FRESH AIR

We've got a new team this year,
called life & balance.
It's our job to provide our customers with even
more comprehensive advice, especially when
it comes to cosmetics and lifestyle packaging.

Feel free to get in touch with us if you have
any packaging-related questions.

– I am here for you.

THIS IS US

RIXIUS AG

Rixius is a medium-sized glass, plastic, and tinplate packaging supplier from the German town of Mannheim.

Our product range includes bottles, cans, canisters, buckets, drums and the relevant lids/closures.

Throughout our 150 years in business, we've been able to gain a great deal of experience in packaging and closure solutions. It's this expertise that allows us to give our clients such comprehensive advice.

Our wonderful team of 80 experienced professionals is here to help answer any questions you may have and to come up with a solution to all of your packaging problems.

Our goal is to build long-term relationships with our customers based on trust and quality service.

COSMETICS

High quality dispenser systems – Our clear and brown PET bottles are available in many different sizes, ranging from 30ml to 1000ml. Combined with our very own creme pumps, you're guaranteed to use just the right amount of your lotions, soaps, or shampoos, for example.

Pharma Veral PET bottle brown,
Tall Boston Round PET bottle clear.

Also available:
Various pump dispensers

Rich oils and high-quality ingredients are essential when it comes to skincare. Our brown and clear glass tincture bottles offer the best protection for these kinds of sensitive ingredients. Plus, with our pipettes, they guarantee you always use the right amount. Our PET and HDPE finger sprayers are perfect for your skincare routine.

Images on this page:
All-round bottles (glass) in clear or brown,
Cylindrical round bottle (HDPE) in white,
Tall Boston Round (PET) in clear.

Also available:
Drop, brush, and pipette tops, as well as finger sprayers.

“ I AM MADE OF rPET ”

Our elegant bottles made out of recycled PET are great for shower gels, body oils, or kinds of lotions, for example. With our impressive range of closures available, you have a wide range of dosage/application options.

Tall Boston and Boston Round clear and black.

Also available:
with sprayer, screw, hinged, or rocker closure.

Our robust round bottles made of HDPE can be used universally thanks to a variety of closure options for nail polish remover, cleansing foam, facial toner, shampoos or shower gels, for example.

cylindrical bottles(HDPE), clear or white.

Also available:
with screw caps, finger sprayer, foamer or sprayer.

