SCHWARZMÜLLER

Intelligent Vehicles

Mastering Complexity.

The Schwarz Müller Group is therefore oriented to offering targeted benefits: we know precisely how to make a vehicle more intelligent, ensure it can carry heavier loads and operate more efficiently during use, and customise it to meet individual specifications.

We focus on optimising key benefits: by applying decades of experience and know-how, we can solve any issue, or set about finding one in a highly professional manner. We're your premium provider, with an outstanding track record in managing complexity in vehicle design, and an impressive range of premium products and services.

According to numerous studies and forecasts, commercial vehicles need to become more intelligent. When it comes to payloads, there will be new challenges on the road ahead: if Europe's ever-increasing volumes of freight are to be managed effectively, commercial vehicles must make a growing contribution, since infrastructure, new legislation and traffic density are placing constraints on numerical growth in lorry units.

Yours sincerely
 Roland Hartwig
 CEO Schwarz Müller Group

SCHWARZMÜLLER

The Company

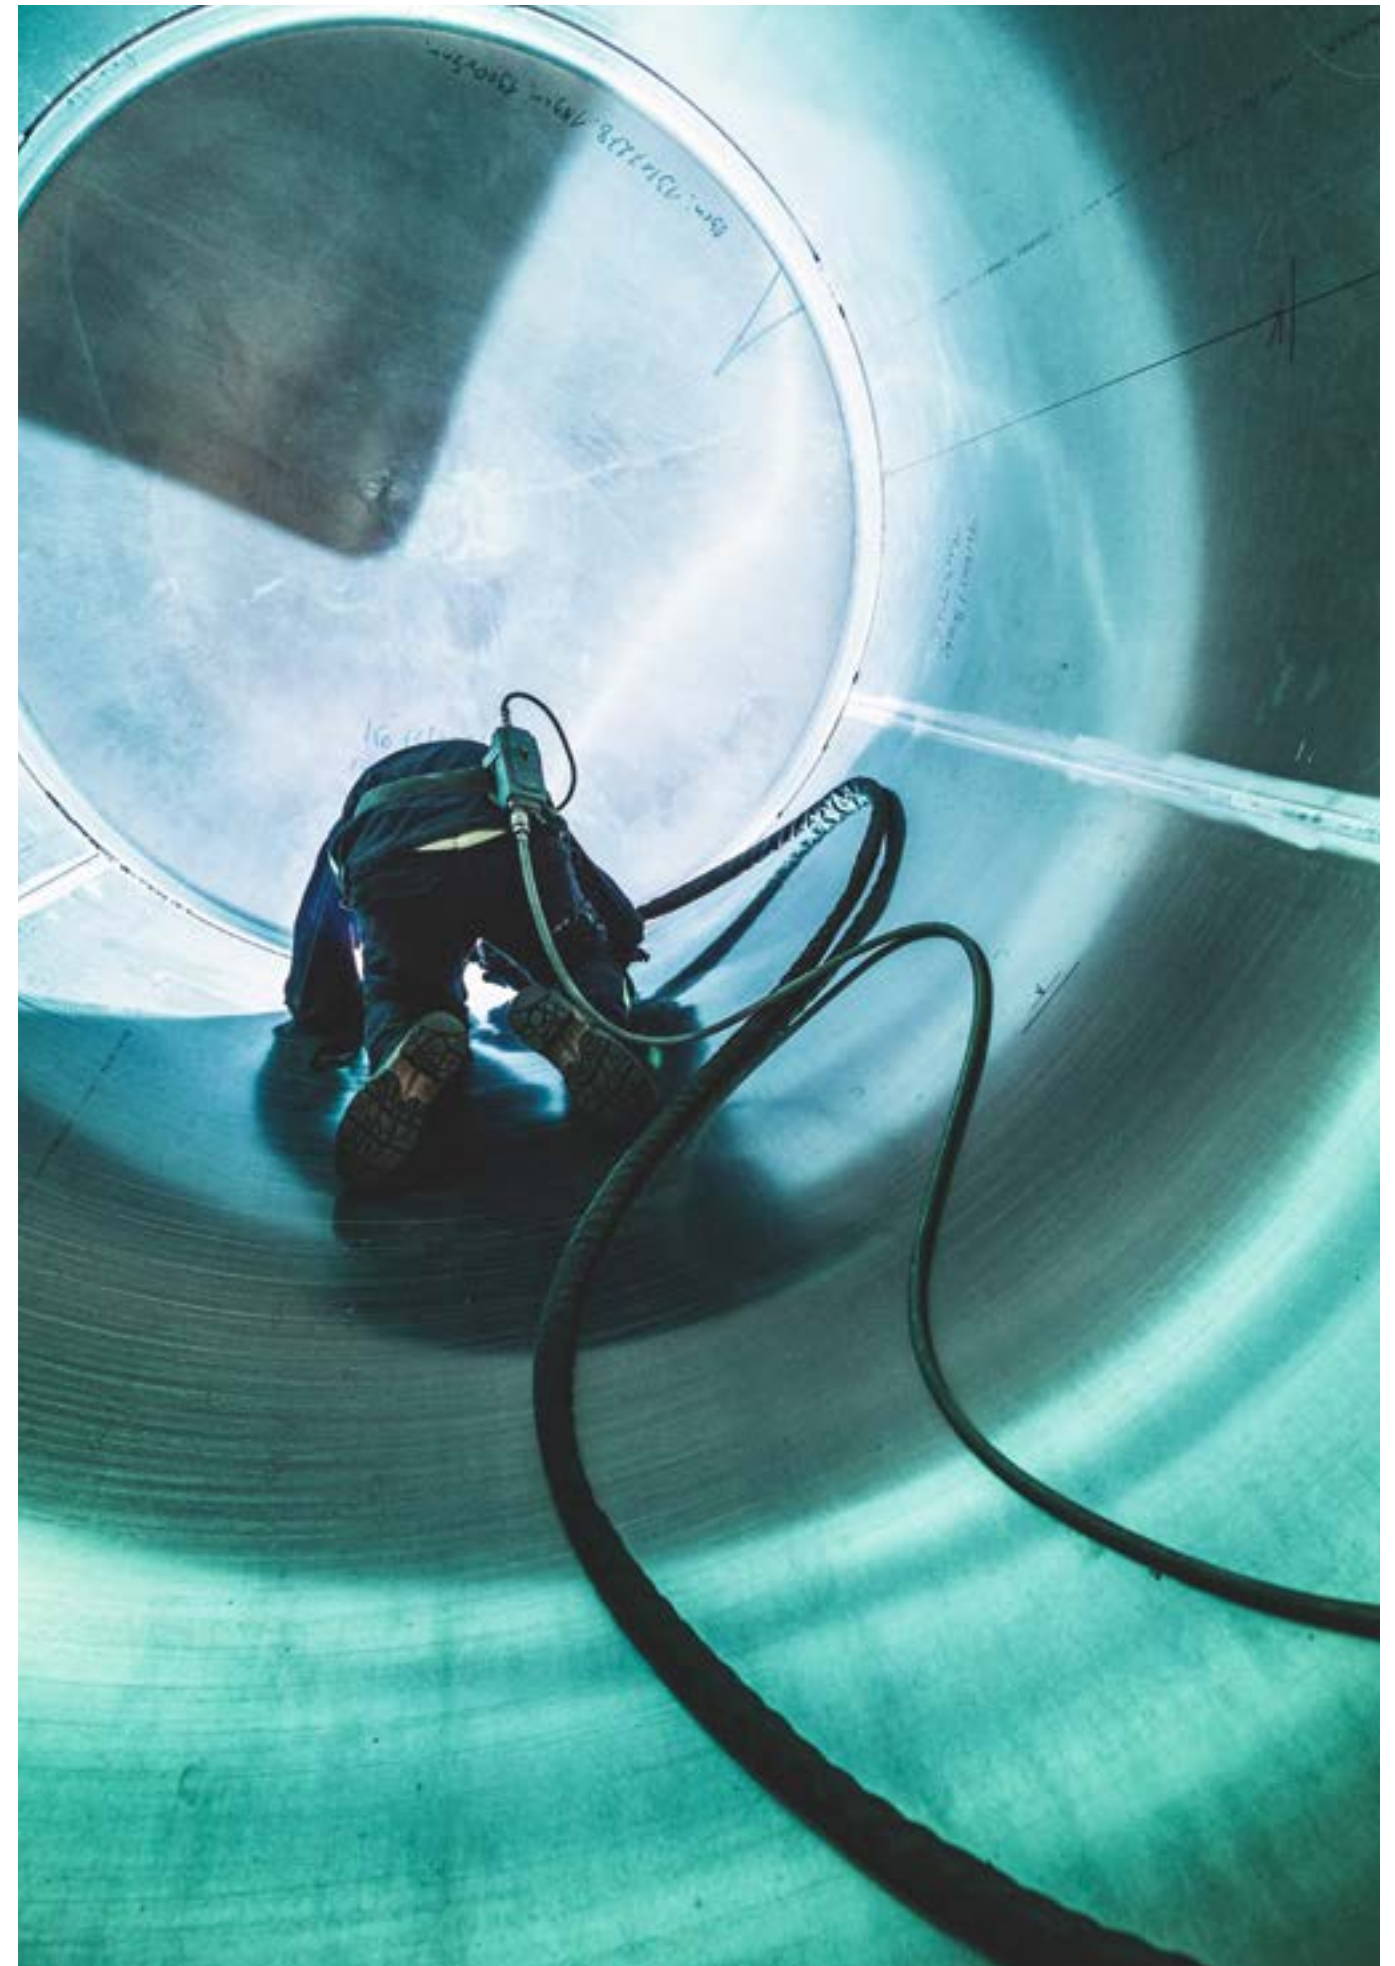

The Commercial Vehicles of the Future.

In future, towed units will be the drivers of growth in the haulage industry. Traffic density, new legislation and infrastructure limitations already mean the numerical quantity of lorry units can only increase slowly. It will therefore be vital to enhance the performance of trailers and trailer bodies.

Schwarz Müller vehicles are pace-setters when it comes to payload, flexibility, handling and operating periods, and we offer optimised custom solutions for a variety of industries. In our view, complexity is a question of perspective: Since our strategy revolves around offering premium products and services, we always have answers to the challenges ahead.

