, molding and assembly, we are ideally equipped to transform our clients' ideas into well-engineered product solutions.

Everything from a single source:

Extrusion

- Thermoplastic and silicone extrusion
- Micro tubing
- Multilayer tubing
- Multilumen tubing
- Lay flat tubing
- Thin walled tubing
- X-ray tubing
- High pressure tubing
- Polymer and wire coextrusion

Molding

- Thermoplastic and silicone injection molding
- Prototyping
- Precision injection molding
- Micro injection molding
- Multi component injection molding
- Insert- and overmolding
- 100 % integrated camera controls

Assembly

- Secondary operations
- Cutting
 - Drilling
 - Printing
 - Tip forming and flaring
 - Integration of electronic components
- Sub- and complete assembly
- Manual, semi and fully automated
 - 100 % integrated camera controls
- Packaging and sterilization

“Our strength lies in our wide variety of technologies and services. Our partners benefit from the know-how we provide.”

Jürgen Küspert, Head of Production

The experience accumulated from countless successful projects is the foundation for our healthy growth and guarantee for continuous high quality.

Experience

Experience is the foundation on which our company has been steadily growing. Passed on from generation to generation and constantly extended, it is the essential substance for new projects and upcoming challenges.

Whether in research projects, product development or the optimization of production processes, it is our experience of about 70 years that allows us to break new ground efficiently and with target orientation.

When it comes to the development and production of medical engineering products, knowledge transfer within the team is a key success factor.”

*Martin Schenkel, Director Operations
with REHAU/RAUMEDIC since 1981*

You know your application – we know the suitable material.

Material Competence

Materials research and development have been among our core capabilities from the beginning. By working closely with leading research facilities, we are constantly expanding our material-specific expertise. Our chemists and application technicians are known for their in-depth knowledge in the field of thermoplastics and silicone.

Thanks to this knowledge, we select the appropriate material for your product, adjust interactions with other contact media and take them into consideration during the product and process development.

Our products can save lives. We are fully aware of this responsibility in each and every one of our production steps.”

Dr. Katharina Neumann, Head of Business Team Chemistry / Application Technology PVC

When it comes to quality,
there are no compromises.

Quality

Our products are real lifesavers after all! Therefore it goes without saying that these products pass through a variety of quality controls, both during and after manufacture, before they are used on patients.

In Germany, but also at our facility in the United States, our products are manufactured according to GMP standards and "Made in Germany" quality principles. With full conviction we stand 100 % for the quality of each of our products!

- Certified QM system according to ISO 13485
- Certified according to ISO 15378
(Primary packaging materials for medical products)
- Clean room production according to ISO 14644,
Class 7 (=10,000)
- Manufacture according to GMP standards
- CE approval for RAUMEDIC medical devices

“It is our goal is to achieve continuous improvement in our processes with regard to quality, cost-efficiency and ecology.”

Dr. Winfried Bernhard, Head of Quality Management

The RAUMEDIC telemetric system is a product innovation that can make a decisive improvement in hydrocephalus patients' quality of life."

Ingo Bartels, Head of Business Team Clinic

Creating something new is the driving force behind our innovations.

Innovation

We apply the same passion to our work on finished product solutions as we do to achieving technical feasibility on a daily basis in the areas of extrusion, injection molding and assembly. In clinics around the world these products contribute to restoring the health of people affected by disease.

For example, we are the first and only company to combine the three measuring functions for pressure, temperature and oxygen in a single neurosurgical catheter.

Furthermore, we have developed the world's first telemetric system, which was recognized with the MEDICA award and allows intracranial pressure measurement (ICP) on mobile patients. As a result, we help people with hydrocephalus syndrome significantly improve their quality of life.

The knowledge that we have gained by integrating electronic components such as electrodes, microchips and memory elements, is something that we also apply to customer-specific developments.

A promise is only as good
as the person who makes it.