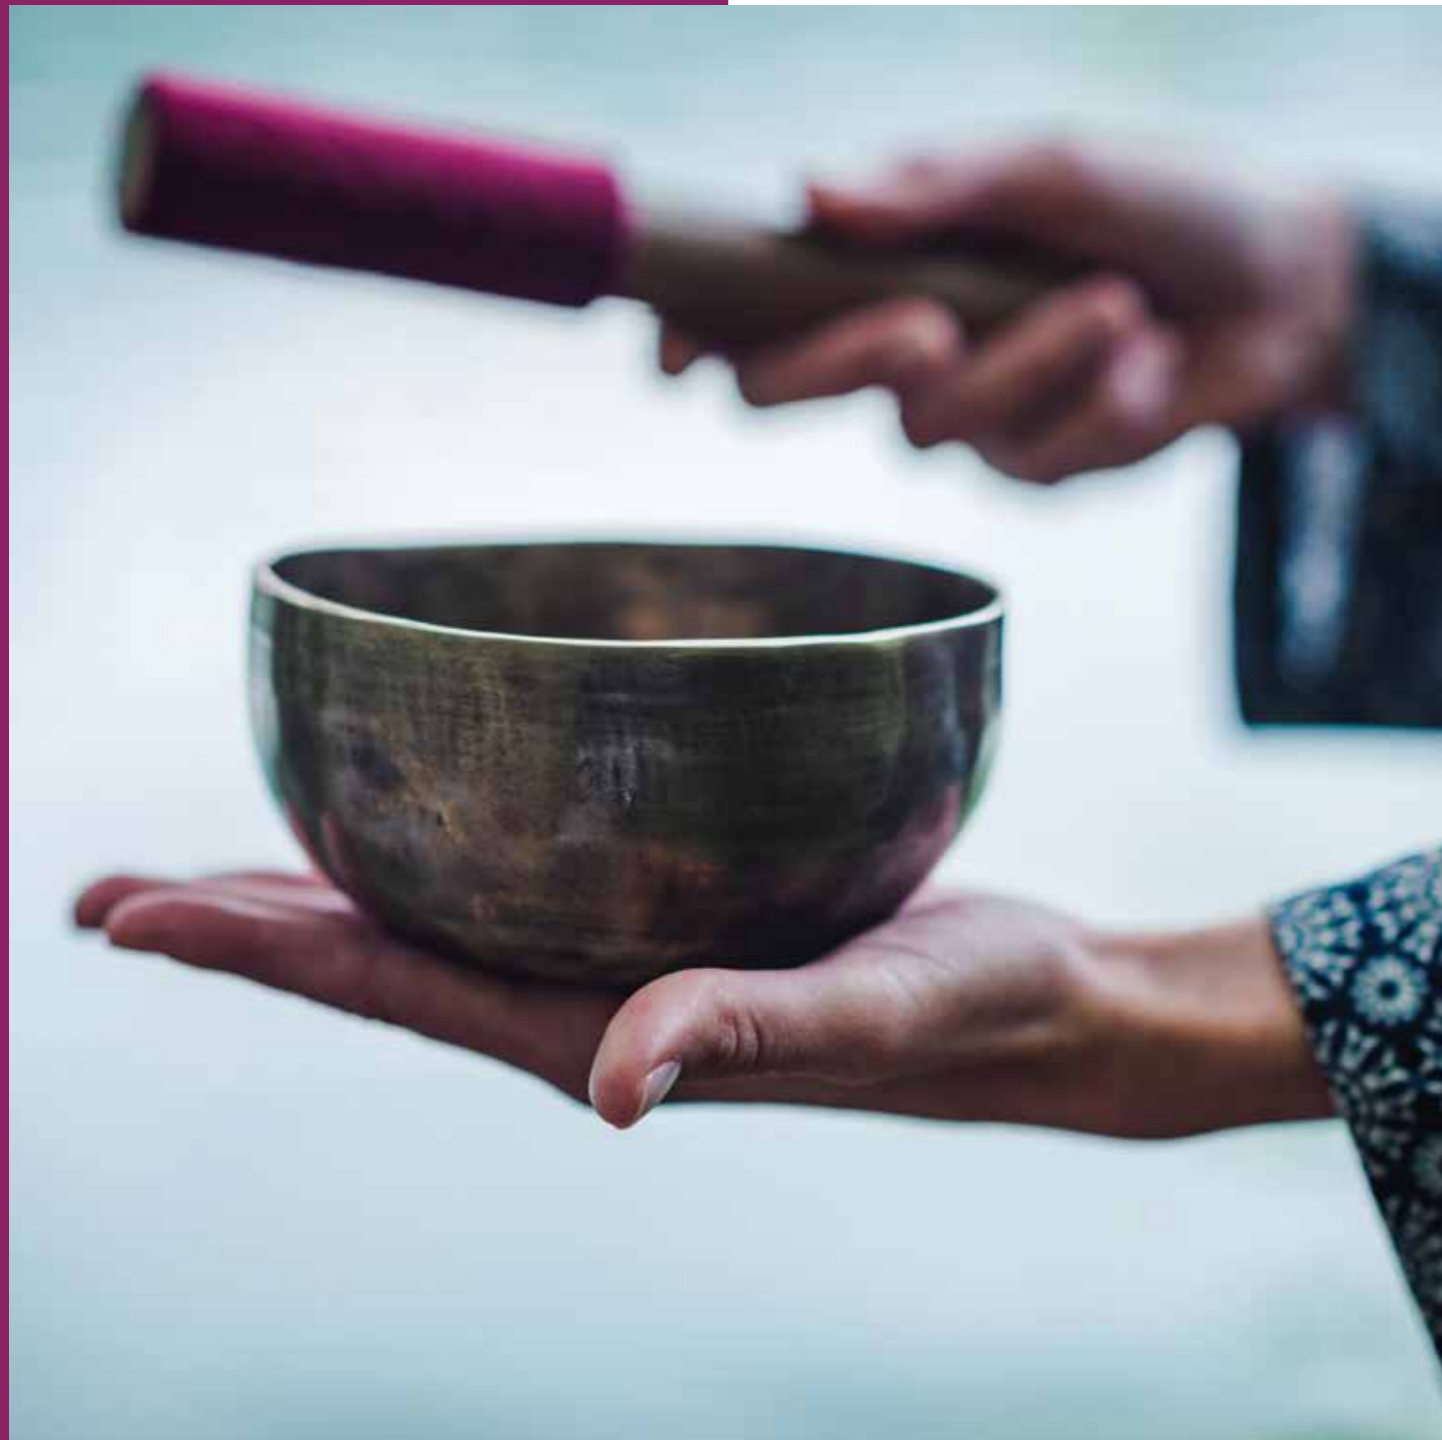

A cosmetics classic – Thanks to its very large opening, contents can be used very easily. Our Malve series of cosmetics tubs are double-walled with an inner semicircular base. This allows for creams to be emptied easily. For those of you who'd like to see what's inside, our glass jar paired with an elegant black screw cap and insert is a perfect choice.

All of our cosmetic jars are ideal for face and hair masks, body butter, peelings, or rich body creams.

and black screw cap.*

**NATURAL
REMEDIES**

“ I AM MADE OF rPET ”

A major part of homeopathy and natural cosmetics is dealing with essences and sensitive ingredients. Packaging for such goods needs to be flexible, and capable of a lot - just like our pharmacy bottles made of either amber or clear glass. Perfect for essences, samples, and aromatherapy.

Images on this page:

All-round bottles in clear, brown, or blue.

Also available:

Drop, brush, and pipette tops, as well as finger sprayers.

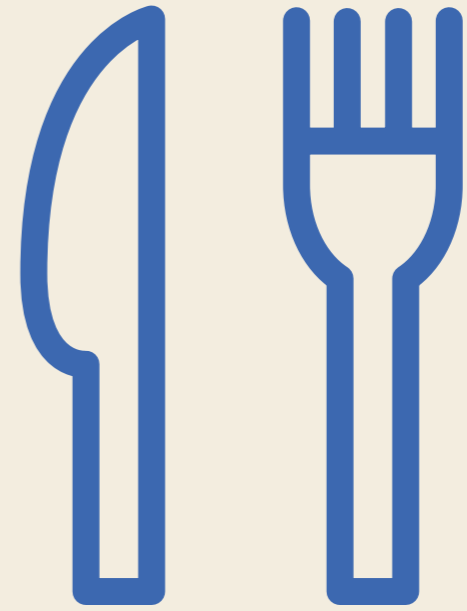

Essential oils are the cornerstone of aromatherapy – what could be more natural than air fresheners?

Our airless dispensers are ideal for this. They produce a wonderfully light and fine spray, so the dosage is particularly economical. They can also be emptied almost completely.

But also our other, somewhat cheaper, spray bottles made of high quality PET are perfect for spraying natural air fresheners, body sprays, or even insect repellents.

Airless dispenser with a white or black sprayer; Boston Round and Tall Boston Round in clear or black.

FOOD