Schwarz Müller employees have decades of experience in meeting demanding design and technical specifications and are well skilled in the specialised needs of particular industries. The ability to offer tailored solutions is especially valuable when complex commercial vehicles are required.

In the current tough market environment, standard solutions often are not enough. Schwarz Müller, with technically superior products and a flexible range of services, offers support for its vehicles and customers throughout their life cycle. We stay close to our customers in no fewer than 19 countries, via our own workshops and via service partners.

Building on Excellence in Vehicle Technology.

The technical expertise of Schwarz Müller employees is the key to our vehicles' superior performance. From development to design and production, the Schwarz Müller Group is all about guaranteeing top quality and meeting any customer requirement.

Our main operations are at the company headquarters in Freinberg (Upper Austria), where special vehicles are developed and produced. In addition we have operations in Zbrak (Czech Republic) and Budapest (Hungary). Our operations are based on a competency centre approach, with tasks distributed according to our international strategy. Since we are a full-range supplier of commercial

vehicles, our production processes and employees must meet exalted requirements.

Schwarz Müller is an innovator in areas such as lightweight construction. This is a field in which the company has worked intensively for over 25 years, since it is one of the secrets to larger payloads. We aim to combine very low empty weight with high stability and strength during use; metal processing is the basis for this high efficiency, and numerous technical details ensure optimum performance throughout a vehicle's entire life time. By coordinating all these elements as part of an overall system, we can deliver outstanding customised vehicles for a diverse range of industries.

Pioneers for Over 140 Years.

The company was originally founded in the late 19th century as a blacksmith's workshop. It has since grown to become an international full-range supplier of commercial vehicles, still owned by the family who founded the business. Throughout the Schwarz Müller Group's 140-year history, the common thread has been our employees' ability to come up with notable technical innovations.

- 1870 | Joseph Schwarz Müller opens a blacksmith's workshop in Passau (Germany)
- 1921 | First trailer with wooden spoke wheels and solid rubber tyres produced
- 1936 | Company headquarters move to Freinberg (Upper Austria)
- 1958 | Four service centres opened in Austria and one in Passau (Germany)
- 1966 | Tank vehicles added to the product range of platform, tipper and timber vehicles – an important milestone along the road to becoming a full-range supplier of commercial vehicles
- 1990 | Expansion in Eastern Europe begins: Production site set up in Budapest (Hungary)
- 1993 | Third production site opens in Zebrač (Czech Republic)
- 2001 | Lightweight, high-stability segment tipper vehicle developed
- 2009 | New service centre opened in Bucharest (Romania); fully automated production of main chassis beams goes live in Hanzing
- 2009 | First walking-floor semi-trailer with steel and aluminium frame
- 2012 | ULTRALIGHT platform semi-trailer launched
- 2014 | Product offensive continues with new tipper semi-trailers with thermal insulation

SCHWARZMÜLLER

The Vehicles

Vehicles that Set High Standards.

