### CARE & MAINTENANCE

#### METAL

For general cleaning use a soft clean cloth and a mild detergent in warm water. Wipe the surface gently to remove dust or marks. Always rinse after cleaning with fresh water to remove any remaining detergent.

#### POWDER COAT

Remove loose deposits with a wet sponge (avoid scratching the surface by dry dusting). Use a soft clean cloth and mild detergent in warm water. Wipe the powdercoating to remove dust, salt or other deposits. Always rinse after cleaning with fresh water to remove any remaining detergent. In some cases, strong solvents recommended for thinning various types of paints and also for cleaning up are harmful to the extended life of the powder coated surface. These solvents should not be used for cleaning purposes.

#### FABRIC

Gently spot clean excess liquid from the fabric surface. Do not saturate or scrub the fabric with water or cleaning liquids. Every fabric composition varies and the individual fabric supplier should be contacted for further fabric care instructions.

#### PLASTIC

Use a damp cloth and mild cleaning product. Dry with a soft cloth. Do not use abrasive cleaning agents or cloths.