“ WE ARE ALL BIO-DEGRADABLE...”

“ ...AND WE ARE MADE OF rPET!”

Our high-quality range of beverage bottles are made of glass or from renewable raw materials, just like our PLA bottles.

Glass beverage bottles are perfect for filling with hot liquids.

Our twist-off closures create a vacuum between the filling and the lid, ensuring a maximum shelf-life. So, selling your BBQ sauces or soups in these kinds of bottles is super trendy right now.

PLA plastic bottles are perfect for all kinds of cold liquids and still drinks, like juices, smoothies, milk, or water, for example. Whipped creams and salad dressings are also stored perfectly.

Images on this page:

*Glass bottles, clear;
PLA plastic bottles;
rPET bottles*

Our brown-coloured glass bottles also protect light-sensitive goods from the sun and protecting them from spoilage.

With their distinctive shape, Meplat bottles are often used for storing special products, such as liqueurs, syrups, oils, sauces, and vinaigrettes. Essence bottles are perfect for valuable and highly concentrated liquids such as aromatic oils, extracts, and essences.

Essence bottles, brown*

Our stand-up pouches with practical pressure closures are a particularly attractive and durable packaging option. Made from kraft paper with an inner coating, they are completely biodegradable. They are also often used for teas and spices or other finely ground, powdery, and aromatic products.

For all other delicacies such as jam, honey, pies, sauces or soups, our twist-off glasses are perfect. They can be filled hot or cold, they seal aromas in and are filling resistant.