Among Europe's producers of commercial vehicles, Schwarzmüller is the only full-range provider in the premium segment. Along with standard vehicles, we develop customised solutions for a variety of areas such as logistics and long-distance transport, the construction and oil industries, the wood processing industry, the waste management industry, agriculture and the food industry. The common denominator is technical attributes that guarantee added value for our customers.

Timber/Stanchion Vehicles

(drawbar trailers and semi-trailers)

Innovative central axle trailer. Increased payload thanks to lightweight construction; premium stanchion components for secure transport. Wide range of options.
Industry: Timber

Low-Loader Vehicles

(drawbar trailers, semi-trailers, 2- to 5-central-axle trailers)

Stable welded steel design, optimum load tie-down, extendable load carrier for transporting wider vehicles. Wide range of options.
Industry: Construction

Platform Vehicles

(semi-trailers, drawbar and central-axle trailers)

Wide variety of semi-trailers. Torsionally rigid ladder frame design, aluminium body components (code XL), optimum load tie-down. Wide range of options.
Industries: Haulage/long-distance transport, construction

Swap-Body Vehicles

(drawbar trailers and semi-trailers)

Suitable for roll-off and swap-bodies. Carrier vehicles for a broad range of applications and with intelligent swapping systems. Wide range of options.
Industries: Haulage/long-distance transport, waste management

Walking-Floor Vehicles

(mainly semi-trailers)

Chassis in aluminium or steel; Cargo Floor walking-floor system with 21 movable sections for loading and unloading. Wide range of options.
Industries: Haulage/long-distance transport, timber, waste management

Tipper Vehicles

(semi-trailers, drawbar and central-axle trailers)

Wide range of lorry bodies; advanced technology and high rollover stability. Thermally insulated vehicles for transporting mixed materials meet current requirements. Wide range of options.
Industries: Construction, agriculture, waste management

Tank Vehicles

(semi-trailers, truck bodies and trailers)

In aluminium with double-wedge design (2 and 3 axles) and stainless steel. Suitable for transporting a wide range of goods. Low centre of gravity, optimum functionality. Wide range of options.
Industries: Mineral oil, chemicals, liquid foodstuffs

Refrigerated Vehicles

(semi-trailers, drawbar and central axle trailers, truck bodies)

GRP sandwich design allows an additional payload of 800 kg; reliable supply of spare parts due to high-quality refrigeration equipment from leading manufacturers. Wide range of options.
Industries: Haulage/long-distance transport, food

SCHWARZMÜLLER

Staying Close to Our Customers

Greater Confidence, Lower Costs.

As a premium provider of commercial vehicles, we are responsible for the quality of our vehicles throughout their life cycle, and guarantee our customers comprehensive support whatever their requirements are.

