YOUR LEISURE, OUR PLEASURE

For devotees of aesthetic refinement our dedicated team has created a line of exceptional outdoor furniture. The successful blend of precision and functionality is aimed at fulfilling each and every wish of our discerning customers. Indeed, your leisure is our pleasure.

Pour les adeptes de l'esthétisme, notre équipe a créé une ligne exceptionnelle de mobilier de jardin. Un savant mélange de précision et de fonctionnalité vise à satisfaire chacun des désirs de nos clients. En effet, votre loisir est notre plaisir.

Für begeisterte Anhänger der ästhetischen Verfeinerung hat unser engagiertes Team eine Linie außergewöhnlicher Gartenmöbel erschafft. Die erfolgreiche Mischung aus Präzision und Funktionalität ist auf die Erfüllung jedes einzelnen Wunsches unserer privilegierten Kunden ausgerichtet. In der Tat, Ihre Freizeit ist unser Vergnügen.

Voor liefhebbers van esthetische verfijning, heeft ons toegewijd team een collectie uitzonderlijke buitenmeubelen gecreëerd. De succesvolle samensmelting van precisie en functionaliteit is gericht op het ver vullen van iedere wens van ons geprivilegieerd cliënteel. Inderdaad, uw vrije tijd is onze passie.

Per gli appassionati della perfezione estetica abbiamo creato una linea di mobili da giardino eccezionali. L'insieme di precisione e funzionalità è finalizzato a soddisfare ogni singolo desiderio della nostra clientela privilegiata. Il Vostro tempo libero è la nostra passione.

Para los más exigentes en cuanto al diseño, nuestro equipo ha creado una línea excepcional de muebles de exterior. La lograda mezcla entre precisión y funcionalidad va dirigida a cumplir cada uno de los deseos más exigentes de nuestros privilegiados clientes. Efectivamente, su ocio es nuestra dedicación.

OUR DESIGNERS

The design of a product determines its DNA, and is therefore the most important step in its conception. With this in mind, we engage the talents of carefully selected external designers to complement the work of our in-house design team. The result is a wide range of characterful products, rich in variety and always stylish and refined.

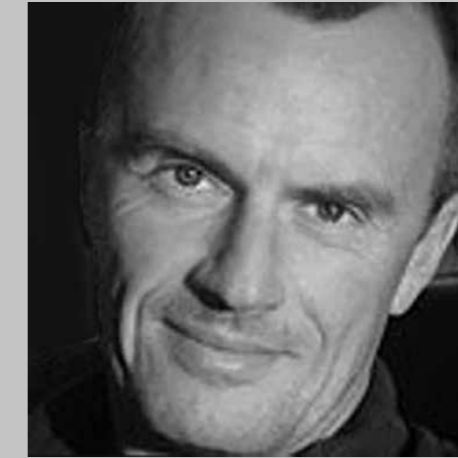

Frank Boschman
Vigor, Tea Time, Lusit collections

Le design d'un produit définit son ADN. C'est donc l'étape cruciale de sa conception. Bien conscients de cela, nous faisons appel aux compétences de designers extérieurs soigneusement sélectionnés qui travaillent en complément de notre équipe interne de création. Il en résulte une importante collection de créations pleine de caractère, variée, toujours élégante et raffinée.

“GOOD DESIGN IS A LANGUAGE, NOT A STYLE”

Massimo Vignelli
1931-2014

Het ontwerp van een product bepaalt het DNA ervan, en is daarom de meest belangrijke stap in zijn totstandkoming. Met dit in gedachten, vragen we aan nauwkeurig gekozen externe ontwerpers, om samen met ons intern ontwerpersteam het ontwerp verder op punt te stellen. Dit resulteert in een uitgebreid gamma van karakteristieke producten, zeer gevarieerd en immer stijlvol en verfijnd.

