# Cloud™

Cloud

Cloud is a system of acoustic organic pod formations and desktop screens which create desirable and inviting work environments.

CLOUD BURST, CLOUD HOST, CLOUD FORMATION, CLOUD ARRAY, CLOUD STREET, CLOUD AVENUE AND CLOUD SCREEN

FEATURES

Cloud's unique form comprises minimal elements which are simple to install, are lightweight and can be reconfigured to meet changing needs. The soft aesthetic moves away from rigid office structures allowing designers to plan environments with continuous flowing configurations or stand-alone pods. The desktop Cloud Screen provides privacy to individual desks and tables. The panels absorb sound and help with dampening noise in an open work environment. The panels have been tested by RMIT in accordance with AS ISO 354-2006 "Measurement of Sound Absorption in a Reverberation Room," with a NRC result of 0.60. This value indicates that the panel is capable of absorbing 60% of the incident sound reflecting back only 40% to the surrounding space. Panels are made using metal frame and EchoPanel® that has a high percentage of recycled and recyclable materials with low VOC, is Good Environmental Choice Australia (GECA) certified. Cloud utilises a unique and patented manufacturing process to achieve its form and offers a wide range of colours and there is the ability to custom print patterns. You also have the option of selecting two-tone colours. Panels are off the floor for easy cleaning and air circulation. There are no visible frames and Cloud's organic formations easily nest together. Electrical and data cables reticulate inside the panels and worktops or height adjustable desks can be fitted to the pods.

FINISHES

EchoPanel®:

365 Navy	402 Pebble	442 Grey	444 Smoke

Cloud Feet: Silver powder coat
Table Pedestal Base: Polished chrome, white, or black powder coat
Tops: Laminate, veneer (custom on request)
Cloud Screen Joining Bracket: White or grey
Other powder coat and EchoPanel® colours available on request and subject to minimum quantities and longer lead-time. Refer to Woven Image website for a full range of EchoPanel® colours.

CARE & MAINTENANCE

### LAMINATE
For general cleaning use a soft clean cloth and a mild detergent in warm water. Wipe the surface gently to remove dust or marks. Always rinse after cleaning with fresh water to remove any remaining detergent. For heavier stains use a non-abrasive cleaner. Excessive scrubbing may damage the decorative surface, particularly a gloss finish.

METAL
For general cleaning use a soft clean cloth and a mild detergent in warm water. Wipe the surface gently to remove dust or marks. Always rinse after cleaning with fresh water to remove any remaining detergent.

POWDER COAT
Remove loose deposits with a wet sponge (avoid scratching the surface by dry dusting). Use a soft clean cloth and mild detergent in warm water. Wipe
the powdercoating to remove dust, salt or other deposits. Always rinse after cleaning with fresh water to remove any remaining detergent. In some cases, strong solvents recommended for thinning various types of paints and also for cleaning up are harmful to the extended life of the powder coated surface. These solvents should not be used for cleaning purposes.

SOLID TIMBER
Avoid direct sunlight.
Don't scrub the surface with an abrasive cloth as this can damage the timber and the finish. Dust and wipe down the timber surface regularly with a slightly damp soft cloth.

VENEER
Dust and wipe down the veneer surface regularly with a slightly damp soft cloth. Furniture polish recommended for the appropriate wood finish will remove soil and dust and provide a protective coating to guard against future spills. Polishing more than 3-4 times per year will see a buildup of cloudy film. Water or liquid spills should be wiped up immediately and avoid placing hot items directly on the veneer surface.

FABRIC
Gently spot clean excess liquid from the fabric surface. Do not saturate or scrub the fabric with water or cleaning liquids. Every fabric composition varies and the individual fabric supplier should be contacted for further fabric care instructions.

ECHOPANEL
Remove dust and marks with a soft damp cloth and mild solutions of warm water and upholstery shampoo. Blot dry with a solution free soft damp cloth.

PLASTIC
Use a damp cloth and mild cleaning product. Dry with a soft cloth. Do not use abrasive cleaning agents or cloths.

WHITEBOARD
Use a whiteboard duster for general erasing. For tough marks (ghosting) use a professional whiteboard cleaner and wipe with soap, water and a clean cloth afterwards. To prevent ghosting, the ink should be completely dry before erasing. Excessive smearing and smudging can occur if wet ink is attempted to be erased.