FOOD SUPPLEMENTS

Attractive packaging is extremely important when it comes to sales.

Packaging also needs to be modern and easy to use. In addition, product packaging must protect its contents from what's outside – this is particularly important for food supplements and sports nutrition.

We offer a wide range of packaging for different dosage forms, types of use, and amounts – be it powders such as whey pro-

tein and beverage powders, or tablets and capsules in the form of vitamins and minerals.

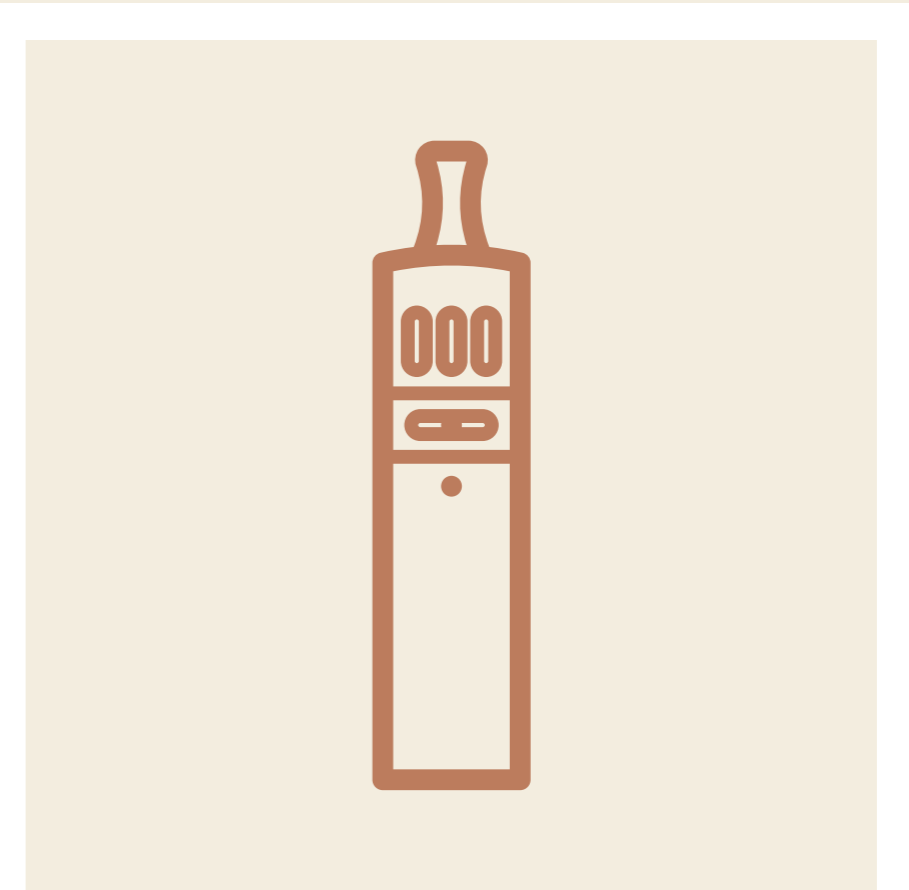

Illustrations on this double page:

Plastic cans made of HDPE or PP with screw caps;

Round containers in brown or clear, made of PET with screw or guarantee lids.

Round containers with screw caps made from HDPE in white and clear (available coloured when ordered in larger quantities), Slip lid tins made of PP.

VAPE

Our base bottles made of PET are ideal for filling and storing individual liquid mixtures. These light, yet very robust bottles make for easy storage and ensure a long shelf life for base liquids.

All of our base bottles are recyclable, odourless and tasteless, and are made without plasticisers, meaning that liquid aromas are perfectly preserved.

Thanks to our push and pull closures available in various colours, you don't need to use funnels during bottling.

Our milky-transparent mixing bottles are made of LDPE and are resistant to bases, acids, and alcohols. The bottles' soft plastic makes it easy to mix and fill with bases and flavours.

Our HDPE mixing bottles are even more robust. They are made of physiologically harmless plastic and are resistant to bases, acids, and alcohols.

These bottles are supplied with a thin dosing tip for easy and precise drip dosing.

Optional e-liquid accessories available:

Push and twist locks, funnels, or dosing cups.