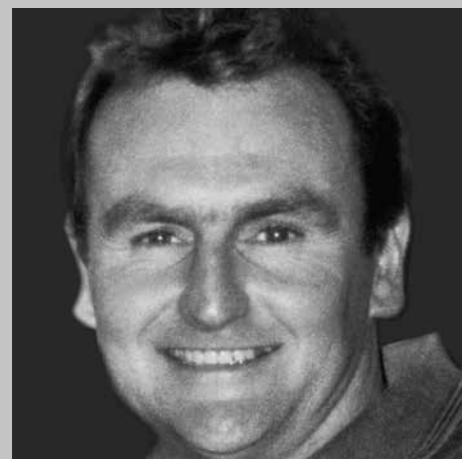

Pierre Stelmazyk
New England collection

Kris Van Puyvelde
Alura, Beacher, Del Rey, Discus, Folia, Ixit, Jive, Lazy, Lusit, Ninix, O-Zon, Qt, Taboela, Twist, U-Nite, Xqi, Zenhit, Zidiz, Palma collections

Il design di un prodotto determina il suo DNA ed è quindi il passo più importante nella sua concezione. Per questo motivo integriamo i talenti di designers esterni, attentamente selezionati, al lavoro del nostro team di progettazione interno. Il risultato è una vasta gamma di prodotti caratteristici, variegati e sempre eleganti e raffinati.

Olivier Le Pensec †
Kokoon collection

Das Design eines Produktes bestimmt seine DAN, und ist deshalb der wichtigste Schritt in dessen Entwicklungsprozess. Mit diesem Hintergedanken engagieren wir talentierte und sorgfältig ausgewählte externe Designer, um die Projekte unseres IN-House-Designteams zu ergänzen. Dadurch haben wir eine Reihe von aufregenden Produkten und eine sehr große Varietät von unterschiedlichen Stilen, die jedoch immer sehr geschmackvoll und raffiniert sind.

Mathias De Ferm
Traverse collection

Gustav Störm
Wave collection

El diseño de un producto determina su ADN, por lo tanto, es el paso más importante en su creación. Con esto en mente, contratamos los talentos de diseñadores externos cuidadosamente seleccionados para complementar el trabajo de nuestro equipo de diseño interno. El resultado se traduce en una amplia gama de productos característicos, ricos en variedad y siempre elegantes y refinados.

Erik Nyberg
Wave collection

SPECIFICATIONS

You want to find out more ? Not just about size and specification but also about the beautiful materials these Royal Botania pieces are made of? You will probably find the answers to your questions here, if not, your Royal Botania dealer will be happy to help you.

Vous voulez en savoir plus? Pas seulement sur les dimensions et quelques spécificités mais aussi sur la qualité des matériaux des produits Royal Botania? Vous trouverez ces réponses à vos questions ici, sinon votre revendeur Royal Botania sera ravi de vous aider.

Möchten Sie mehr über die Maße, Ausführungen und Qualität, der von Royal Botania verwendeten Materialien erfahren? Die ersten Antworten finden Sie auf den folgenden Seiten. Für weitere Fragen steht Ihnen Ihr Royal Botania Händler jederzeit zur Verfügung.

U wil meer te weten te komen niet alleen betreffende de afmetingen en specificaties, maar tevens betreffende de prachtige materialen waaruit deze Royal Botania meubelen vervaardigd zijn? Waarschijnlijk vindt U hier de antwoorden op uw vragen, en zoniet zal uw Royal Botania dealer U graag voorthelpen.

Volete saperne di più circa i bellissimi materiali che Royal Botania usa per creare questi prodotti? Probabilmente qui troverete le risposte alle Vostre domande, altrimenti il Vostro rivenditore Royal Botania sarà lieto di aiutarVi.

Quiere saber más no solamente sobre las medidas y las especificaciones, pero también sobre las espléndidas materiales de los muebles Royal Botania? Es muy probable que encuentre aquí respuestas a sus preguntas, y sino, su distribuidor le ayudará con mucho gusto.

IMPORTANT INFORMATION

AVAILABILITY

STANDARD

Of these products we keep an inventory based on expected sales quantities.

ON REQUEST

Limited or no inventory. Delivery time of these products is on demand. Consult us for lead time.

CUSHIONS

Cushions are always on request. Average lead time is three weeks, but can vary in high season. For some modular lounge collections we have a 'standard' offer of cushions of which we will keep inventory.

We offer three price categories for the cushions:

- Standard cushion price for lounge collections.
5 or 6 standard category B fabrics with special price.
- Price for category A fabrics.
Colors can be found on page 270.
- Price for category B fabrics.
Colors can be found on pages 270 - 273.

PRICES

All prices shown are per piece, unless indicated otherwise.