Service – by Schwarz Müller, for Schwarz Müller

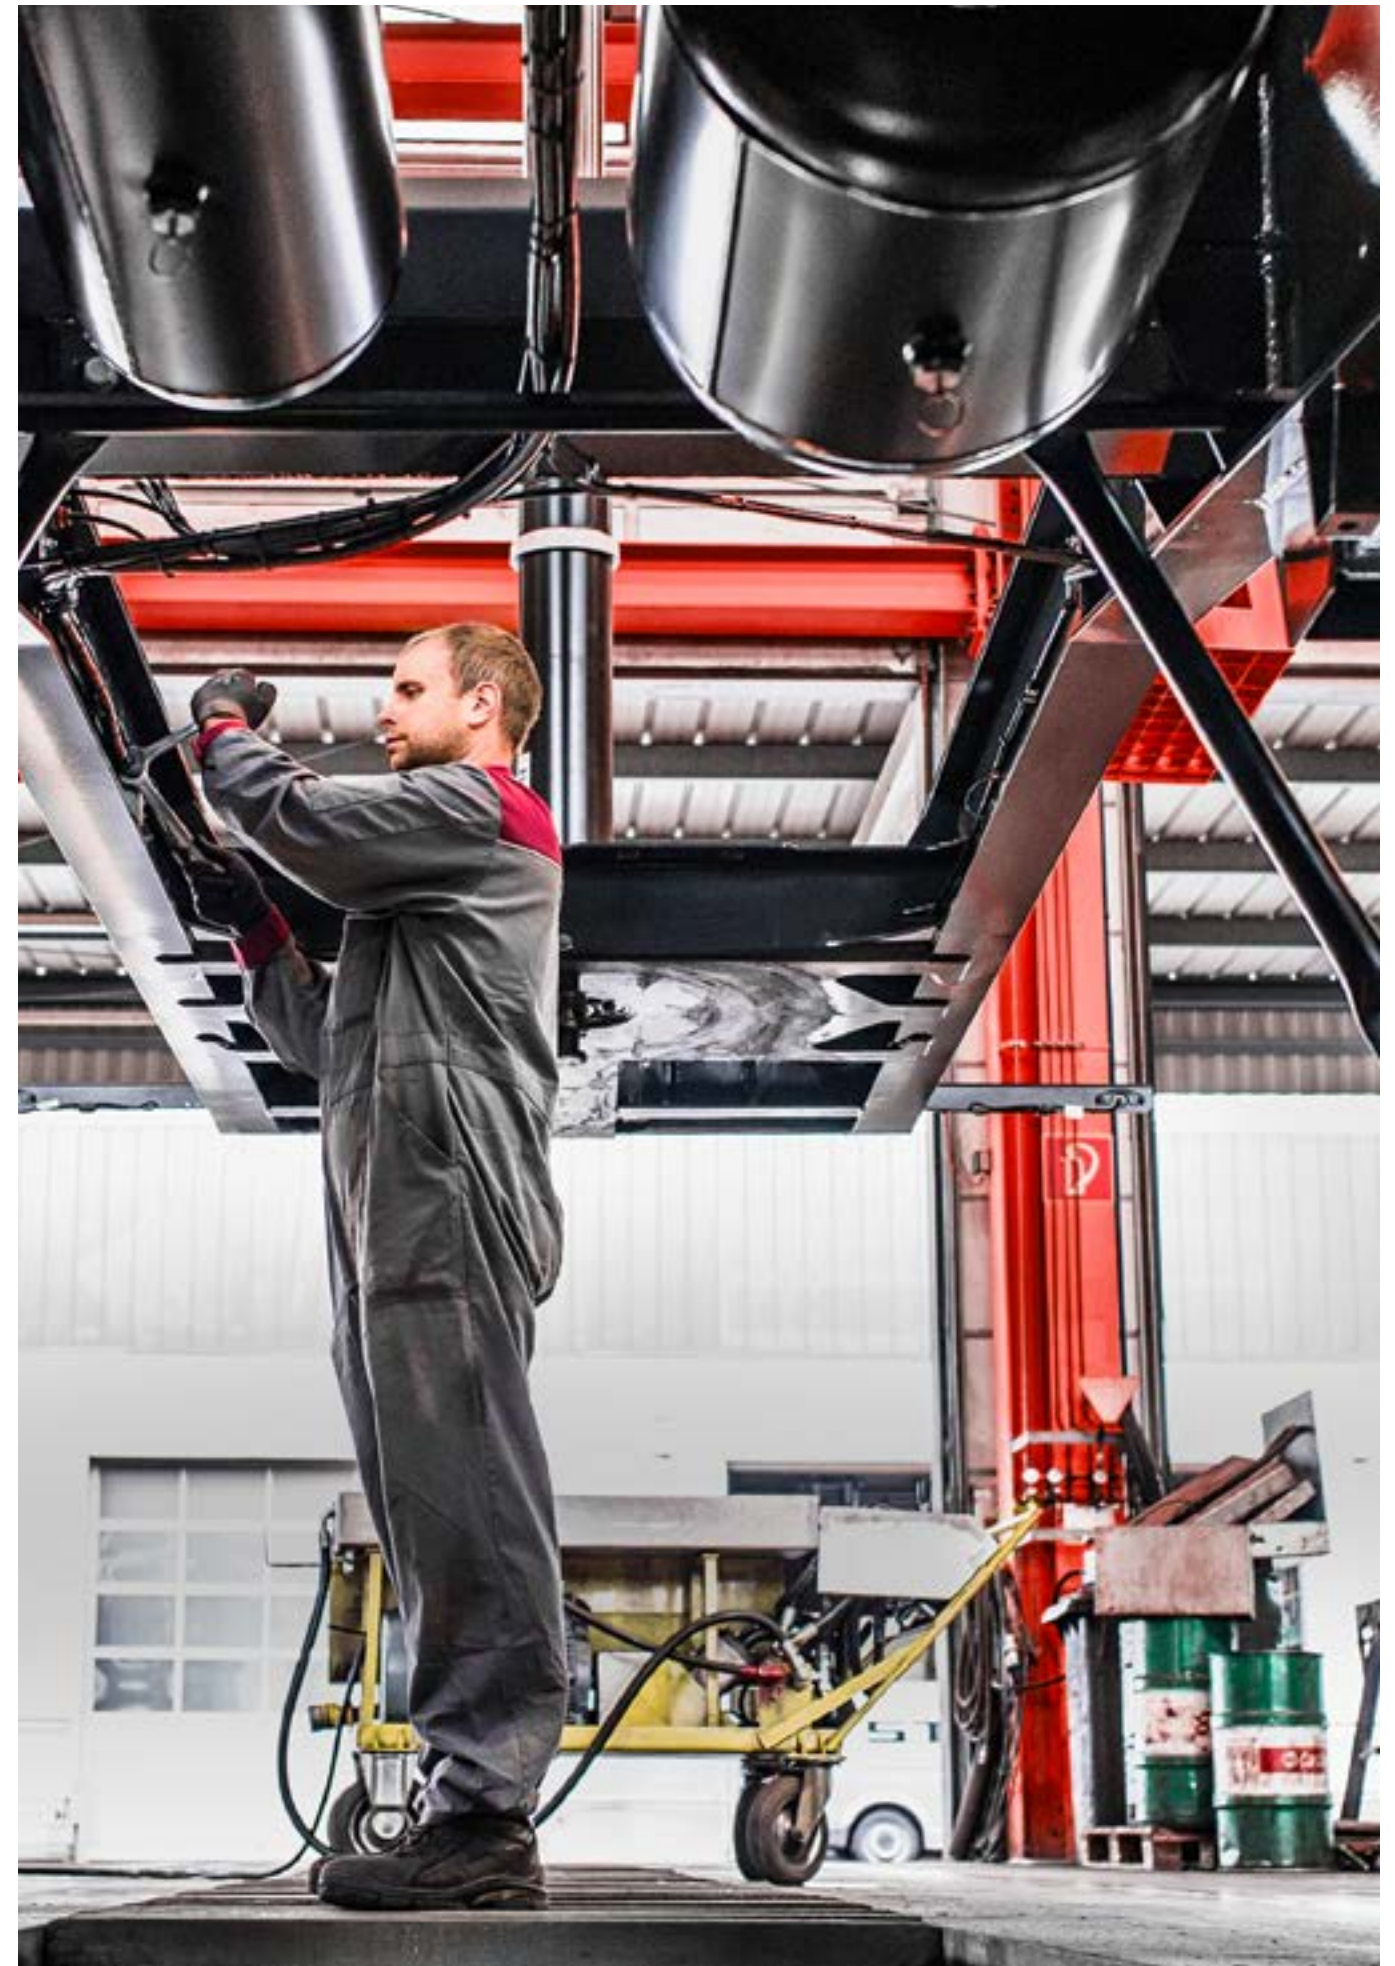

A network of workshops and service sites provide regular service and maintenance for more than 100,000 vehicles currently in use.

More than 250 trained specialists focus on ensuring that a Schwarz Müller remains a Schwarz Müller. In addition, we have cooperation agreements with 350 service partners along major traffic routes throughout Europe.

Renting an original The Schwarz Müller Group also offers one of Europe's largest fleets of rental vehicles direct from the manufacturer so that fluctuating needs can be managed effectively. These include standard vehicles and special vehicles for various industries. The vehicle fleet also includes the top innovations from our product portfolio.

Intelligent options for leasing a vehicle or buying a used vehicle
Schwarz Müller's Financing Service offers custom solutions for vehicle leasing or hire purchase. A broad range of used commercial vehicles are available to customers via our international network.

Schwarz Müller: a comprehensive range of products and services, with added value guaranteed!

Close to the Customer in 19 Countries.

The Schwarzmüller Group is currently represented in 19 countries in Central and Eastern Europe, with its own facilities (production, sales and service) and via sales partners. This international network, and our more than 2,200 employees, are the basis for successful relationships with customers in a wide range of industries requiring high-quality transport solutions. In the market for new vehicles we cover a broad geographic area, and we offer a portfolio of services across the entire life cycle of our products.