Reliability

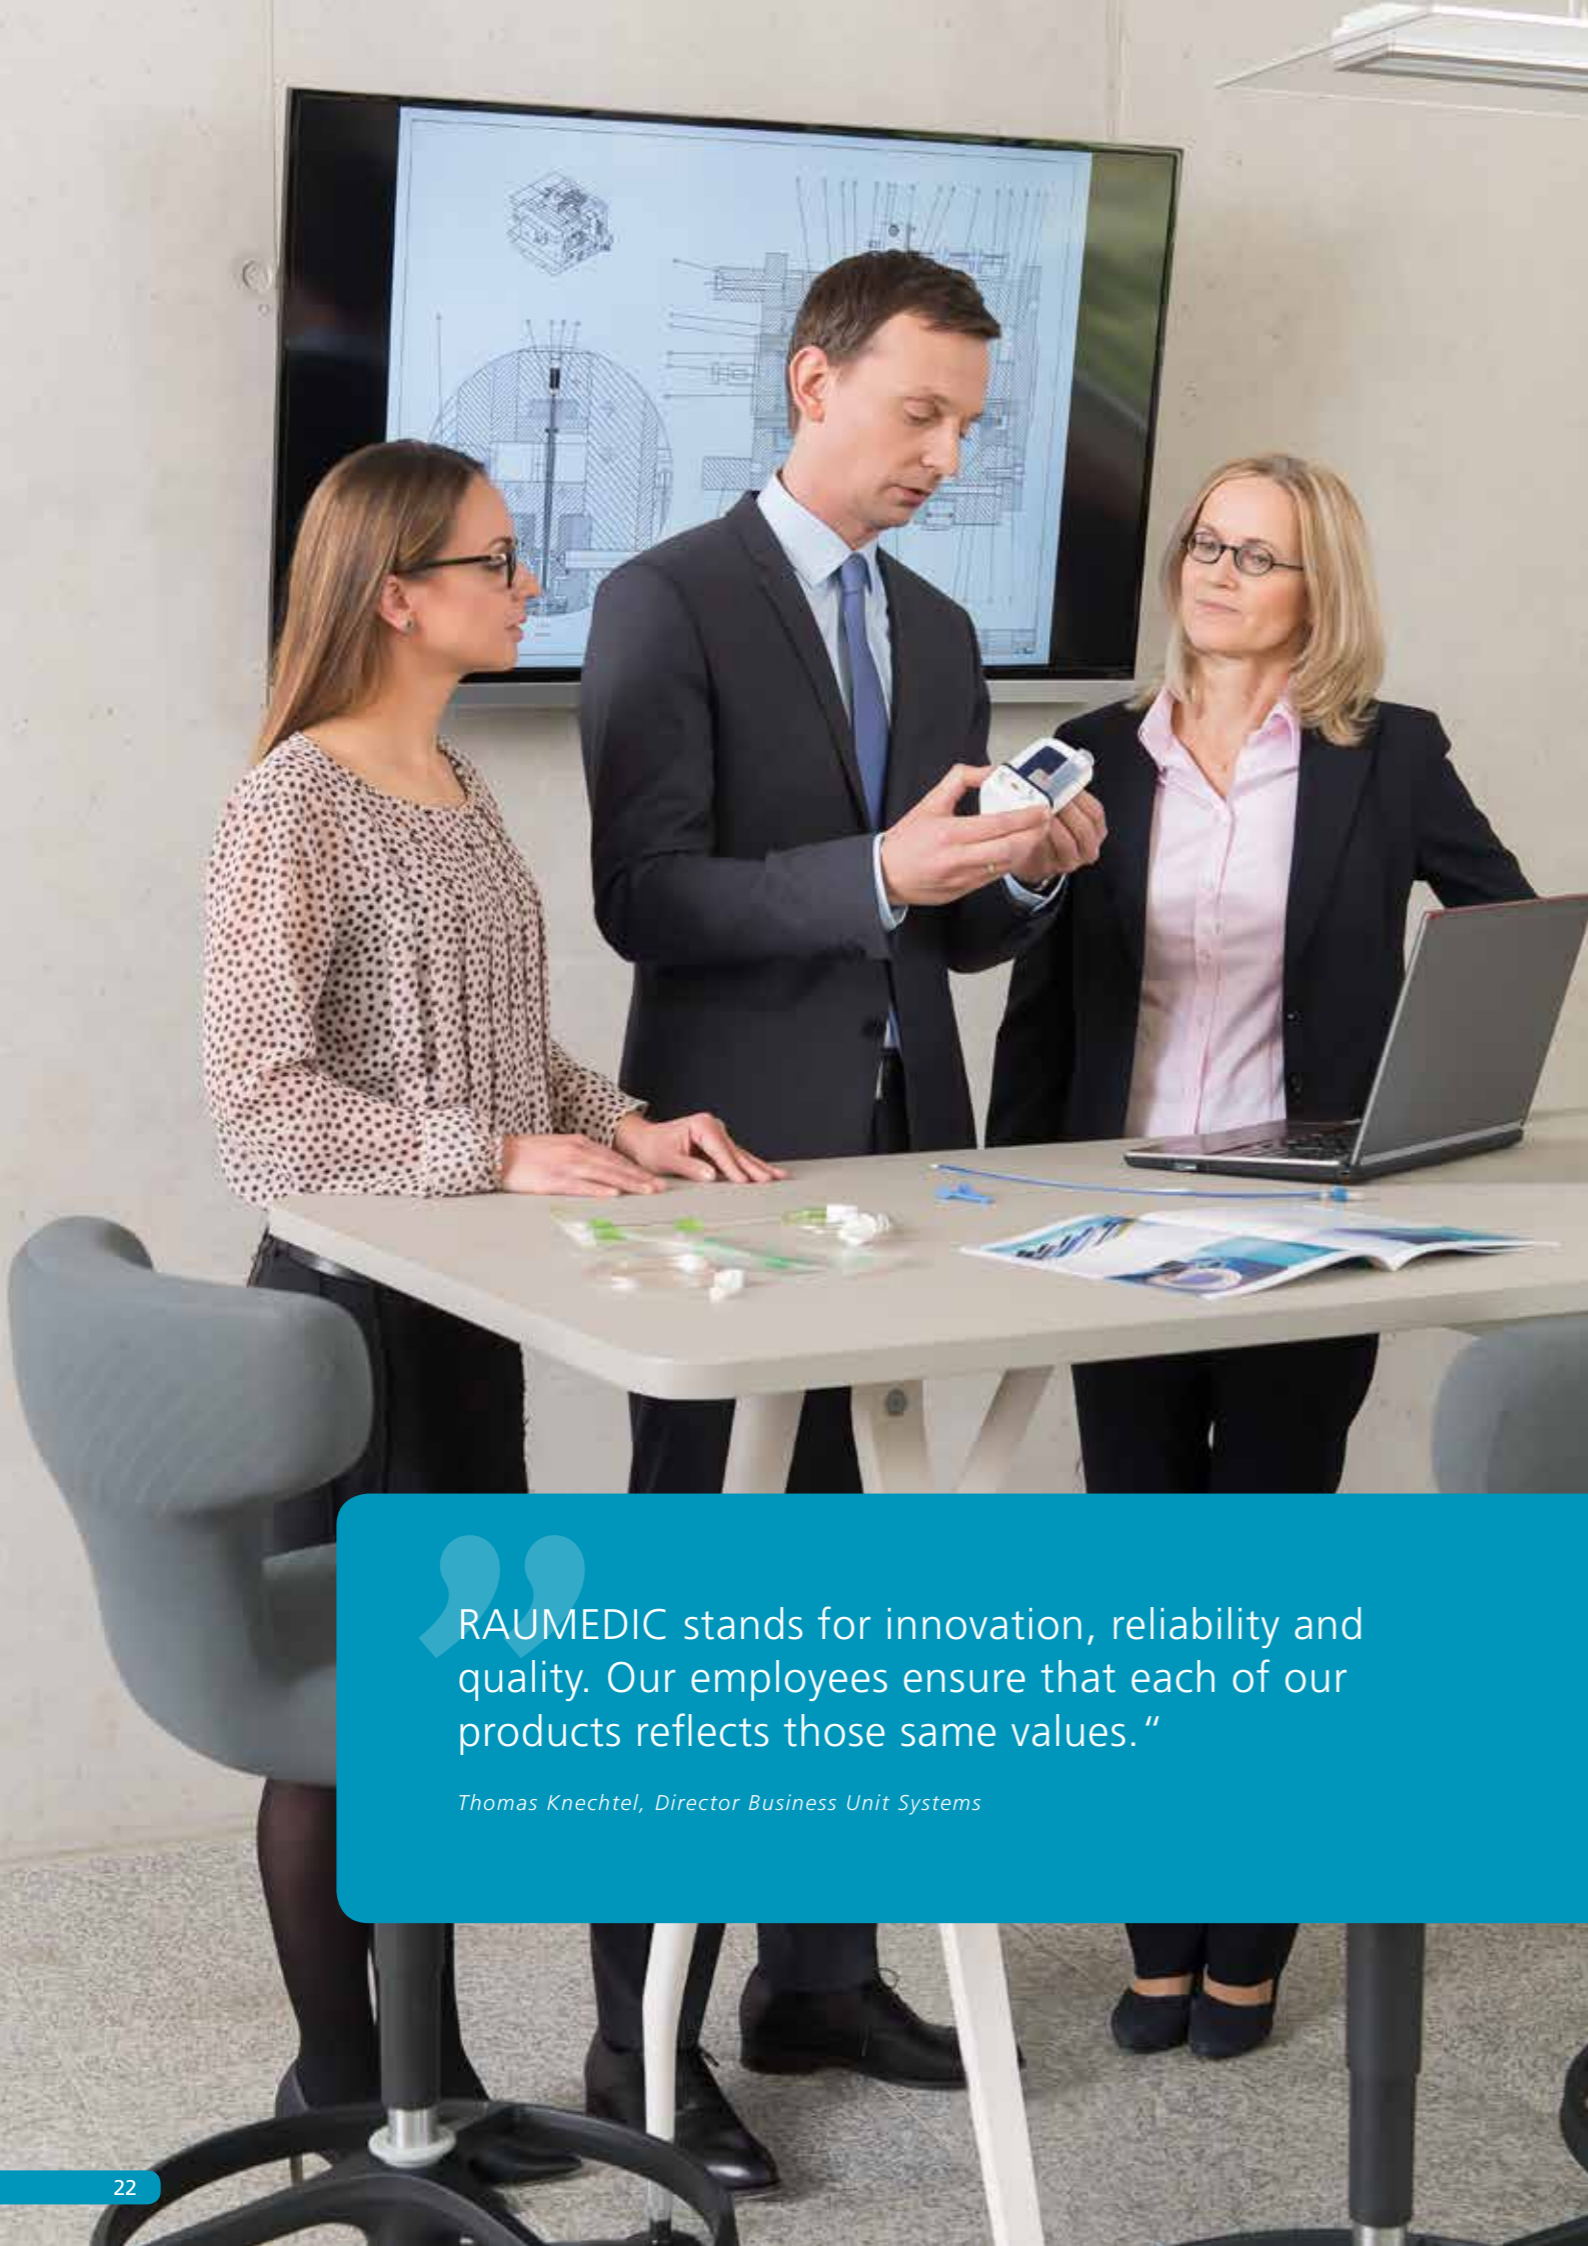

Reliability is our way of working responsibly. Therefore you can always trust in the long-standing high quality of the materials we use in validated manufacturing processes. Thanks to our high degree of flexibility and responsiveness, we can successfully carry out projects in a target-oriented and conscientious way jointly with you.

As an integral part of the global, family-run REHAU group, we are your competent partner you can rely on.

A photograph of a man with grey hair, glasses, and a mustache, wearing a dark suit, light blue shirt, and striped tie. He is looking towards a woman whose profile is visible on the left side of the frame. The woman is wearing a grey blazer and large hoop earrings. They appear to be in an office or laboratory setting.

“Reliability creates trust – that is our understanding of long-term collaboration and customer-focused project management.”

Dr. Ralf Ziembinski, Director Business Unit Tubing

Behind each individual RAUMEDIC product there are people who are committed to exceptional performance.

People

RAUMEDIC's know-how is built up by the sum of all of its experienced employees. That is why we attach great importance on promoting and continuously developing their talents and skills.

Based on the value-oriented corporate culture of a family-run company, we offer our employees the best possible opportunities for innovative work, as – despite all of the technology – it is still the people who make the difference.

“RAUMEDIC stands for innovation, reliability and quality. Our employees ensure that each of our products reflects those same values.”

Thomas Knechtel, Director Business Unit Systems

Our international character
has its roots in Bavaria.

Proximity

The heart of RAUMEDIC is located in Europe's geographical center. Our roots lie in Helmbrechts, Germany, in the Bavarian region of Upper Franconia, and extend all the way to Mills River, North Carolina, where our second production facility is situated. The staff at both our locations employ their expertise to develop and manufacture products for worldwide usage – always keeping in mind sustainability and healthy growth which are particularly important to us. Our global sales network with regional branches guarantees a fast contact to competent experts locally.

Contact us, we look forward to building a professional partnership with you."