FEATURES

- Brushed stainless steel body
- Nylon wheels and detachable handle for moving around on the terrace
- To be filled with gravel for added weight
- Polished stainless steel tube included

CARACTERISTIQUES

- Socle et tube en acier inoxydable poli
- Roulettes en nylon dur et manivelle démontable, facilitant le déplacement
- A remplir avec gravier pour augmenter le poids
- Tube en acier inoxydable poli inclus

SPEZIFIKATIONEN

- Korpus aus gebürstetem Edelstahl
- Nylonbereifung und ein abnehmbarer Griff für die freie Beweglichkeit
- Wird mit Kies befüllt, um das Gewicht zu erhöhen
- Hülse aus gebürsteten Edelstahl inklusiv

23 kg / 50,7 Lbs + balast

KENMERKEN

- Behuizing geslepen roestvrij staal
- Nylon wielen en afneembaar handvat voor een eenvoudige verplaatsing
- Te vullen met kiezel voor extra gewicht
- Buis in geslepen roestvrij staal inbegrepen

CARATTERISTICHE

- Corpo in acciaio inox
- Ruote in nylon staccabili manualmente per facili spostamenti
- Essere riempito con ghiaia per aggiungere peso
- Tubo in acciaio inox spazzolato incluso

CARACTERISTICAS

- Cuerpo en acero inoxidable pulido
- Ruedas de Nylon y mango desmontable para mover por la terraza
- Para rellenarse con grava para pesa adicional
- Tubo en acero inoxidable pulido incluido

- Copertura en acero inoxidable y aluminio recubiertos
- Ruedas de Nylon y mango desmontable para mover por la terraza
- Peso en hormigón incluida

MAINTENANCE

TEAK / TECK / TEAKHOLZ / TEAK / TEAK / TECA

TEAK CLEANER

REF: TEAC - 500ML: •

- POWERFUL CLEANER: for removal of all stains and dirt on teakwood
- NETTOYANT PUISSANT: pour le traitement des taches et toutes les salissures sur le teck
- KRAFTVOLLER REINIGER: zur Beseitigung von Flecken und allen Verunreinigungen auf Teakholz
- KRACHTIGE REINIGER: voor de behandeling van vlekken en alle soorten bevuilding op teakhout
- POTENTE LIMPIADOR: para eliminar manchas y suciedad en madera de teca
- POTENTE DETERGENTE: per la rimozione di tutte le macchie e della sporcizia dal teak

TEAK SEALER

REF: TEAS - 500ML: •

- Long-term protection against weathering and graying
- Protection contre décoloration et grisaillement
- Beinhaltet Teakfarbe, schützt langanhaltend gegen silbergraue Patina
- Langdurige bescherming tegen verwerking en vergrijzen
- Protección de larga duración contra el desgaste y la pérdida de color
- Protezione a lungo termine dagli agenti atmosferici e dall'ingrigimento

TEAK RENOVATOR

REF: TEAR - 500ML: •

- Restoration of discoloured teak
- Renover le teck décoloré
- Restoriert graues Teakholz
- Hernieuwen van vergrijsd teak
- Renovador de la teca desgastada
- Rinnovo il teak grigio

TEAK PROTECTOR

100% polyester EVA coated waterproof fabric, weight: 200gr/m² color: CAU

BATYLINE

The slings on metal framed chairs and loungers are made of Batyline® fabrics, a woven polyester fibre protected by a PVC coating. This coating guarantees exceptional resistance to climatic conditions and UV exposure. The fact that there is no moisture absorption results in quick-drying action, little sensitivity to staining, and simplicity in cleaning. Les toiles des sièges et chaises longues en métal sont réalisées en Batyline®, une fibre de polyester recouverte d'un revêtement en PVC et tissée. Le revêtement synthétique est garant d'une résistance exceptionnelle aux UV et aux conditions climatiques. Vu qu'elle n'absorbe nullement l'humidité, cette matière sèche rapidement, se tache difficilement et est facile à nettoyer. Stühle, Sessel und Liegen mit Metallgestell sind mit Batyline-Gewebe, einer gewobenen Polyesterfasen mit PCV-Beschichtung, Gespannt. Die Kunststoffbeschichtung garantiert eine extreme Wetter- und UV-Beständigkeit. Das hat zur Folge, dass das Gewebe schnell trocknet, unempfindlich auf Flecken reagiert und einfach zu reinigen ist. Voor de zit- en rugbespanning van onze stoelen en ligbedden maken wij gebruik van Batyline® weefsel, een polyestervezel die wordt voorzien van een PVC-coating en vervolgens geweven. De kunststof coating staat garant voor een uitzonderlijke weer- en UV bestendigheid. Het feit dat geen vocht wordt opgenomen resulteert in een snelle droging, geringe vlekgevoeligheid, en eenvoudige reiniging. I teli delle poltrone e dei lettini con strutture in metallo sono realizzati in tessuto batyline®, una fibra di poliestere rivestita di PVC e tessuta. Il rivestimento sintetico è garante di una resistenza eccezionale agli UV e alle condizioni climatiche. Dato che non assorbe l'umidità, questo materiale si asciuga rapidamente, si macchia difficilmente ed è facile da pulire. Para el asiento y la espalda de nuestras sillas utilizamos batyline® tejido, una fibra de poliéster se dota de un recubrimiento de PVC antes de tejerse. El recubrimiento sintético garantiza una excepcional resistencia a las condiciones meteorológicas y a los rayos UV. El que no absorba humedad, hace que se seque rápido, sea muy poco sensible a las manchas y se limpie fácilmente.

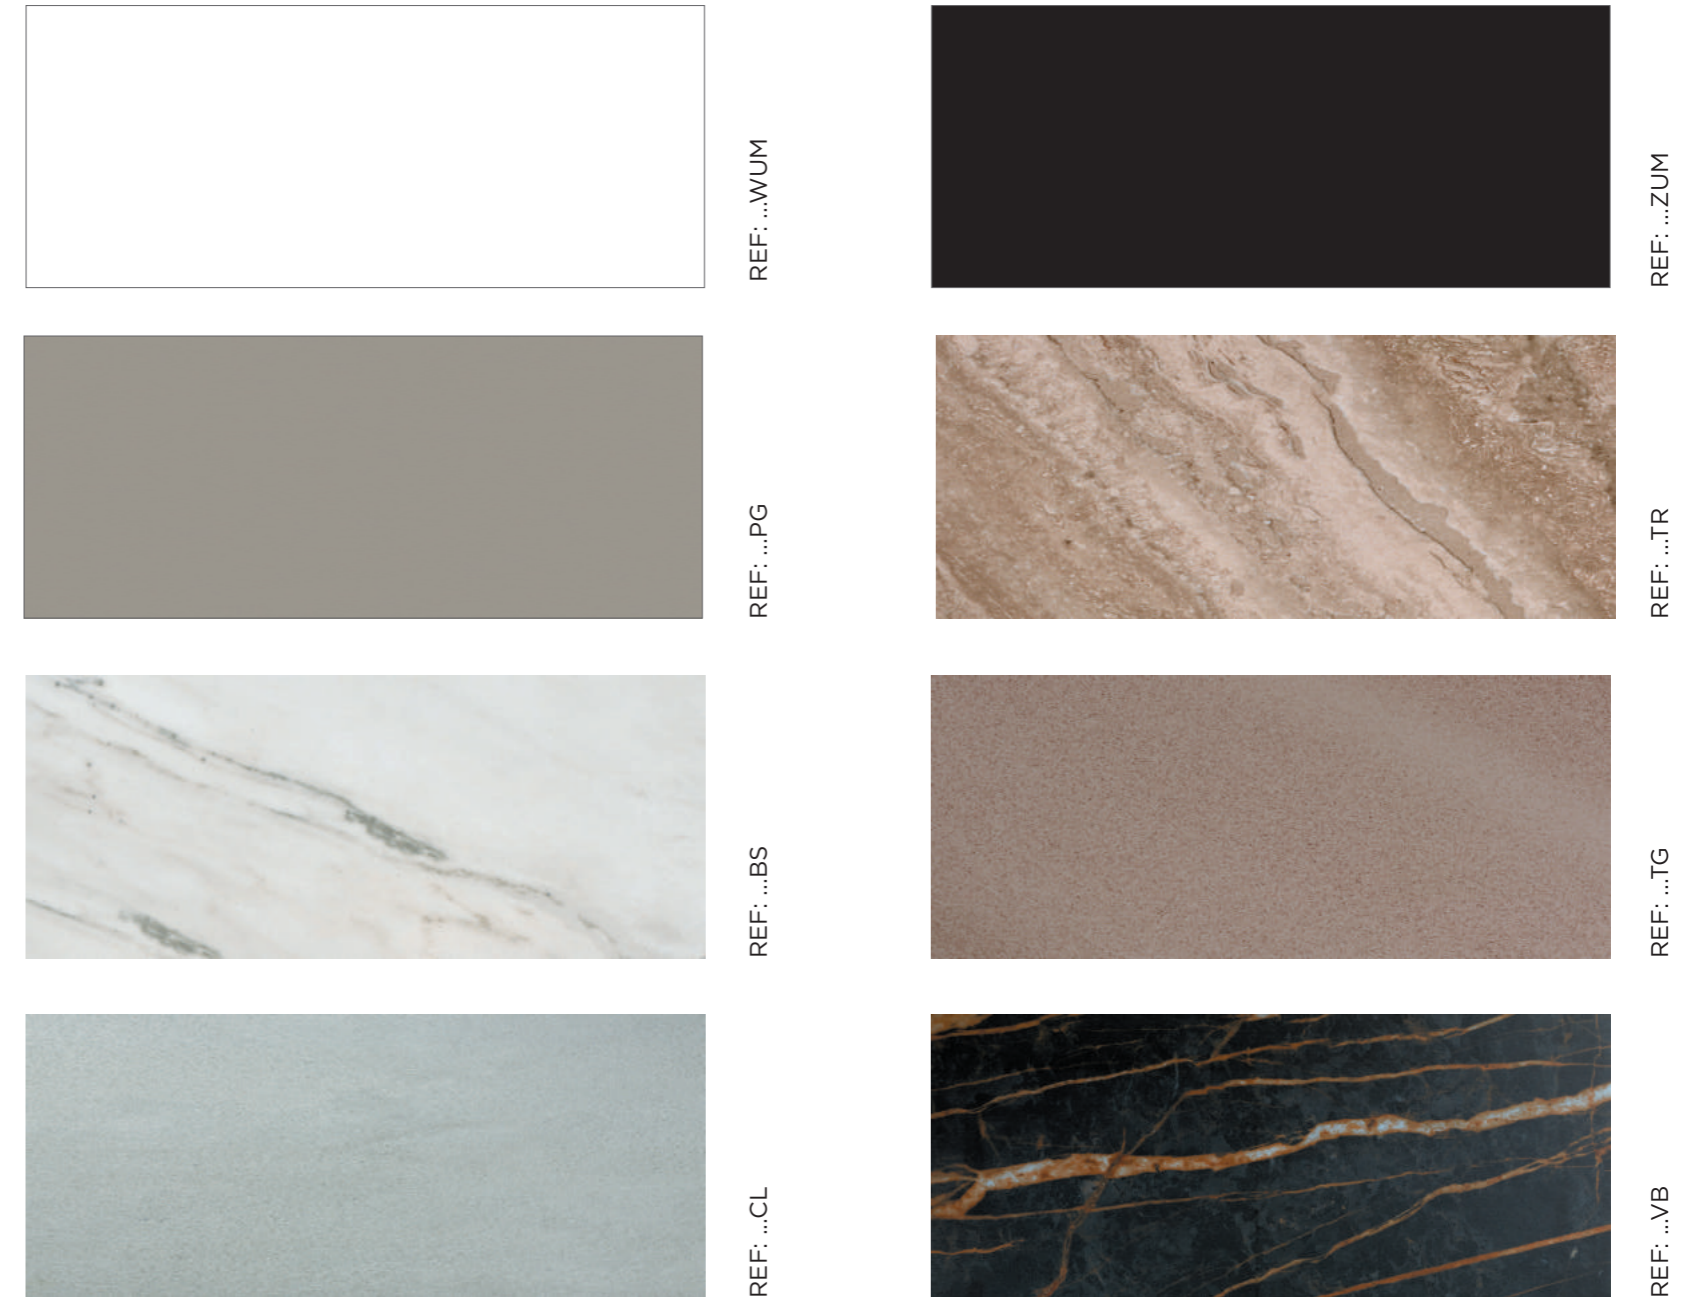

OLEFIN FIBRE

(For JIVE & TWIST collection only)

Olefin fibre is a synthetic fibre made from polyethylene. The advantage of this fibre is its strength, colour fastness and comfort. Also it is very resistant to staining and different weather conditions. La fibre d'oléfine est une fibre synthétique faite à partir de polyéthylène. Ses avantages sont sa force, résistance des couleurs et son confort. Elle est également très résistante aux taches et aux différentes conditions météorologiques. Olefin-Faser ist eine synthetische Faser aus Polyethylen. Vorteile dieser Faser sind Widerstandsfähigkeit, Farbbeständigkeit und Komfort. Zudem ist Olefin fleckenabweisend und wetterbeständig. De olefin vezel is een synthetische vezel van polyethylen. De voordelen van deze krachtige vezel zijn het comfort en de kleurvastheid. Daarnaast is deze vezel ook zeer goed bestand tegen vlekken en verschillende weersomstandigheden. La fibra Olefin è una fibra sintetica a base di polietilene. I pregi di questa fibra sono la sua resistenza, la stabilità del colore e il comfort. È inoltre molto resistente alle macchie e alle diverse condizioni atmosferiche. La fibra de olefina es una fibra sintética hecha de polietileno. La ventaja de esta fibra es su fuerza, solidez del color y comodidad. También es muy resistente a manchas y a las diferentes condiciones climáticas.

CERAMIC

The table tops are made from natural material which means small color gradations can occur. This is typical to ceramic which makes each table unique. Les plateaux sont faits d'un matériau naturel et donc des petites différences de couleur peuvent se produire. Cela est inhérent à la céramique et fait chaque tableau unique. Die Tischplatten sind aus einem natürlichen Material produziert, wodurch leichte Farbunterschiede auftreten können. Das ist eigen an dem Material Keramik und macht jeden Tisch zu einem einzigartigen Produkt. De bovenbladen worden vervaardigd uit een natuurlijk materiaal waardoor kleine kleurverschillen kunnen optreden. Dit is eigen aan het materiaal keramiek en maakt elk tafel uniek. I piani dei tavoli sono prodotti con materiali naturali quindi ci potrebbero essere delle piccole differenze di colore. E' una caratteristica tipica della ceramica e rende ogni tavolo un pezzo unico. Los tableros están fabricados de un material natural, lo que significa que puede haber pequeñas diferencias de color. Esto es propio de la cerámica y hace que cada tablero sea único.

STAINLESS STEEL

Stainless steel is a ferrous alloy with increased corrosion resistance due to the addition of chrome and nickel. Chlorine the greatest enemy of RFS and can cause a type of corrosion known as “pitting”. For this reason, it is recommended that in coastal locations the metal be given as smooth a surface as possible in order to further increase its resistance to corrosion. The furniture frames of the Wave and QT collections are supplied with an electropolished finish as standard. For the Ninix and O-Zon ranges we recommend the optional electro-polishing treatment of the frame if it is to be used in a corrosive environment. **L’acier inoxydable est mieux connu sous le nom d’inox. Il s’agit d’un alliage de fer dont la résistance à la corrosion est accrue par ajout de chrome et de nickel. Le chlore est le principal ennemi de l’inox et peut provoquer une corrosion par piqûres ou perforante. C’est la raison pour laquelle à proximité de la côte (le sel marin est en effet du chlorure de sodium), il est conseillé de polir au maximum la surface du métal afin d’augmenter encore la résistance à la corrosion. Les cadres des meubles des collections WAVE et QT subissent une electropolissage. Pour les gammes NINIX et O-ZON pour tout usage en milieu corrosif, nous conseillons l’electropolissage du cadre du meuble, proposé en option. Rostfreier Stahl auch als Edelstahl bekannt, besteht aus einer Eisenlegierung, bei der die Korrosionsbeständigkeit erhöht wurde durch die Hinzufügung von Chrom und Nickel. Chlor ist der größte Feind des Edelstahls und kann Korrosion in Form von Vertiefungen, bekannt als ‚pitting‘ verursachen. Darum ist es in Küstennahe angewiesen, um das Metall eine so glatt wie mögliche Oberfläche zu geben, um die Korrosionsbeständigkeit noch weiter zu verbessern. Die Gestelle der Kollektionen Wave und QT sind immer elektroliert. Für die Kollektion Ninix und O-Zon raten wir deshalb an, um die Möbel in einem korrosiven Milieu extra elektrolytisch zu polieren. Roestvast staal is beter bekend als RVS of Inox. Het betreft een ijzerlegering, waarbij de corrosiebestendigheid verhoogd wordt door toevoeging van chroom en nikkel. Chloor is de grootste vijand van RVS en kan putvormige corrosie, gekend als “pitting” veroorzaken. Om die reden is het in de nabijheid van de kust aangewezen, het metaal een zo glad mogelijk oppervlak te geven, teneinde de corrosiebestendigheid nog verder op te voeren. De frames uit de collecties Wave en QT worden standaard geëlectropolijst. Voor de collecties ninix en O-Zon adviseren wij voor toepassing in een corrosief milieu het optioneel elektrolijsten van het meubelframe. L’acciaio inossidabile è una lega di ferro la cui resistenza alla corrosione è aumentata con l’aggiunta di cromo e nichel. Il cloro è il principale nemico dell’acciaio inox, e può causare una corrosione puntiforme, detta “pitting”. Per questo, in prossimità del mare, è raccomandabile che la superficie del metallo sia molto ben levigata, al fine di aumentare ulteriormente la sua resistenza alla corrosione. Le strutture delle collezioni Wave e QT sono fornite di serie con finitura elettrolitica. Per le collezioni Ninix e O-Zon raccomandiamo la finitura elettrolitica delle strutture, disponibile come opzione, nel caso di utilizzo dei mobili in ambienti considerati corrosivi. El acero inoxidable es una mezcla de hierro con mayor resistencia a la corrosión gracias a la composición del cromo y el níquel. El cloro, el mayor enemigo del RVS, puede causar una corrosión llamada “pitting”. Por ese motivo, en zonas costeras es recomendable dotar al metal de una de una superficie lo más lisa posible a fin de incrementar la resistencia a la corrosión. Los acabados de las colecciones WAVE y QT vienen de serie con un acabado electropulido. Para las colecciones NINIX, O-Zon y QT recomendamos un tratamiento electropulido opcional en el acabado si el mobiliario tiene que estar en un entorno corrosivo.**

TEAK

As Royal Botania never compromises on quality, only carefully selected mature teakwood is used in our products. All of it harvested in strict accordance with our environmental policies. Teak wood is produced by the Tectona Grandis and the wood’s renowned durability is due to its high content of natural oils. The limited absorption of moisture protects the wood from warping and gives it enormous stability. In addition, the wood is highly resistant to attacks by pests. It is because of these qualities, as well as its exceptionally attractive hue and structure, that teak is widely considered “the noblest of all wood types”. Soil and climate conditions have a significant impact on the quality of the wood, and as such, only the Indonesian plantation wood has the same superior qualities as wood harvested from the Golden Triangle: the Laos, Myanmar and Thailand region. Only wood that has fully matured possesses the much valued qualities of great stability and moisture resistance. Mature wood is ready to be felled after 75 to 80 years. Comme Royal Botania n’accepte jamais de compromis quand il s’agit de la qualité, seul le bois de teck mature, sélectionné avec soin, est utilisé, coupé dans le respect strict de nos mesures environnementales. Le bois est issu du Tectona Grandis, sa solidité universellement reconnue trouve son origine dans sa forte teneur en huiles naturelles. Vu que l’absorption d’eau est minime, le bois ne travaille pas beaucoup et est donc extrêmement stable. En outre, le bois offre une forte résistance aux agressions de produits chimiques ainsi qu’aux attaques des vermines. Ces qualités d’une part et sa couleur et sa structure exceptionnellement belles d’autre part en font le plus noble de tous les types de bois. Etant donné que la nature du sol et les conditions climatiques influencent fortement la qualité du bois, seul le bois indonésien du Tectona Grandis peut se vanter de posséder les mêmes qualités que le bois naturel, que celui en provenance du triangle d’or : Le Laos, Myanmar, la Thaïlande. Seul le bois adulte possède les qualités recherchées que sont la stabilité et la résistance. Le bois est bon pour l’abattage après 75 à 80 ans. Auf dem Gebiet von Qualität macht Royal Botania keine Kompromisse und verwendet nur sorgfältig ausgewähltes und ausgewachsenes Teak Holz, das nach strengen Milieunormen gefällt wird. Das Holz stammt von dem Tectona Grandis ab und hat seine Nachhaltigkeit zu danken an seinem großen Anteil an natürlichen Ölen. Dadurch ist die Feuchtigkeitsaufnahme eingeschränkt, was dafür sorgt, dass das Holz geringfügig arbeitet und eine enorme Stabilität aufweist. Außerdem hat das Holz eine große Resistenz gegen chemischen Einflüssen, als auch gegen Anfällen von Ungeziefer. Den Beinamen ‚die nobelste Holzsorte‘ hat das Teakholz seiner schönen Farbe, seiner Struktur und seinen nachhaltigen Qualitäten zu danken. Der Bodenzustand und die Klimamstände haben einen wichtigen Einfluss auf die Qualität des Holzes, deshalb kann nur das Indonesische Plantagenholz konkurrieren mit den Qualitäten des natürlichen Holzes, das aus dem ‚Golden Triangle‘ der Regionen Laos, Myanmar und Thailand stammt. Nur das ausgewachsene Holz besitzt diese berühmten Qualitäten was die Stabilität und Resistenz betrifft. Das Holz kann nach 75 bis 80 Jahren gefällt werden. Vermits Royal Botania geen toegevingen doet op gebied van kwaliteit gebruiken wij enkel zorgvuldig geselecteerd, volgroeid teakhout, dat geoogst wordt volgens strikte normen op gebied van milieubehoud. Het hout is afkomstig van de Tectona Grandis, de alom geprezen duurzaamheid van het hout vindt zijn oorsprong in het hoge gehalte aan natuurlijke oliën. De daaruit volgende geringe opname van vocht zorgt voor geringe werking, resulterend in een enorme stabiliteit. Bovendien biedt het hout een hoge resistentie tegen inwerking van chemicaliën, alsook tegen aantasting door ongedierte. Aan deze kwaliteiten en de uitzonderlijk mooie kleur en structuur dankt het de titel “de nobelste der houtsoorten”. Daar de bodemgesteldheid en de klimatologische omstandigheden een belangrijke invloed hebben op de kwaliteit van het hout, kan enkel het Indonesische plantagehout bogen op gelijke kwaliteiten als het natuurlijke hout dat vooral afkomstig is uit de Golden Triangle zijnde de regio van Laos, Myanmar en Thailand. Enkel het volwassen hout beschikt over de geprezen kwaliteiten qua stabiliteit en resistentie. Het hout is kaprijp na 75 à 80 jaar. Dato che Royal Botania non accetta compromessi sulla qualità, viene accuratamente selezionato solo legno di teak maturo di prima scelta, prelevato in stretta conformità con le nostre politiche ambientali. Il legno proviene dalla Tectona Grandis, e la sua rinomata durezza è dovuta al suo elevato contenuto di oli naturali. Il limitato assorbimento d’acqua di questo legno lo protegge dalla deformazione e gli conferisce un’enorme stabilità. Inoltre offre un’elevata resistenza agli attacchi di parassiti. In virtù di queste qualità, e grazie anche alla sua tonalità e alla struttura eccezionalmente attraenti, il teak è ampiamente considerato “il più nobile di tutti i tipi di legno”. La natura del suolo e le condizioni climatiche influenzano largamente la qualità del legno, così, solo il legno delle piantagioni indonesiane vanta le stesse qualità del legno raccolto nel Triangolo d’Oro: la regione del Laos, del Myanmar e della Thailandia. Solo il legno adulto possiede le qualità assai apprezzate di stabilità e resistenza all’umidità. Il legno maturo infatti è pronto per essere tagliato dopo 75/80 anni. En Royal Botania estamos comprometidos con la calidad, por ello sólo utilizamos teca madurada cuidadosamente seleccionada en nuestros productos. Todo ello siguiendo estrictamente nuestras políticas ambientales. La madera de teca, originaria del Tectona Grandis, destaca por su durabilidad gracias a un alto contenido en aceites naturales, lo que limita la humedad protegiendo la madera de la deformación y dotándola de una gran estabilidad. Además, es altamente resistente al efecto de sustancias químicas y a los daños ocasionados por plagas. Gracias a estas cualidades y a su excepcional color y estructura, la teca es considerada la más noble de las maderas. Dado que la condición del suelo y las circunstancias climatológicas tienen una importante influencia en la calidad de la madera, sólo las plantaciones de madera indonesia tienen las mismas cualidades óptimas que las que se encuentran en el Triángulo Dorado: Laos, Myanmar y Tailandia. La madera madura está lista para ser talada de los 75 a los 80 años, momento en el que posee las valiosas cualidades de estabilidad y resistencia a la humedad.
